

## Q&A Session for CA APIM Community Webcast

Date: Tuesday, May 15, 2018

---

-Ashok Jena - 12:19 PM

Q: In order to connect to PAM through API , we have to provide PAM admin credentials. How to pass the password as we should not hardcode the password in code

-Melanie Giuliani - 12:43 PM

A: Jeremy is using secure password storage within the Gateway, this eliminates them being recorded -

-Melanie Giuliani - 12:43 PM

A: It's also not necessary to use an admin account, you can use any account with read access -

---

-Joseph H Fry - 12:47 PM

Q: Can APIM use the PAM A2A client to retrieve credentials? This would eliminate the need to supply PAM admin credentials altogether. If not, this would be a great integration.

-Melanie Giuliani - 12:56 PM

A: please reach out to jeremy offline to discuss this further with specific details-

---

-Leandro Silva - 12:51 PM

Q: We can have access to this policies and the shell scripts created for the examples?

-Melanie Giuliani - 12:56 PM

A: yes we will provide this. please contact Jeremy and he will share them on onedrive-
