Subject: New Product Announcement for CA Workload Automation AE Advanced Integration for SAP® Business Warehouse

On behalf of CA Technologies, we appreciate your business and the opportunity to provide you with high-quality, innovative software and services. Today, we are pleased to announce that a new product, CA Workload Automation AE Advanced Integration for SAP Business Warehouse, is generally available.

CA Workload Automation AE 11.3.6 has been certified by SAP for its integration with the SAP Business Warehouse application management solution. The integration enables SAP BW users to use CA Workload Automation AE 11.3.6 to manage and monitor business processes.

With this new integration and our current support for SAP® Solution Manager, users will be able to manage and run their CA WA AE jobs using these respective SAP interfaces from their familiar SAP environment. Further benefits include being able to visualize jobs and managing dependencies from one central location, while reducing the need for training on multiple platforms. Overall, these solutions are designed to help improve business productivity and to lower costs by enabling customers to integrate SAP Business Warehouse and SAP Solution Manager with CA Workload Automation.

We have included a [Data Sheet](#) that details the features and highlights of this new product. We also encourage you to visit the CA Workload Automation AE product information page on the CA Support Online website at <https://support.ca.com/> for more information.
