

Spectrum + Wily Integration

You need to follow the steps

Caution:

Before to do any steps please make a copy of

1. DeregisterEmervice.bat
2. Emervice.conf
3. RegisterEMservice.bat
- 4 IntroscopeEnterpriseManager.Properties

1> Copy from Spectrum9.1 (Home Directory of Spectrum)/Install-Tools/
Wily\Files mentioned below

- A> SpectrumAction-em.jar
- B> SpectrumAction-WS.jar
- C> snmp6-0.jar

2> Shutdown Enterprise Manager by stopping Services

A> IscopeEM

B>IscopeWV

3> Paste SpectrumAction-em.jar and SpectrumAction-ws.jar file to <Introscope Home>/ext Directory.

4> Paste snmp6-0.jar file to <Introscope Home>/lib Directory

5> Execute <Introscope Home>/DeregisterEmervice.bat <----I press Enter

6> Open <Introscope Home>/EMservice.conf file with text editor

Add a new javaclass path

wrapper.java.classpath.x=./lib/snmp6-0/jar (where x is next available element number) Save file and exit

7> Execute <Introscope Home>/RegisterEMservice.bat

8> Copy SDK Integration7.1 and Extract it and don't forgot to rename
Introscope-web-service-8.war to Introscope-web-service.war

9> Copy IscopeAlertsExt-EM.jar File to <Introscope Home>/ext Directory

10> Copy Introscope-web-service.war and castylers2.war file to <Introscope Home>/Webapps Directory

11> Add these lines as it is at the bottom of
IntroscopeEnetrprsieManager.properties file

Introscope.alerts.extension.management.modules.enable =All

Introscope.alerts.extension.inventory.updatecheckintervals=60

12> At the Spectrum End

1> Slect Administration from OnClick home page

2> The OneClick Administartion Webpage opens

3> Select wily Integration configuration from the OneClick Adminsitrtion
