Datacom SQL Performance Analyzer

Agenda

- Feature Overview
- Download installation media
- Pre-Installation steps
- Installation
- Post-Installation steps
- Start and Stop the Service
- Cached Queries & Details
- Active Transactions
- Demo
- Resources
- Keeping You Informed – Announcements, Education, and Events

Datacom SQL Performance Analyzer

Delivered

Use Case:

As a Datacom user, I want a tool within the Datacom base product that will enable viewing of SQL queries dynamically in order to quickly and easily identify and address bottlenecks in an automated way with limited manual intervention.

Simplify & Automate

- ✓ Manage SQL performance simply and easily through a graphical user interface (UI)
- ✓ Increase productivity eliminating manual efforts tracking down SQL bottlenecks
- ✓ Speed time-to-resolution through automated reporting capabilities

Bottom Line:

Simplifying and automating SQL performance management leveraging modern graphical user interface.

Datacom SQL Performance Analyzer

- Ability to view currently running queries
- Cancel problem queries on-the-fly via user friendly UI
- Run SQL Optimization report to pinpoint problem areas for quicker resolution

Watch MTE session: DM17-S

Overview

SQL Performance Analyzer

Simplify & Monitor

- ✓ Analyze query activity to identify poorly performing queries
- ✓ View currently running queries and cached queries
- ✓ Increase productivity by minimizing manual efforts tracking down SQL bottlenecks
- ✓ Cancel problem queries
- ✓ Run optimization report to identify problem areas and tune them.

| Download Installation Media

- To locate the installation media, start at the support.broadcom.com page. From there, navigate as follows:
 - **Mainframe Software > My Downloads > Datacom**
- Once you are on the page with the products related to Datacom, click on the link for:
 - **Datacom/DB MVS**
- You should see the list of release(s). Select release '**15.1**'
- Select '**Datacom/DB**' from the list.
- Locate the SQL Performance Analyzer. You should see file with description like:
 - **SQL Performance Analyzer vv.r.mm**
- Download the tar file by clicking on  or 

| Pre-Installation Steps

- Prepare the directory within the USS environment where you want to install the SQL Performance Analyzer
- Copy the downloaded TAR file to the directory in USS
- 64-bit Java Runtime Environment installation Path
- Datacom Server is installed and JDBC URL string.

| Installation

- Extract the files to the USS directory. For example:
tar xvf DVD000000000xxxx.tar.

This command extracts the contents into a new folder 'sqlpa-n.n.n-n'

```
bash-4.3$ ls -al sqlpa-1.0.00-233/
total 169648
drwxr-xr-x  5 DTCMSQL  ADMNDGRP    8192 Jul 14 14:17 .
drwxr-xr-x  3 DTCMSQL  ADMNDGRP    8192 Aug  9 09:51 ..
drwxr-xr-x  3 DTCMSQL  ADMNDGRP    8192 Jul 14 14:17 config
-rw-r--r--  1 DTCMSQL  ADMNDGRP 86759042 Jul 14 14:17 datacom-sql-perf-analyzer.jar
drwxr-xr-x  2 DTCMSQL  ADMNDGRP    8192 Jul 14 14:17 lib
drwxr-xr-x  2 DTCMSQL  ADMNDGRP    8192 Jul 14 14:17 templates
bash-4.3$
```

- Set the extended attributes for the shared object files within the 'lib' subdirectory. From within the 'sqlpa-n.n.n-n' subdirectory, issue the following command:

extattr +p lib/.so && chmod +x lib/*.so && chmod a+x lib/*.so && ls -E lib/*

Post-Installation Steps

Data Source Configuration – Connection setup to the database(s)

- *DataSource* configuration is provided by the entries in 'datasources.yml'.
- Multiple data sources can be configured.
- The file is UTF-8 encoded. Sample datasources.yml exists in 'config' subdirectory.

- *Use an ISPF facility to edit UTF-8 within USS ('UTILITIES - Perform utility functions'/Udlist).*

```
File Edit Edit_Settings Menu Utilities Compilers Test Help

VIEW      /CA31/tmp/sqlpa/sqlpa/config/datasources.yml                      Columns
***** Top of Data *****
000001 # Datasource Configuration
000002
000003 dataSourcees:
000004   - name: default
000005     url: "jdbc:datacom://ca32.lvn.broadcom.net:9449/ServerName=MUF2SRV15,SystemID=CCICA31,ApplicationID=MUF2SRV15,ConnectType=TCP"
000006     mufname: DCMUFP
000007
000008   - name: MUF2
000009     url: "jdbc:datacom://ca32.lvn.broadcom.net:9238/ServerName=PSRV15,SystemID=CCICA31,ApplicationID=PSRV15,ConnectType=TCP,UserID=MUF2"
000010     user: dtcmsql
000011     password: *****
***** Bottom of Data *****
```

- *Bring the file down to your PC via FTP in binary mode (so that the encoding is not changed during the transfer), editing it there using an editor like notepad, then FTP it back (again in binary).*

| Post-Installation Steps

Secure the SQL Performance Analyzer

- Secure the SQL Performance Analyzer with the external security manager of your choice
 - Broadcom Top Secret (TSS)
 - Broadcom ACF2
 - IBM Resource Access Control Facility (RACF)
- The service is protected by the following System Authorization Facility (SAF) resource:
 - CLASS: DTCMAPI
 - RESOURCE: SQLPA

Refer to [documentation](#) for more details on Securing the SQL Performance Analyzer.

Post-Installation Steps

- Update JCL Template - Tailor the 'template.jcl' file to meet the site requirements.
 - {jobcard} - A valid jobcard for your site
 - DTCM_SQLPA_PATH - The USS directory where the TAR file was extracted.
 - DTCM_SQLPA_PORT - Use any available Listener Port number of your choice. Default value is 10888.
 - JAVA_HOME - The USS directory of your 64-bit Java Runtime Environment installation,
For example: `JAVA_HOME=/sys/java64bt/v8r0m0/usr/lpp/java/J8.0_64`

```
. 000038 //JAVA EXEC PROC=JVMPRC86,PARM='+D' .
. 000039 //STDOUT DD SYSOUT=* .
. 000040 //STDERR DD SYSOUT=* .
. 000041 //STDENV DD * .
. 000042 # DTCM_SQLPA_PATH, DTCM_SQLPA_PORT, JAVA_HOME .
. 000043 DTCM_SQLPA_PORT=10679 .
. 000044 JAVA_HOME=/sys/java64bt/v8r0m0/usr/lpp/java/J8.0_64 .
. 000045 DTCM_SQLPA_PATH=/CA12/u/users/datacom/installs/sqlpa .
. 000046 DTCM_CLASS=DTCMAPI .
. 000047 .
. 000048 export JAVA_HOME .
. 000049 export DTCM_SQLPA_PATH .
. 000050 export PWD=${DTCM_SQLPA_PATH} .
. 000051 cd $PWD .
. 000052 .
```

Start and Stop Service

- Start the Service
 - Submit the modified JCL deck to start the SQL Performance Analyzer service
 - Point the browser to `http://<hostname>:<port>` to log in
- Stop the Service
 - Use STOP command to stop/terminate the SQL Performance Analyzer service

EOS Announcement: August 31, 2022

← End of Service Announcement for Datacom/AD for z/OS 14.0 and 15.0

Notification Id

18792

Last Updated

31 August 2021

Initial Publication Date

31 August 2021

August 2021

To: Datacom/AD for z/OS Customers

From: The Datacom/AD for z/OS Product Team

Subject: End of Service Announcement for Datacom/AD for z/OS 14.0 and 15.0

Broadcom is continually working to improve our software and services to best meet the needs of our customers. In an email your written notification that we are discontinuing technical support for Datacom/AD for z/OS 14.0 and 15.0 and more effectively focus its resources and add value to the next release of Datacom/AD for z/OS. After August 31, 2021, the end of your current maintenance term.

At this time, we encourage you to plan for the migration to Datacom/AD for z/OS 15.1 S2101 as soon as possible. For more information on Datacom/AD for z/OS, please visit the Datacom pages at [Support](#).
