CA GEN™ Webinar

Chirag Dave   **Product Manager**
Susan Brude   **Product Owner**

January 29th, 2019

Agenda

- Introduction of CA Gen Product Manager – Chirag Dave

- Introduction of CA Gen Product Owner – Susan Brude

- Introduction of MF Architect Lead – Larry England

- CA/Broadcom view post-acquisition

- CA Gen future

- Questions & Answers

Mainframe Opportunity

Quotes from Broadcom CEO, Hock Tan, in the Press

The CA deal for Broadcom "represents an important building block as we create one of the world's leading infrastructure technology companies" - CNBC

"Mainframes remain the backbone of the enterprise computing environment and are relied on to run mission-critical applications. ... Given mainframes are the most important parts of large enterprises, we believe this will remain a strong and stable market opportunity for us for long term." - The Motley Fool

"With its sizeable installed base of customers, CA is uniquely positioned across the growing and fragmented infrastructure software market, and its mainframe and enterprise software franchises will add to our portfolio of mission critical technology businesses. We intend to continue to strengthen these franchises to meet the growing demand for infrastructure software solutions" – The Register

"Cut to the chase. We're buying CA because of the customers and their importance to these customers. CA sells mission-critical software to virtually all of the world's largest enterprises. These are global leaders in key verticals including financial services, telecoms, insurance, healthcare and retail. And CA does it a scale fairly unique to the infrastructure software space. This can only come from longstanding relationships with these customers that spend several decades. In other words, these guys are deeply embedded" – CBR

"To put it in simple terms, transactions, online transactions, a lot of them in the largest enterprises in the world cannot run without mainframe, with hardware or the software tools that drive it. So that's basically all I say to that. But obviously, ours is an operating model and a business model, and the financials is what comes out of a very strong, sustainable and secure business model." - ZDNet

Our View of the Mainframe Market

Innovation opportunities are growing the z Platform

Pervasive encryption
Real-time machine learning
Blockchain ecosystem
Container pricing

2.5x
Increase in MIPs install base over the last 10 years

78%
Of mainframe organizations experienced MIPS growth

70%
Of all transactional data resides on mainframe

1,000
Accounts driving faster than market growth

...creating opportunity for the platform ecosystem

ca technologies A Broadcom Company

Why CA Mainframe?

#1 ISV and a leader in MF Application Development, IT Operations and Security

	Modernization	**Innovation**
DevOps and Application Development	CA Gen CA Development Environment for z CA Endevor support for Git/Jenkins	CA Brightside CA Continuous Delivery for IBM Z
Intelligent Operations and Management	Specialty Engine Support - IDMS, etc. Modern UX deployments	CA Mainframe Resource Intelligence CA Mainframe Operational Intelligence CA Dynamic Capacity Intelligence
Enterprise-wide Security and Compliance	Pervasive Encryption Day 1 Support: CA ACF2 and CA TopSecret	CA Data Content Discovery CA Trusted Access Manager for z

Consumption and Transition Pricing Model

CA Gen future

- Active development to wrap up Gen 8.6.3 Complete Release

- Leverage customers, Gen Edge Community and partners to carve the roadmap

- Broader discussion around the roadmap through Webinars and/or User Group meetings

- Your thoughts around DevOps and Gen
