BROADCOM®

CA Top Secret® for z/OS: Protecting Datasets and Volumes 200

EDUCATION COURSE DESCRIPTION

SUPPORTED PRODUCT RELEASE(S)
CA Top Secret®
Version 16

COURSE TYPE, LENGTH, & CODE
- Web-Based Training (WBT)
- 1.0 Hours
- 06TSS20060

PREREQUISITE(S)
- Basic knowledge of mainframes
- Experience with z/OS

WHO SHOULD ATTEND
- Security Administrators
- Security Managers
- Anyone taking an active part in security implementation or administration

Course Overview

CA Top Secret® provides comprehensive security for the z/OS, z/VM, and z/VSE environments—including z/OS UNIX and Linux for zSeries. Built-in, comprehensive administrative and reporting tools, along with detailed event logging capabilities, simplify the management of users and their access rights.

This course will show you what a resource is and how to take ownership of a resource. You will learn how to authorize access to a resource and how to use the ADD and PERMIT commands. You will learn how to move resource ownership without disturbing the authorizations that have been allowed to that resource.

This course is part of a group of Web-Based Training courses that contains the same information as the Instructor-Led Training (06TSS20071).

This Course Will Show You How To:

- Describe when and how to define datasets and volumes to the security file.

- Describe when and how to authorize your datasets to a USER, a PROFILE, or the ALL record.

- Describe how to secure DASD/Tape volumes.

- Describe how to use masking for resource authorization.
