Subject: General Availability Announcement for CA Endeavor Integrations for Enterprise DevOps 18.1 0002

On behalf of Broadcom, we appreciate your business and the opportunity to provide you with high-quality, innovative software and services. As part of our ongoing commitment to customer success, we regularly release updated versions of our products. Today, we are pleased to announce that CA Endeavor Integrations for Enterprise DevOps 18.1 0002 is now available.

CA Endeavor Integrations for Enterprise DevOps option allows customers to easily integrate CA Endeavor with enterprise DevOps tools such as Git, Agile PPM tools such as Rally or JIRA and CI/CD tools such as Atomic® Continuous Delivery Director.

New features for CA Endeavor Integrations for Enterprise DevOps 18.1 0002 include:

- Support for GitLab in CA Endeavor Bridge for Git. Customers wishing to integrate Git to Endeavor may now do so for the GitHub, Atlassian Bitbucket and GitLab enterprise Git servers.
- Full support for large repositories using initialization with work environment-only files
- Support for multiple end points per event in the Mainframe Webhook Server
