Incremental Release Announcement

CA Application Lifecycle Conductor

January 19, 2018

To: CA Application Lifecycle Conductor Customers

From: The CA Technologies CA Application Lifecycle Conductor Product Team

Subject: Incremental Release Announcement for CA Application Lifecycle Conductor V3.0 IR3

On behalf of CA Technologies, we appreciate your business and the opportunity to provide you with high-quality, innovative software and services. As part of our ongoing commitment to customer success, we regularly release updated versions of our products. Today, we are pleased to announce the formulation of an Incremental Release program for CA Application Lifecycle Conductor V3.0.

The CA Incremental Release Program is a customer-interactive delivery model where new product features are developed and released using the Agile development methodology. CA's development teams work closely with customers to create product features for rapid implementation. Rather than waiting for a list of features to be completed before making a new product release available, we are working with customers to release new features incrementally, as we complete them. CA will support incremental releases in accordance with CA's Incremental Release Program – Support Policy and Terms.

If you are interested in participating in the Incremental Release program for CA Application Lifecycle Conductor V3.0 IR3, please review CA's Incremental Release Program – Support Policy and Terms and contact the CA Application Lifecycle Conductor Product Manager (Vaughn Marshall, Vaughn.Marshall@ca.com, +1 647 988 3531) to discuss the customer requirements recommended for participation. While participation in the Agile development process is not mandatory, CA recommends that customers implementing a release during the Incremental Process participate to ensure that they are kept up to date with all communications going on with the release.

At the conclusion of the Incremental Release program, all of the new features and maintenance introduced during the program will be rolled into a 'complete' release which is then supported under CA's standard support policy.

You can download your copy of CA Application Lifecycle Conductor V3.0 from CA Support Online. The Incremental Release will be recognizable by the genlevel field (IR3). A click-on End User License Agreement will pop up for your acceptance before the product can be downloaded.

Thank you for your business, we look forward to working with you.
