

WLA AO

Ali Mobrem

September 28, 2016

High Level Use Cases

	Use Case	Benefit
1	Customizable Silent Install Install\Upgrade (Platinum)	Works with customers existing software delivery tools
2	Stand Alone Tool with Web UI Install\Upgrade (Named and Growth)	Point Solution for companies that don't have existing tools for deployment
3	Remote Management of Agents Manage (Platinum\Named and Growth)	Manage and diagnose agents remotely without having explicit access to servers
4	Inventory Management and monitoring Monitor (Platinum\Named and Growth)	Talk to agents directly to get accurate picture of agents in their environment
5	Alert System Notifications (Platinum\Named and Growth)	Proactive versus reactive

The Path Forward

	Feature	Details
1	Make Silent Installer Smarter and Customizable	Precheck, Pre/Post Custom Scripts, Health Check Utility, Rollback, Optional JVM
2	Improve Single Agent Install from AO Web UI	The ability to install without passing root credentials - use SU
3	Upgrade Agents from AO Web UI	The ability to upgrade all or subset of agents connected to a scheduler
4	Install and Upgrade Autosys Client with Agent Install from AO Web UI	The ability to push out the Autosys client with agent install
5	Minor Improvements to Existing Monitoring in AO	Port any existing code from Agent monitor not in AO already

What we have today

	Existing functionality	Benefit
1	Agent Monitor	Basic monitoring - AO displays information provided from the schedulers.
2	Single Agent Installation	The ability to install a single agent on a new machine. NOT GA

List Agent Info From Schedulers

The screenshot shows the Agent Orchestrator interface. At the top, there is a navigation bar with 'Agent Orchestrator', 'Dashboard', 'Orchestrator 20', 'Installer', 'Admin', and a user profile 'CompanyAdmin123456'. Below the navigation bar is a search bar with 'Advanced search' and a saved search 'AGENT 1 ca neptun pluto'. The main content area is titled 'Agents' and contains a table with the following columns: Agent status, Agent name, Status time, Version, Host, and Operating system. The table lists 10 agents, with two marked as 'Failed'.

<input type="checkbox"/>	Agent status	Agent name	Status time	Version	Host	Operating system
<input type="checkbox"/>	Offline	AGENT_ca	7 days ago	12.0.0.00	swath5x64-2.ca.com	Linux, Red Hat 71

Advanced Search

The screenshot shows the 'Advanced search' interface in the Agent Orchestrator. The top navigation bar includes 'Agent Orchestrator', 'Dashboard', 'Orchestrator 20', 'Installer', 'Admin', and a user profile 'CompanyAdmin123456'. The search area features a dropdown menu for saved searches (currently 'saved_search') and a 'Delete saved search' link. Below this are several filter fields, each with a trash icon and a dropdown arrow:

- Agent name: AGENT
- Agent version: 12.0, 11.3
- Operating system: Red Hat 7.1
- Host: ca, neptune, pluto, 1
- Agent port: 752
- Agent status: Online, Failed, Offline

A plus sign (+) is located below the filters. At the bottom of the search area are three buttons: 'Search', 'Save as...', and 'Cancel'. The footer of the search area displays 'Showing 1-100 of 500 entries (filtered from 4,500 total entries)' and a pagination control with page numbers 1, 2, 3, 4, 5.
