Course Overview

CA NetMaster® Network Management for TCP/IP (CA NetMaster NM for TCP/IP) provides for the management and monitoring of your network infrastructure, devices, events and connections to facilitate high availability and performance for TCP/IP-enabled mainframe applications. By monitoring network health, tuning performance and proactively diagnosing and fixing issues before they're likely to affect business operations, the product helps you achieve reliable network connectivity.

This course is designed to familiarize the next generation of CA NetMaster NM for TCP/IP Administrators with the User ID Access Maintenance Subsystem (UAMS).

This Course Will Show You How To:

- Explain the purpose and functions of UAMS.
- Describe NMSAF, the CA NetMaster NM for TCP/IP functionality that enables you to integrate your external security manager with UAMS.
- Explain, at a high-level, the roles of sample group definitions and background user IDs in CA NetMaster NM for TCP/IP security.
