

To the Infrastructure Management (IM) Community,

We have some changes to announce with respect to our Social Channels as some of our social channels will soon be decommissioned. If you have been consuming IM Community content thru Twitter/LinkedIn/Facebook/Google+ you will want to ensure you are following the channels noted below.

To ensure that you continue to receive complete updates on things that happen within the CA IM community we recommend the following steps:

1. Follow the entire IM community to receive updates on everything that happens in the community. You can do this by clicking “follow’ in the top right corner of the community banner. You can [follow the community](#) via a [custom stream](#) or via your inbox, and turn email notifications for the community on/off via your [preferences](#).
2. If you would like to follow content for a specific product, you can do so by setting up an RSS Feed for the category that applies to your product. [Please follow these instructions](#) for how to set up the feeds.
3. Follow one or all of the CA-managed social channels:
 - a. [CA IM on Twitter](#)
 - b. [CA Technologies Infrastructure Management - LinkedIn](#)
 - c. [CA Communities for Infrastructure Management on YouTube](#)

If you have any questions please feel free to reach out to your Community Managers: Melissa Potvin (Melissa.Potvin@ca.com) or Melanie Giuliani (Melanie.Giuliani@ca.com).
