

CCS-VM/ITMS Automated Patch Remediation

Compliance based Remediation

NEED

“As an Administrator I need to ensure that out of compliance machines needing a patch can be patched in an automated fashion.”

CHALLENGES

CCS-VM: As Compliance scans occur, no methodology exists for automated patching.

PRODUCT

Symantec Control Compliance Vulnerability Manager + Symantec IT Management Suite

CAPABILITIES

Provide end users with an automated way to scan and patch their environment to meet compliance standards.

Control Compliance Suite VM Integration

Sync

- ITMS will sync CCS-VM assets with CMDB Assets

Scan

- CCS-VM will run a vulnerability assessment
- CCS-VM Prioritizes vulnerabilities based on threat matrix (*High, Med, Low, Info*)

Query

- ITMS reads prioritized vulnerabilities for Assets
- ITMS Executes Enabled Automated Remediation Policies (*High, Med, Low, Info*)

Download

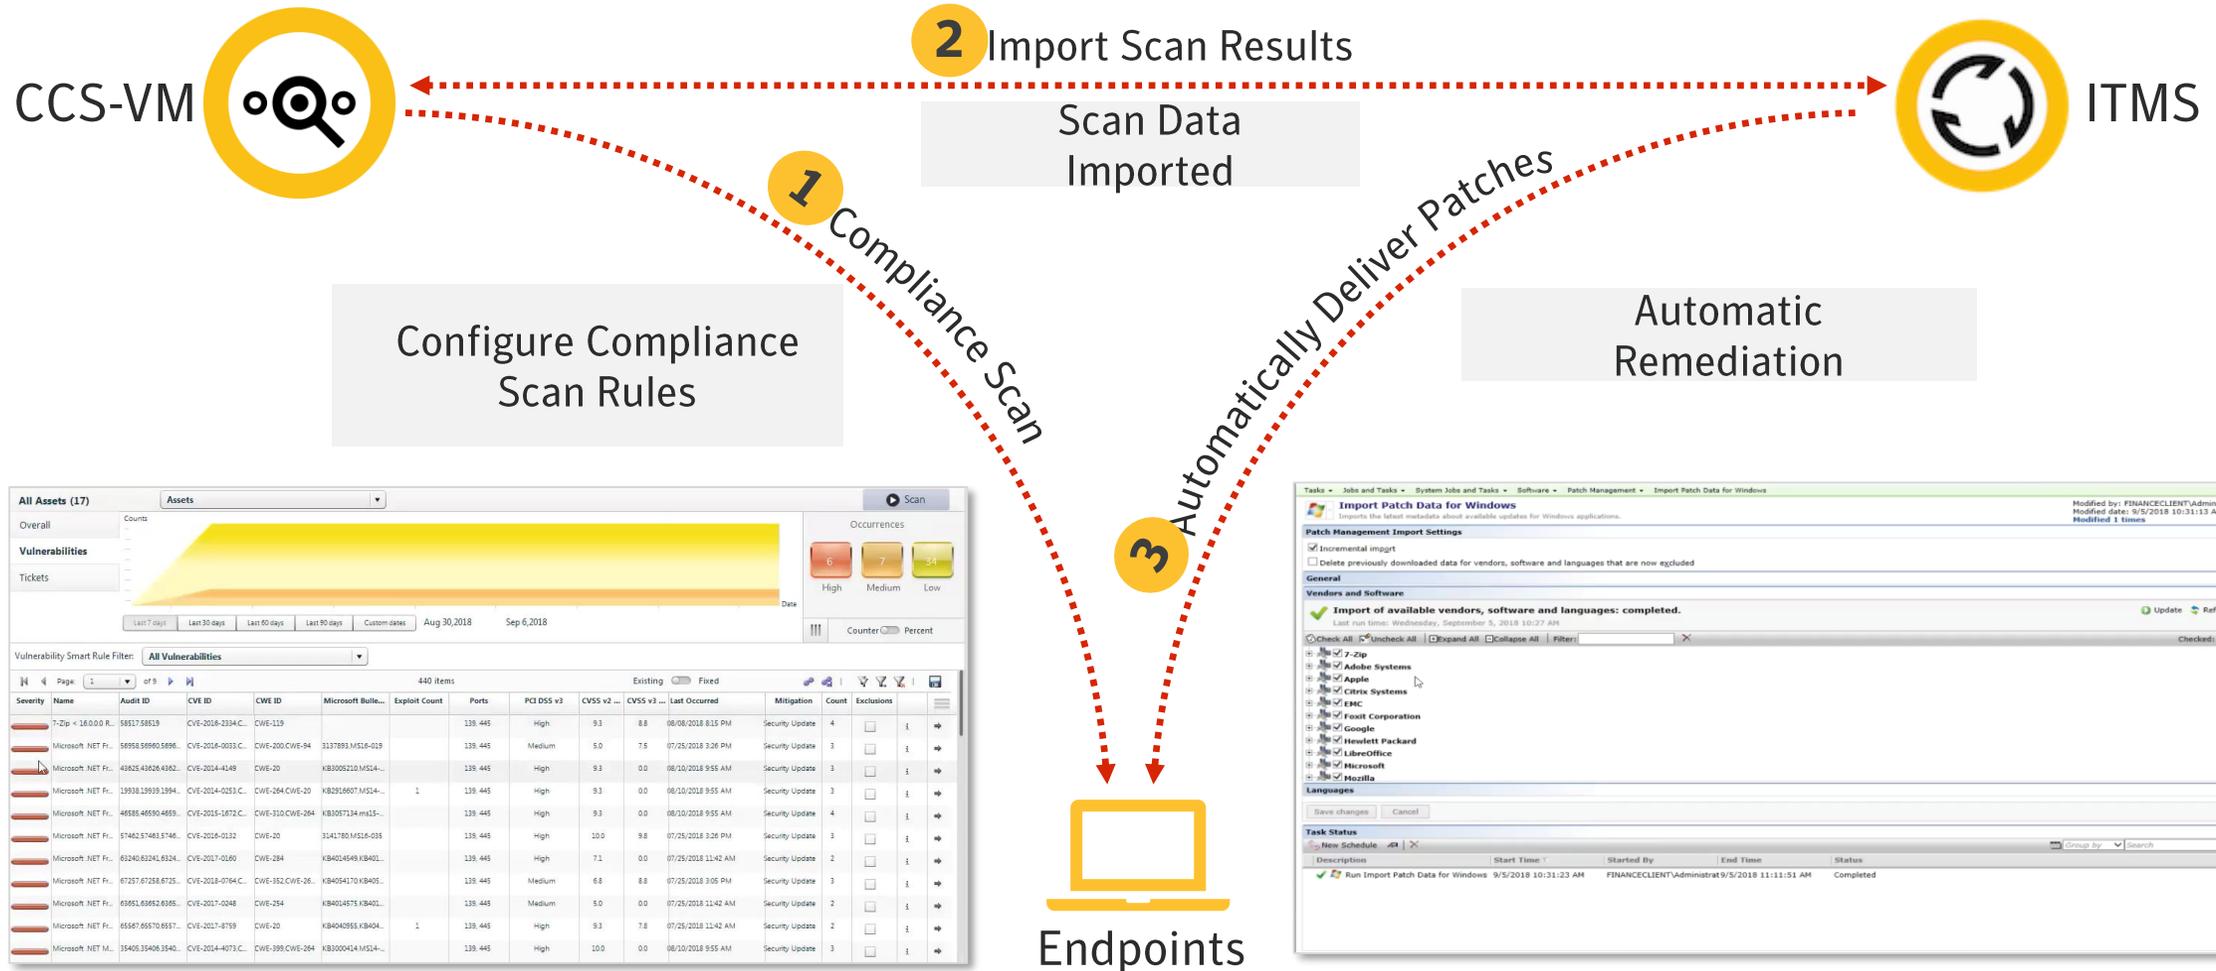

- ITMS downloads Bulletins for prioritized vulnerabilities
- ITMS deploys patches to Assets

Report

- ITMS Reports available for Vulnerability and Remediation reporting
