CA Allocate™ DASD Space and Placement With Quota Manager Plus

Product sheet addendum—external

CA Allocate DASD Space and Placement with Quota Manager Plus includes the following interfaces, options and capabilities in the base product license.

Quota Manager	Monitors and controls DASD space usage, which is commonly referred to as a quota-only configuration.
DASD Space and Placement with Quota Manager	Controls many data set allocation functions, including data set placement (volume pooling) and x37 recovery. Additionally, Quota Manager provides the functionality to monitor and control DASD space usage.
