CA GEN 8.6: Support of ECI v2

EDUCATION COURSE DESCRIPTION

SUPPORTED PRODUCT RELEASE(S)
CA Gen
Release 8.6

COURSE TYPE, LENGTH, & CODE
- Web-Based Training (WBT)
- 30 Minutes
- 06GEN20440

Course Overview

CA Gen 8.6 supports ECI v2 as one of the middleware choices for Gen C clients (GUI, COM Proxy, and C Proxy) to communicate with Gen COBOL servers on CICS.

Benefits of using ECI v2 with CA Gen 8.6:

- ECI v2 provides the ability to send more than 32K of data on each cooperative flow by utilizing Containers.

- ECI v2 also allows the CICS Transaction Gateway (CTG) to be located on a different machine than the client applications. This allows for a smaller client footprint and for the configuration/administration of the CTG to be centralized.

In this recording, you will hear more about the benefits and see how to implement the feature.

Note: CA Gen continues to support ECI v1 for backward compatibility.

This Course Will Show You How To:

- Describe ECI and ECI v2

- Describe the configuration required to use ECI v2

- Describe the basic usage of EC1 v2
