March 27, 2013

On behalf of CA Technologies, we appreciate your business and the opportunity to provide you with high-quality, innovative software and services. As part of our ongoing commitment to customer success, we regularly release new and updated versions of our products.

Today, we are pleased to announce that CA Performance Center r2.2.00 and CA Infrastructure Management Data Aggregator r2.2.00 are now available as part of:

- CA Infrastructure Management 2.0
- CA Infrastructure Performance 2.0
- CA Performance Management

This release introduces industry-leading features and benefits including:

- Technology certifications and reporting
  - New and enhanced certifications and reporting, including Citrix VDI and F5 Load Balancers

- Advanced self-certification using Web Services API
  - Multiple MIB table support
  - Component reconciliation and change detection
  - The ability to export and import a vendor certification, metric family, or a component
  - The ability to update a vendor certification, metric family, or a component

- Administration and user interface improvements
  - Ability to add, edit, and rearrange context tabs
  - Suppression of empty views for missing data sources
  - New 'Browser' view type
  - Built-in self-health monitoring

- Scalability and performance improvements
  - Reduced bandwidth usage between Data Aggregator and Data Collector
  - Faster dashboard loading
  - Support for multiple instances of selected data sources
    - up to 10 instances of CA Application Delivery Analysis
    - up to four instances of CA Unified Communications Monitor
