Email Continues To Be The Attack Vector Of Choice

Malicious Emails Hit the Highest Rate in Five Years

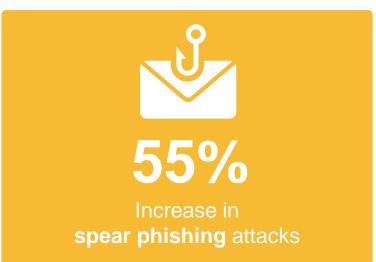

Email Attacks Are Becoming More Sophisticated

Symantec Email Security Solutions

ON-PREMISES APPLIANCE

MULTI-TENANT CLOUD

Protect against spear phishing, ransomware, and BEC attacks

Quickly respond to targeted & advanced email attacks

Keep your emails secure and confidential

Messaging Gateway Solution Overview

MULTI-LAYER SPAM & MALWARE FILTERING

Block unwanted email & prevent delivery of email containing malicious links & attachments

TARGETED ATTACK PROTECTION

Strong protection against spear phishing, ransomware & BEC attacks

RICH THREAT INTELLIGENCE

Provide detailed threat analysis & risk scoring to accelerate remediation

POLICY-BASED DATA PROTECTION & ENCRYPTION

Prevent leakage of sensitive company information

Named A Leader By IDC MarketScape

IDC MarketScape Worldwide Email Security Vendor Assessment

A **Leader** in the IDC MarketScape: Worldwide Email Security 2016 Vendor Assessment

"Symantec is the overall revenue leader in messaging security and in the software-as-aservice and software on-premises categories."

Advanced Threat Protection & Visibility

I want to uncover & quickly respond to advanced threats

SYMANTEC MESSAGING GATEWAY

Protect Sensitive Data Shared Over Email

I want to prevent loss of sensitive data and keep emails confidential

Advanced Email Threat Protection And Visibility

Need

"Advanced threats including ransomware, spear-phishing & Business Email Compromise are getting through using basic email security tools."

Challenges

Traditional blocking tools failing to block advanced threats & need better visibility into targeted attacks for faster remediation

Product

Messaging Gateway + Content & Malware Analysis

Capabilities

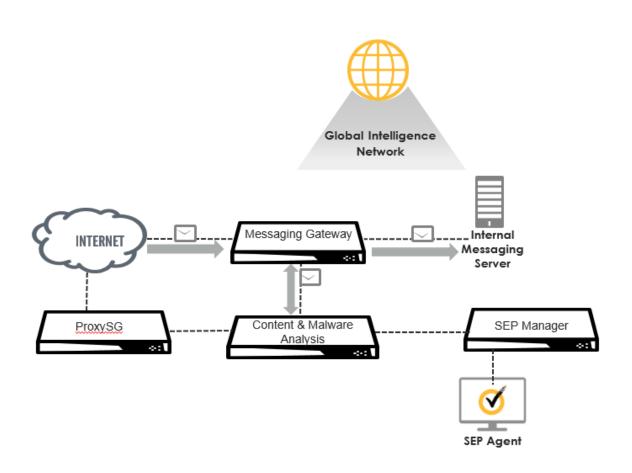

- Multi-layered technologies, Symantec GIN
- Cloud sandboxing, targeted & advanced attack visibility

Why Symantec

- Prevents stealthy targeted
 & advanced attacks
- Uncover threats with customizable sandbox
- Provides deep visibility into threat sources
- Tightly integrated with 3rd party SIEM

Advanced Threat Protection with Content & Malware Analysis

Blocks targeted attacks using advanced detection technologies - static, dynamic & behavior analysis

Provides rich threat intelligence including key malicious indicators, event timeline & threat risk score

Complete Cyber Defense Platform protects mail, web & endpoint channels

Rapid Remediation: Perform single-click remediation (blacklist, delete malware) of threats on endpoints

How the solution works

PROTECTS AGAINST

- Malware
- Advanced threats
- Spear phishing
- Ransomware
- Spam
- Bulk mail

Connection-level spam & detection

Signature & heuristics-based spam & malware scanning

URL reputation analysis

Disarm URLs & attachments

File reputation & malware scanning

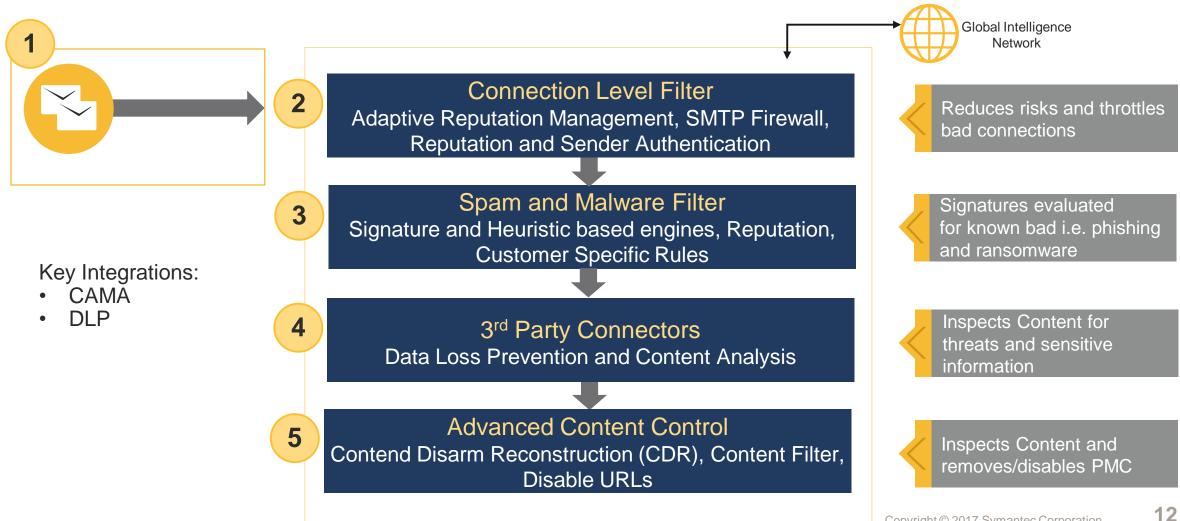

Predictive file analysis

Sandboxing & detonation

- Symantec Messaging Gateway
- Advanced Threat Protection (Content & Malware Analysis)

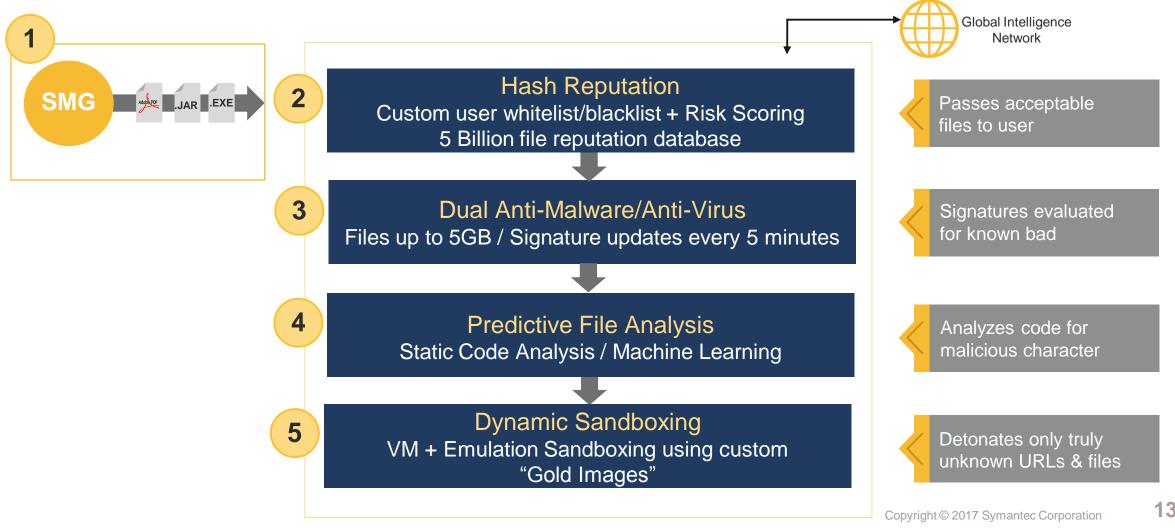

Messaging Gateway

Content And Malware Analysis

Addressing Targeted & Advanced Email Attacks Requires Rich Intelligence

Is This Targeted?

- Was this attack targeting specific users in my organization?
- If so, what type of targeted attack is this?
- Who's targeting me and where is it coming from?

Who's Targeted?

- Who in my organization was targeted?
- Was my network or endpoint security able to stop the attack?
- Were targeted users infected by the attack?

What's Used to Target?

- Were malicious file attachments used?
- Were malicious urls used? If so, was a payload downloaded?
- Can I block this attack on my endpoint or network?

Deep Visibility Into Targeted & Advanced Attacks

APIs for 3rd party SIEM integration

Accelerate Response

Benefits

Identify targeted attacks recipients

Feed malicious **URLs** into web proxy

Find patterns in threats

Monitor email logs

Protect Sensitive Data Shared Over Email

Need

"We have to prevent leakage of sensitive company data for business & compliance reasons."

Challenges

Relying on employees to prevent data leakage is not foolproof.

Product

- Messaging Gateway + Content Encryption
- Messaging Gateway + DLP + Content Encryption

Capabilities

 Provide DLP & policy-based encryption controls to block, quarantine, or encrypt sensitive emails.

Why Symantec

- Built-in content filtering & DLP controls
- Integration with Symantec DLP & Encryption provides email channel enforcement point & data security

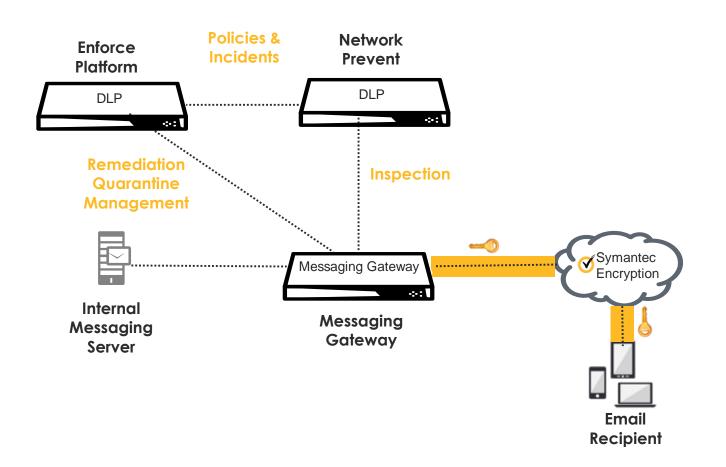

Protect Sensitive Data Shared Over Email

Symantec DLP & Encryption Integration

Monitoring & enforcement point for sensitive information shared over email

Policy-based data encryption from cloud service or onpremises appliance

Email Security Platform – Flexible Deployment

Virtual Appliance

- VMWare
- Microsoft Hyper-V

Physical Appliance

- 8340 Appliance
- 8380 Appliance

Hybrid Deployment

 Combination of Email Security. Cloud and Messaging Gateway

Key Takeaways

1. A powerful and accurate email security solution

Stop new and sophisticated threats in their tracks using advanced multi-layered detection technologies such as machine learning and behavior analysis, and the world's largest GIN (Catches 99 percent of Spam with 1 in 1 million false positive)

2. Provides in-depth threat analysis to reduce response time

Quickly respond to targeted and advanced threats with deep visibility and rich analysis of leading Indicators of Compromise

3. Includes strong Data Protection Controls

Prevent data leakage and ensure compliance with regulations such as HIPAA, PCI-DSS, and ITAR with granular DLP and encryption controls

Thank You!
