To: CA Data Content Discovery Customers
From: The CA Technologies Data Content Discovery Product Team
Subject: Introducing First Increment of features for Incremental Release Program for
CA Data Content Discovery Version 3.0 INC00

On behalf of CA Technologies, a Broadcom Company, we appreciate your business and the opportunity to provide you with high-quality, innovative software and services. As part of our ongoing commitment to customer success, we regularly release updated versions of our products. Today, we are pleased to announce the first increment of new features and maintenance for CA Data Content Discovery Version 3.0.

New features for the first increment of CA Data Content Discovery Version 3.0 include:

- An updated product repository, providing higher performance and reduced storage impact, while providing support for future planned features, reports and integration.
- A utility to migrate CA Data Content Discovery Version 2.0 data into the CA Data Content Discovery Version 3.0 repository. (Customers on CA Data Content Discovery Version 3.0 initial release do not need to migrate.)
- A new tool called Expression Builder, which enables customers to better match internal security policy definitions of sensitive data classes, providing the ability to create custom classifier expressions, as well as full support for logic 'AND' and 'OR' conditions.
- New automated scan capabilities designed to reduce manual intervention from a dedicated resource. The 'Autoscan' function provides a constantly evaluated policy that can automatically include new datasets matching policy criteria. Customers can analyze access to sensitive data by Group or Role, making it easier to understand Least Access risk and aid in satisfying auditors.

The CA Incremental Release Program is a customer-interactive delivery model where new product features are developed and released using the Agile development methodology. CA's development teams work closely with customers to create product features for rapid implementation. Rather than waiting for a list of features to be completed before making a new product release available, we are working with customers to release new features incrementally, as we complete them. CA will support incremental releases in accordance with CA's [Incremental Release Program – Support Policy and Terms](#).

If you are interested in participating in the Incremental Release program for CA Data Content Discovery Version 3.0, please review CA's [Incremental Release Program – Support Policy and Terms](#) and contact the Product Marketing Manager, Tom Melzer at Thomas.Melzer@broadcom.com or 1-630-300-5267 to discuss the customer requirements recommended for participation. While participation in the Agile development process is not mandatory, CA recommends that customers implementing a release during the Incremental Process participate to ensure that they are kept up to date with all communications pertaining to the release.

At the conclusion of the Incremental Release program, all of the new features and maintenance introduced during the program will be rolled into a 'complete' release which is supported under CA's [standard support policy](#).

For detailed information concerning this release, current support information, and the latest technical bulletins, please visit the CA Data Content Discovery product page at <https://support.ca.com/> and DocOps.ca.com.

You can download your copy of CA Data Content Discovery online at <https://support.ca.com/> where you can also utilize CA's case management system. To install your product, follow the installation procedures for your product at DocOps.ca.com. If you have any questions or require assistance, contact CA Customer Care online at <http://www.ca.com/us/customer-care.aspx>,

Should you need assistance in understanding these new features, or in implementing this latest release, CA Services and/or services partners can help. For information about how these service experts can help you, contact your CA account representative. To connect, learn, and share with other customers, join and participate in our CA Data Content Discovery Community at <https://communities.ca.com/>.

For information on Product Education, please visit us [here](#) and select the training you are looking for. We update courses based on functional impact as well as high-demand; therefore, courses created from previous releases may apply to the current release.

Please review the CA End of Service/End of Life Policy within the 'Working with CA Support guide' available at <https://support.ca.com> by navigating to the Support Policies link.

Thank you again for your business.
