

CA TDM 4.7 Webcast – Q&A Transcript

**Marcia Miskimen to everyone:** are there plan to support option for date 'math' on the reservation screen, for example some date "today minus 1month + 1 day"

**Marcia Miskimen to everyone:** also for generation as well, not just look for existing data

**Melanie Giuliani (internal) to everyone:** @Marcia - no plans as of now, but we will take this recommendation back to the product team

**Marcia Miskimen to everyone:** thank you

**Shivani Kaul to everyone:** Is there option to customize dockers

**Melanie Giuliani (internal) to everyone:** @shivani - yes, we supply them as images and also supply all the info you'll need to modify it

**Shivani Kaul to everyone:** thank you

**Mahesh Gatade to everyone:** can new Test Matching be used from ARD

**Melanie Giuliani (internal) to everyone:** @Mahesh - Keith doesn't believe this is possible. ARD still relies on test match, but he will confirm this.

**Mahesh Gatade to everyone:** Thanks, I will wait for reply

**Shivani Kaul to everyone:** Does Find and Reserve support Oracle DB in new version

**Melanie Giuliani (internal) to everyone:** @Shivani - yes!

**Andrew Crouch to everyone:** Any idea how licensing will work with Dockers?

**Melanie Giuliani (internal) to everyone:** @Andrew - licensing does not change bc we never licensed the number of instances of servers. It's done by named users, data sources, and final reserve usage

**Mahesh Gatade to everyone:** Can XML objects be used along with Database models

**Mahesh Gatade to everyone:** adding relationship

**Melanie Giuliani (internal) to everyone:** @Mahesh - we don't do files currently w/ data discovery

**J snow to everyone:** All compatible with zos mainframe? ZO's mainframe db2

**Melanie Giuliani (internal) to everyone:** @J snow - for db2 we can do discovery through the data model

**Mahesh Gatade to everyone:** what are the minimum h/w Windows server requirements for TDMWeb for generating DataModels and PI Scan of large databases.

**Melanie Giuliani (internal) to everyone:** @Mahesh - we have the hardware specifications in our docops site. The hardware requirements for a large server are 32GB memory and 2x Quad Core

**Mahesh Gatade to everyone:** ok, thanks

**Marcia Miskimen to everyone:** about exclusions .... do you have INCLUSION option? that to me would be a lot more useful

**Andrew Crouch to everyone:** Inclusion might be better in this case.....indeed

**Melanie Giuliani (internal) to everyone:** @Marcia - yes, you have the option during PI scans for inclusions

**Marcia Miskimen to everyone:** yea, agree - need this on the model part. thx
