

CA ADS™ Application Development

Cal Domingue
CA Technologies

IUA/CA IDMS™ Technical Conference
May 16-20, 2016

Abstract

- CA ADS™ for CA IDMS™ is a group of application development tools originally designed to develop 3270 applications; the tool set is also 3270 based. The tools can also be used today to develop SQL procedures that can be initiated via client-based or web-based applications. This session can serve as either an introduction to CA ADS, or a refresher course for anyone needing to create or modify applications using the CA ADS family of tools.

Agenda

- CA ADS Tools
- Creating or altering maps: MAPC
- Creating or altering dialogs: ADSC
- Creating or altering applications: ADSA
- Dialog Process Code in IDD

3

IUA/CA IDMS™ Technical Conference

© 2016 CA. ALL RIGHTS RESERVED.

CA ADS Tools

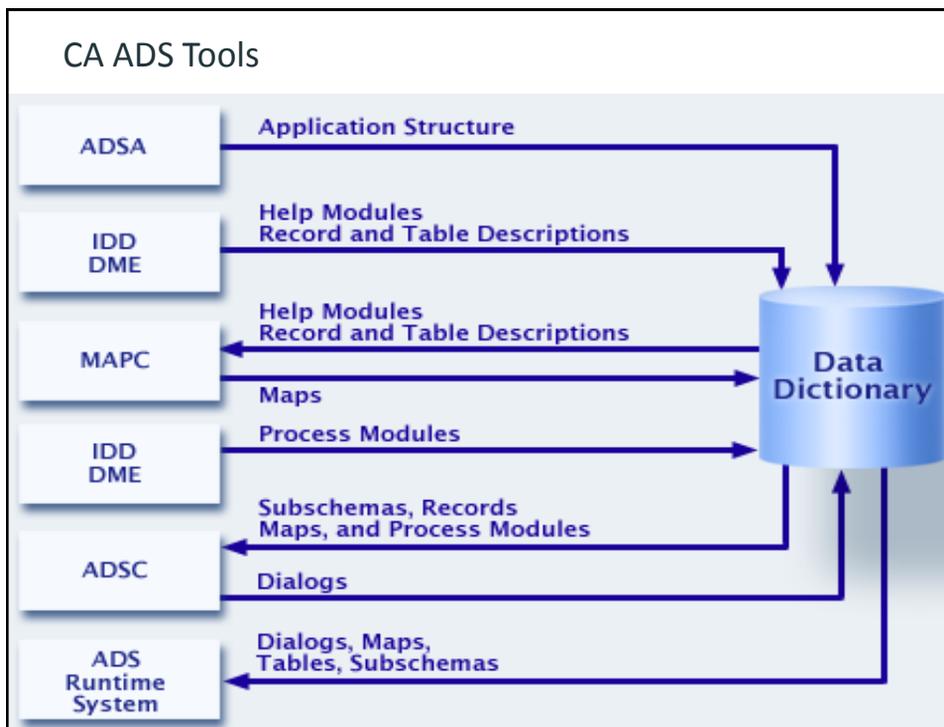

- To build interface between users and data
- Expedite writing and testing of modular applications
- 4GL
- Runs in CA IDMS DC or via UCF from other TP monitors
- Develop prototypes parallel to detailed code
- Retrieve and update data in CA IDMS database
- Process, verify, and edit data
- Manage terminal input and output via maps

4

IUA/CA IDMS™ Technical Conference

© 2016 CA. ALL RIGHTS RESERVED.

Tools and Environments

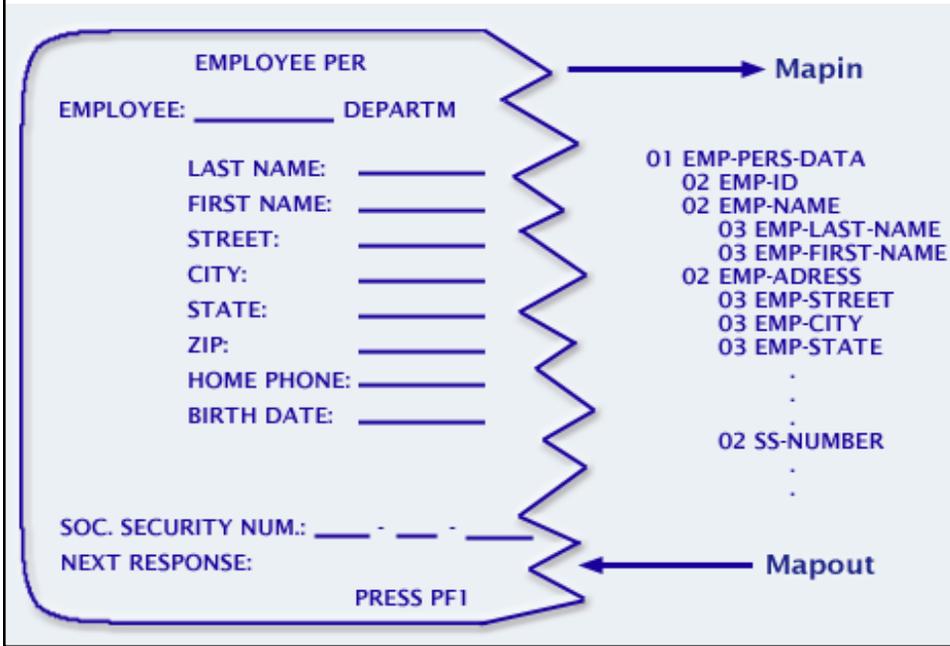

- 3270 (Mainframe)-only impact
 - MAPC
 - ADSA
- Mainframe and web-based or client-based applications
 - ADSC
 - Dialog process code written in IDD
- SQL procedures as mapless dialogs
 - Leverage existing code by cloning it
 - Create new code to access existing data

MAPC: Create or Alter Maps Functions, Steps, and Screens

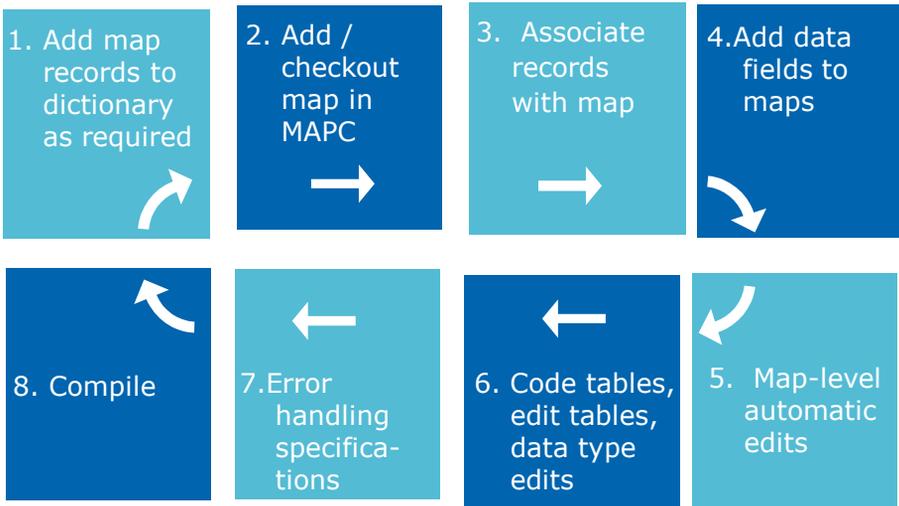

Develop / Modify Maps: MAPC

- Map
 - Specially formatted screens
 - Transmit data between terminal operator and program storage
- MAPC
 - Define map and its layout
 - Uses commands or screen prompts to simplify map design
 - Implement consistent procedures to establish fields on maps
 - Predefine characteristics of data transmitted
 - Specify links between a map and records
 - Generate an automatic screen layout from a record

Mapping Overview

Using MAPC: Steps

MAPC Screen Flow

MAPC Batch Alternative

- Batch utility: RHDCMPUT
 - Uses entity occurrences stored in the data dictionary
 - Generates map load modules
 - Produces reports
 - Decompiles maps
 - Deletes map load modules
- Batch compiler: RHDCMAP1
 - Accepts, validates, and compiles mapping language statements
 - Populates data dictionary with entity occurrences
 - Provides input statement listings

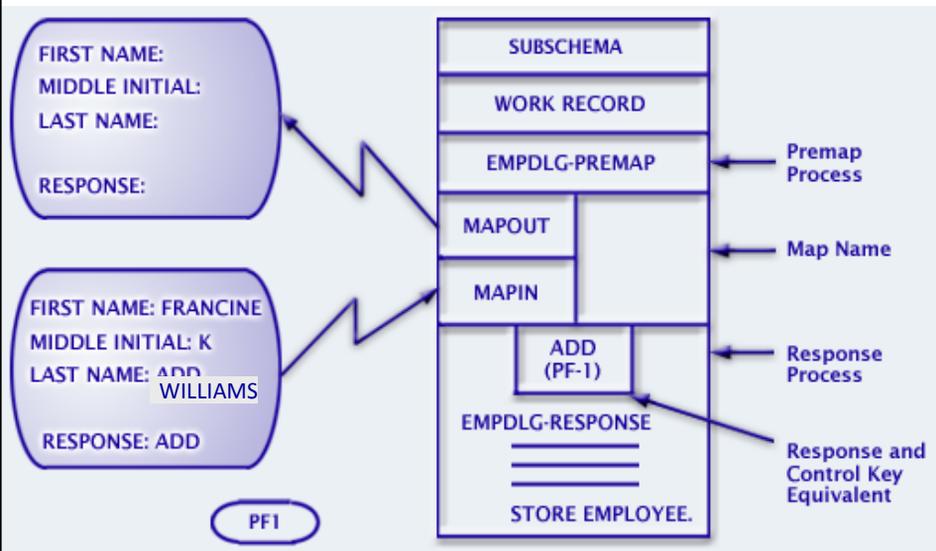

ADSC: Create or Alter Dialogs Functions, Steps, and Screens

Develop / Modify Dialogs: ADSC

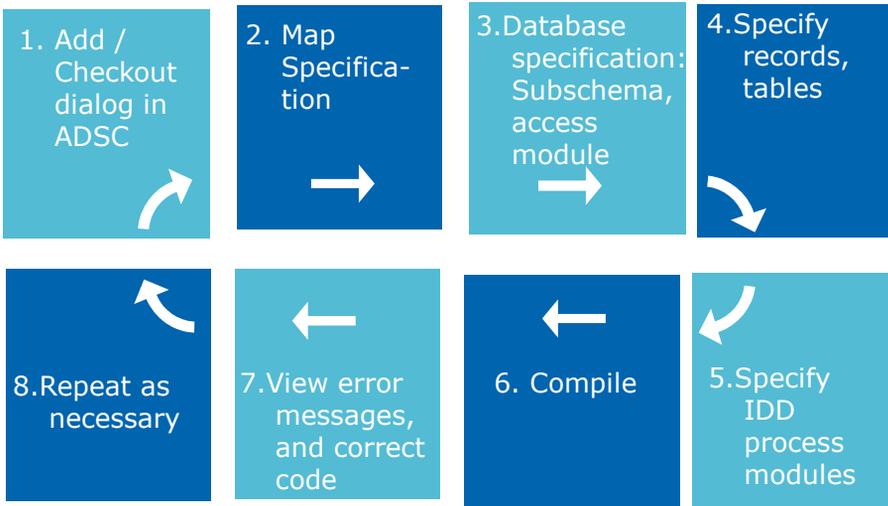

- Dialog
 - Database retrieval and update, required processing
 - Batch dialogs for file input and output
 - Map management
 - Stand-alone run-time or serve as application function

- ADSC
 - Define dialogs for online and batch applications
 - Identifies map and records for use by application
 - Executed process code stored in IDD modules
 - COBOL-like language

ADSC Batch alternatives

- ADSOBSYS
 - Run whenever sysgen ADS parms are changed
- ADSOBCOM: batch dialog compiler
 - Add, Modify, Delete dialogs
 - Signon, Compile, Decompile
 - Can process one or many dialogs per job
- ADSORPTS: batch report utility
 - Reports on dialogs or applications
 - Can process one or many dialogs per job

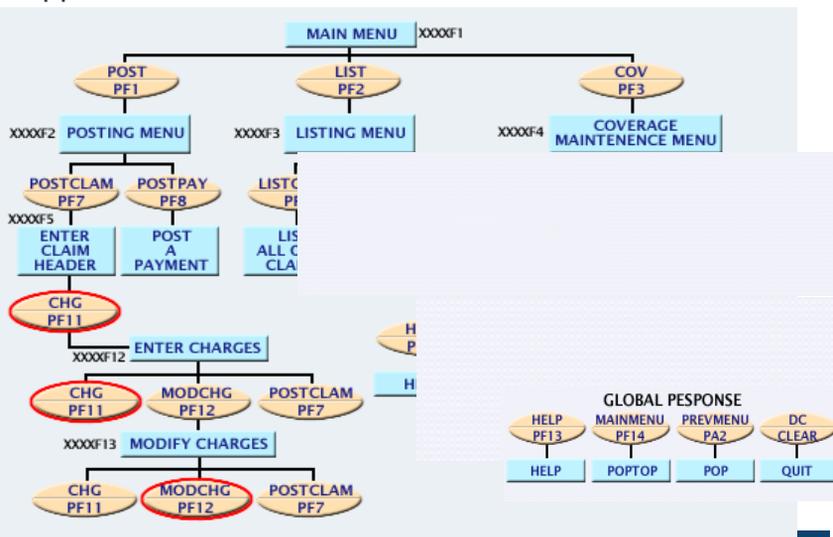

ADSA: Create or Alter Applications Functions, Steps, and Screens

Develop / Modify Applications: ADSA

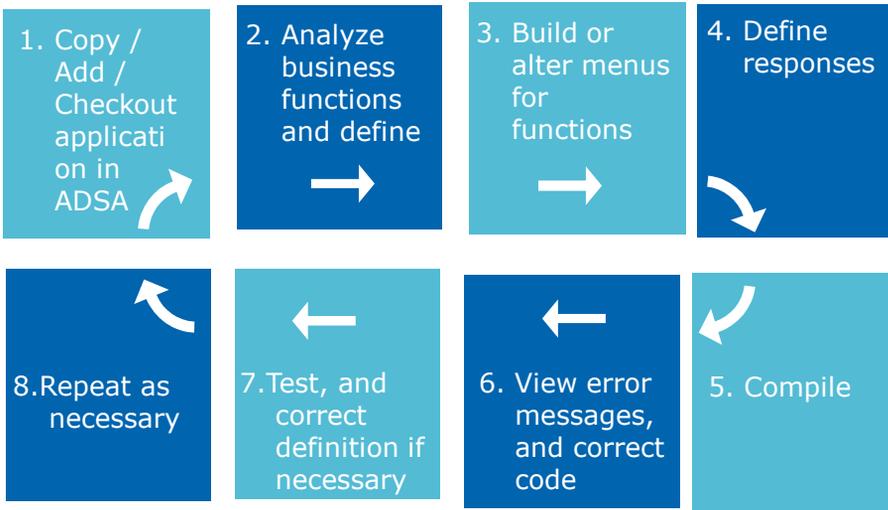

- Application
 - Framework composed of functions and responses
 - Determines execution path from function to function based on operator response
- ADSA
 - Design and prototype an application
 - Define structure and components of an application
 - Function: unit of work (dialog, program, menu)
 - Response: path options (control key, function to execute)
 - System Responses: services (e.g. exit, return to menu)
 - Task Codes
 - Generation of menu and help screens

Develop/Modify Application: ADSA

- ADSORPTS: batch report utility

Dialog Components: Process Modules Command Types and Examples

Dialog Components

The diagram illustrates the structure of a dialog component. At the top is 'FUNCTION A', which contains several sub-components: 'Dialog A', 'Subschema', 'Work Records', 'Premap Process', and a table with 'Out' and 'Map' columns. Below the table are three 'Response Process' blocks, each associated with a command type: 'ADD', 'MOD', and 'DEL'. These command types are represented by yellow circles. At the bottom, three boxes labeled 'Function B', 'Function C', and 'Function D' are connected to the 'ADD', 'MOD', and 'DEL' circles respectively, indicating that these functions are invoked by the corresponding response processes.

- Defined in ADSC
- Dialog as ADSA function
- Responses defined to ADSA
- Responses invoke function
- Responses defined in IDD process modules

Command Types in Process Modules

- Control Commands
 - Indicate flow of control
 - Display, Invoke, Link, Suspend Session, Call
- Conditional Commands
 - Testing specified Conditions
 - While / Repeat / End, If / Then / Else
- Database Access Commands
 - Prepares the database for access
 - Initialize (record buffer), Ready (area)

Command Types in Process Modules

- Database Access Commands
 - Navigate the database (network) or SQL DML
 - Find, Obtain, Erase, Select, Modify, Store
 - Check DML status: Error-Status or SQLSTATE
- Arithmetic and Assignment Commands
 - Computations and moves
 - Add, Subtract, Divide, Subtract, Compute, Move
- Map Modification Commands
 - Controlling the map display
 - Modify Map (Brighten, Protect), Get / Put Detail

Command Types in Process Modules

- Subroutine Control Commands
 - Embedded subroutine
 - Define Subroutine / End, Call
- Reserved Words
 - Map displays
 - \$PAGE, \$PAGE-READY, \$FULLPAGE, \$MDP, \$Response, \$Message

Process Module Example

```
! THIS PREMAP PRESENTS THE REQUESTED EMPLOYEE!  
IF (NUMERIC (AGR-PASSED-ONE)) THEN  
  DO.  
    MOVE AGR-PASSED-ONE TO EMP-ID-0415.  
    MOVE SPACES TO AGR-PASSED-ONE.  
    OBTAIN CALC EMPLOYEE.  
    IF DB-REC-NOT-FOUND THEN  
      DO.  
        INIT (ID320M3-RECORD) .  
        DISP TEXT  
        'EMPLOYEE NOT FOUND - ENTER A VALID EMPLOYEE ID' .  
      END.
```

Process Module Example (cont.)

```

OBTAIN OWNER WITHIN DEPT-EMPLOYEE.
OBTAIN OWNER WITHIN OFFICE-EMPLOYEE.
OBTAIN FIRST EMPOSITION WITHIN EMP-EMPOSITION.
IF DB-END-OF-SET
    MOVE ZEROS TO MAP3-SALARY-AMOUNT.
ELSE
    MOVE SALARY-AMOUNT-0420 TO MAP3-SALARY-AMOUNT.
OBTAIN OWNER WITHIN JOB-EMPOSITION.
IF DB-END-OF-SET THEN
    DO.
        MOVE SPACES TO MAP3-TITLE.
        MOVE ZEROS TO MAP3-JOB-ID.
    END.

```

Process Module Example (cont.)

```

MOVE EMP-ID-0415 TO MAP3-EMP-ID.
    MOVE EMP-LAST-NAME-0415 TO MAP3-EMP-LAST-NAME.
    MOVE EMP-FIRST-NAME-0415 TO MAP3-EMP-FIRST-NAME.
    MOVE SS-NUMBER-0415 TO MAP3-SS-NUMBER.
    MOVE STATUS-0415 TO MAP3-STATUS.
    MOVE OFFICE-CODE-0450 TO MAP3-OFFICE-CODE.
    MOVE OFFICE-CITY-0450 TO MAP3-OFFICE-CITY.
    MOVE DEPT-ID-0410 TO MAP3-DEPT-ID.
    MOVE DEPT-NAME-0410 TO MAP3-DEPT-NAME.
    DISPLAY TEXT
        'ENTER ANOTHER EMPLOYEE ID TO VIEW
        EMPLOYEE DATA' .
    END.
DISPLAY TEXT 'ENTER A VALID EMPLOYEE ID' .

```

Summary

- CA ADS for CA IDMS Tools: MAPC, ADSC, ADSA
 - Develop new applications
 - Maintain and expand existing 3270 applications
 - Develop new SQL procedures for ODBC / JDBC access
- Short learning curve
- Intuitive look and feel
- Extend existing investments in your data & applications

FOR INFORMATION PURPOSES ONLY Terms of this Presentation

This presentation was based on current information and resource allocations as of May 2016 and is subject to change or withdrawal by CA at any time without notice. Notwithstanding anything in this presentation to the contrary, this presentation shall not serve to (i) affect the rights and/or obligations of CA or its licensees under any existing or future written license agreement or services agreement relating to any CA software product; or (ii) amend any product documentation or specifications for any CA software product. The development, release and timing of any features or functionality described in this presentation remain at CA's sole discretion. Notwithstanding anything in this presentation to the contrary, upon the general availability of any future CA product release referenced in this presentation, CA will make such release available (i) for sale to new licensees of such product; and (ii) to existing licensees of such product on a when and if-available basis as part of CA maintenance and support, and in the form of a regularly scheduled major product release. Such releases may be made available to current licensees of such product who are current subscribers to CA maintenance and support on a when and if-available basis. In the event of a conflict between the terms of this paragraph and any other information contained in this presentation, the terms of this paragraph shall govern.

Questions and Answers

Please Complete a Session Evaluation Form

- The number for this session is **A05**
- After completing your session evaluation form, place it in the envelope at the front of the room

The form includes the following sections:

- Session Information:** Session Number, Session Title, Name (Optional), and a table for Rate the overall session with columns for Poor, Good, and Excellent.
- Rating Scale:** A Likert scale with five points: Strongly Disagree, Disagree, Neutral, Agree, and Strongly Agree.
- Statement 1:** "The speaker used practical and knowledgeable of the subject matter." (Comments: _____)
- Statement 2:** "The speaker met my expectations." (Comments: _____)
- Statement 3:** "The material is relevant to my current job." (Comments: _____)
- Statement 4:** "I would recommend this session to a colleague." (Comments: _____)
- Statement 5:** "The session length was appropriate for the content." (Comments: _____)
- General Comments:** A section with three horizontal lines for additional feedback.
