

# PPM & POWER BI – BREAKING BARRIERS TO DATA TRANSPARENCY

MATTHEW PALICKI, PMP, CSM  
PROJECT PORTFOLIO MANAGER, STRATEGY & INTEGRATION OFFICE

22-JUNE 2018

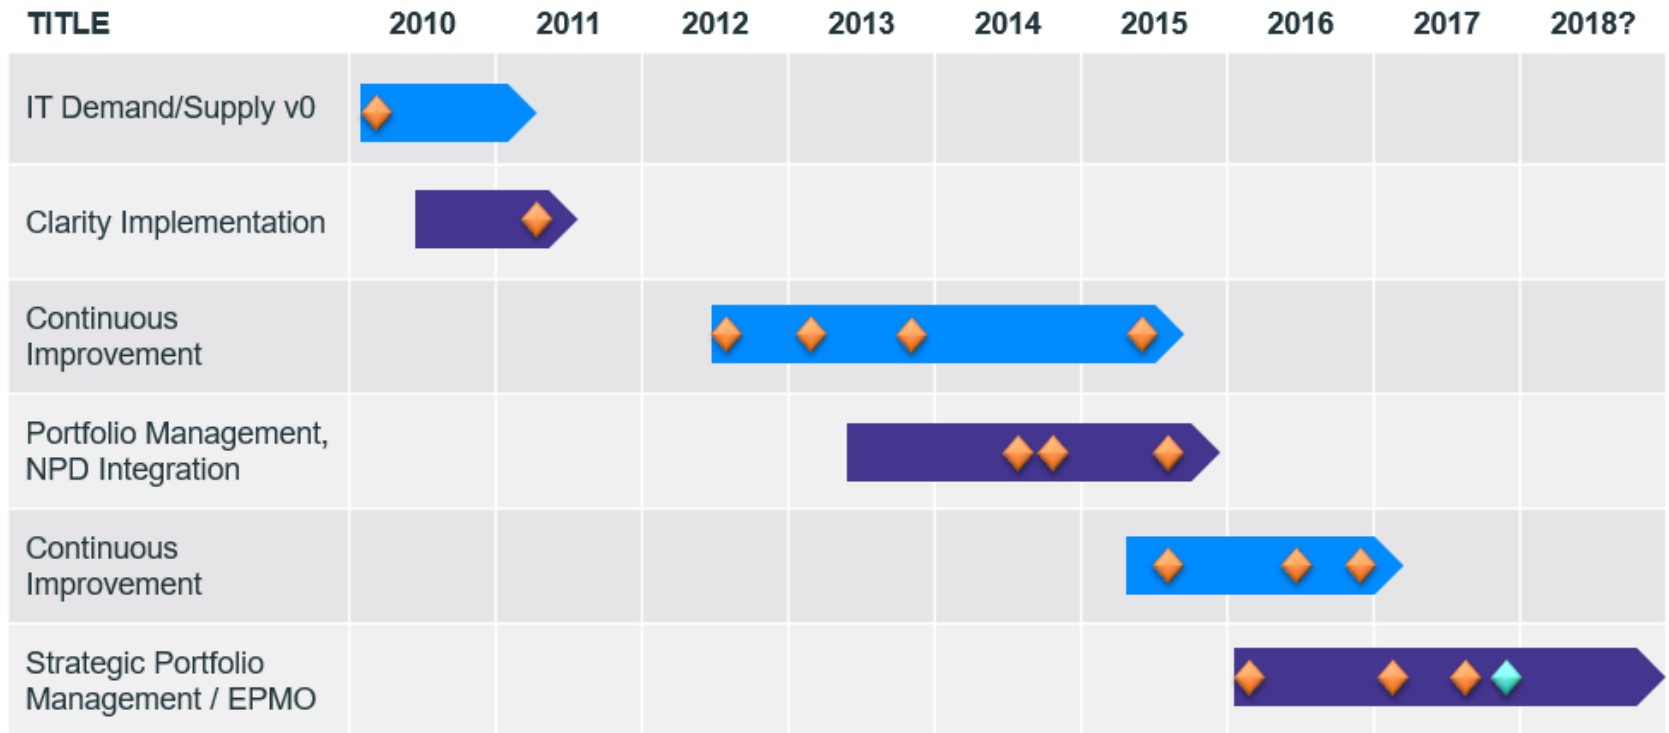

# About O-I, Inc.

Owens-Illinois is one of the world's leading glass container manufacturers, it has more than a century of experience crafting pure, sustainable, brand-building glass packaging for many of the world's best-known food and beverage brands. The company is specialised to supply high quality glass packaging for beer, wine, spirits, food, non-alcoholic beverages, cosmetics and pharmaceuticals.

# The Challenge

A steadily growing group of stakeholders is depending on the data in CA PPM to make decisions on how we will leverage project resources to successfully execute the enterprise strategize and achieve our targets.

The data needs to be accessible, intuitive, relevant, fast, and tell a compelling story that can produce actionable outcomes

# Many Mechanisms for Disseminating Data

Like many CA PPM customers, O-I leverages a variety of mechanisms to provide stakeholders insights into PPM data. Each comes with its own set of challenges...

- Object- and query-based portlets
- Jaspersoft reports and dashboards
  - Ad hoc and custom studio developed
- OOTB reports (Time, Resource Management)
- Excel exports
- Project Status Reports (New UX)
- **PowerBI with Odata Connector**
  - <https://docs.ca.com/ca-ppm-saas/15-3/en/administration/configure-the-data-warehouse-and-advanced-reporting-domains/configure-odata-access-to-the-data-warehouse>
