We welcome and <u>value</u> your participation!

CA Harvest SCM Product Survey

Our CA Harvest Software Change Manager customers are some of the most industrious customers we have across the entire CA Technologies family. Your participation in the interactive product programs we have offered in recent years brings a key collaborative element to every facet of our ongoing product development.

Through active involvement in Community Programs, Beta Testing and more recently Customer Validation as well as our latest interactive exchanges available through our Community portal such as Discussions, Ideas, Polls and Blogs; the partnership we have established is highly valued. The various forms of feedback you have provided help us to help you maximize your investment with CA Technologies while raising the bar to even higher levels of quality, customer experience, satisfaction and product effectiveness.

This is why I encourage you to once again let your voice be heard in a new form by completing the brief <u>CA Harvest SCM Customer Feedback survey</u>. Your <u>candid</u> response will be crucial in helping CA Technologies Executive Management understand what is or isn't working. Additionally, the CA Harvest SCM Product Management team will utilize survey details to produce action plans designed to further improve the overall experience and value you receive from your investment with us.

Please click <u>HERE</u> to take the brief survey, which should take no more than 2-3 minutes to complete. Once again, we sincerely thank you for your participation and contribution!

Be Excellent!
Best Regards,
Rose Sakach
Sr Principal Product Manager
