

CA Mainframe Resource Intelligence: Run an Assessment Advanced 200

EDUCATION COURSE DESCRIPTION

SUPPORTED PRODUCT RELEASES

CA Mainframe Resource Intelligence Version 1.0.0 and higher

COURSE TYPE, LENGTH, & CODE

- Web-Based Training (WBT)
- 20 minutes
- 06MRI20010

PREREQUISITES

- 06MRI10010 – CA Mainframe Resource Intelligence Overview Foundations 100

WHO SHOULD ATTEND

- System Programmers

Course Overview

CA Mainframe Resource Intelligence is a lightweight cloud-based solution designed to optimize operational efficiencies and reduce risk, with impactful findings and recommendations.

This solution analyzes mainframe environments and quickly generates assessments that provide recommendations to help optimize efficiency, reduce costs, and mitigate risks—without requiring a significant investment by mainframe ops teams.

This Course Will Show You How To:

- Explain the user authorization requirements for data collection.
- Install the toolkit used to collect data from the mainframe.
- Modify and submit the JCL jobs used to collect the data.
- Upload the collected data to CA Mainframe Resource Intelligence and generate a report.
