CA Wily Global User Community

Why, when and how!

A Serie of hands on tutorials showing how to easily extend CA Wily Introscope's capabilities and meet all your bussinesses requirements.

Why, when and how:

Write a useful Calculator (JavaScript)
Sometimes you just need another way to visualize the same metric

Create your own EPA (Environment Performance Agent)
Imagine if you could push all that data to only one place.

Develop a simple (but effective) NameFormatter.
Get a better understand of your data grouping it the way you need.

Integrate Introscope to an unsupported Monitoring/Incident Mgt System
Several tools to check out at the same time? That time is over.
