GETTING STARTED

Our new homepage is designed to help new users get to their destinations in a fast and easy way!

Inbox & Notifications Have Moved

You can now navigate to your inbox by clicking on the notifications box at the top right of any communities page. This box appears even when there are no new notifications, so it's always easy to get to your inbox.

Streams are Now Located Within the “News” Section

Streams have moved to the “News” tab on the main navigation. Here, you can find streams for recent activity, top and trending content, and any custom streams that you’ve created.

The screenshot shows the 'News' section of a social media application. At the top is a navigation bar with tabs: Home, News (selected), People, Content, Communities, and Help. Below this is a secondary navigation bar with options: News (selected), Following, EM Communities, Developer Communities, and Tags, tags, tags, followed by a plus icon. A search bar contains the text 'What's going on?'. Below the search bar is a section titled 'Top & Trending' with a star icon and the text '10 updates since last visit'. Two posts are visible: one by Rufus Pinto in the 'New Product Ideation@CA EF' group, posted 2 weeks ago, titled 'How to Submit a New Product Idea'; and another by Gordon Lamothe in the 'CA Client Automation' group, posted 1 day ago, titled 'Reporter Cleanup.docx' with a subtitle 'Many customers have 100's of'.

New Options on Questions

The ability to click “I have the same question” to raise a question up in priority and the ability to track the number of helpful on responses will help to improve the question and answer experience, and limit the number of duplicates/unanswered questions in a given community.

New Ways to Filter Communities

The screenshot displays a user interface for filtering communities. At the top, there are navigation tabs: 'All Places' (selected), 'Spaces', 'Projects', and 'Groups'. Below these are search and sorting options: 'Type to filter by text', 'Filter by tag', and 'Sort by latest activity: newest first'. A 'Filter By Category' dropdown menu is open, showing a list of categories: 'All', 'Enterprise Management', 'Global Product Communities', 'ITSM', 'Mainframe', and 'Security'. The 'Security' option is highlighted. In the background, two community cards are visible. The first card, titled 'N...', shows '1' follower and a snippet of text: 'Innovation is the key to CA's growth! This site supports th...'. The second card, titled 'The Water Cooler', shows '580' followers and '5' sub-spaces, with a snippet: 'The Water Cooler is an anything goes ...'.

Communities can now be filtered by categories indicating whether or not they're product-related communities, and what type of product is covered!

New Mobile App

Download the mobile app for cloud which has an improved layout and new features like the ability to vote on ideas from directly within the app!
