

End of Service Announcement

CA LDAP Server for z/OS

(a component of Mainframe Security, Identity Suite and Privileged Identity Manager products)

December 2015

To: CA LDAP Server Users
From: The CA Technologies LDAP Server Product Team
Subject: End of Service Announcement for CA LDAP Server for z/OS Version 14.0

CA Technologies is continually working to improve our software and services to best meet the needs of our customers. In accordance with the CA Support Policy and Terms (<https://support.ca.com/iri/portal/anonymous/phpsupcontent?contentID=213326>), please consider this email your written notification that we are discontinuing support for CA LDAP Server Version 14.0 beginning June 30, 2016. This will allow our Development organization to more effectively focus its resources and add value to the next release of CA LDAP Server. CA LDAP Server is an optional component found in many Mainframe Security, Identity Suite and Privileged Identity Manager products.

At this time, we encourage you to plan for the migration to CA LDAP Server Version 15.0 or Release 15.1, whichever release corresponds to your currently supported product release as soon as possible, so you can take full advantage of the features and enhancements this release has to offer. For information on CA LDAP Server, please visit the product pages at CA Support Online (<https://support.ca.com>).

As CA Technologies would like to make your upgrade to CA LDAP Server as straightforward as possible, we are offering the following:

- A no-charge software upgrade from Version 14.0 to Version 15.0 or Release 15.1 as long as you have an active maintenance contract for your CA product.
- Documentation to help you prepare for your upgrade to the latest release can be viewed on the CA LDAP Server product page at CA Support Online (<https://support.ca.com/>).

Your success is very important to us, and we look forward to continuing our successful partnership with you.
