

The screenshot displays the Symantec Management Console interface. On the left, the 'Tree' pane shows a hierarchical view of the console's components, with 'Altrix Agent Package' selected under the 'Agents/Plug-ins' category. The main 'Details' pane on the right shows the configuration for the 'Install Altrix Agent' program. The configuration includes fields for Name, Description, Command line, Working directory, Success codes, Failure codes, Estimated disk space, Estimated run time, Terminate after, After running, Starting window, Run with rights, Program can run, and Minimum connection speed. The 'Program can run' field is set to 'Whether or not a user is logged on'.
