

# EM DevXchange 11 & 12<sup>th</sup> May 2016

## CA Spectrum Jaspersoft Integration

Nagesh Jaiswal  
Principal Product Manager

Kiran Diwakar  
Director, Product Management

## Overview

- Spectrum 10.1.1 release enables integration with JasperSoft reporting server
- Supports 6 Out Of the Box Jasper reports
- Supports Availability Domain (for ad-hoc reporting)
- Support limited only to Jaspersoft deployment on Windows platform

## Spectrum Reports Help Answer the Following Questions:

- What are the devices with the most overall alarms?
- What are the most frequently occurring alarm types?
- What are the devices with the most overall alarms ?
- What are the devices with the most overall alarms in a group?
- What are the frequently occurring alarm types on a device?
- What are the most common alarms?

## Benefits of Jaspersoft vs BOXI

- Simpler Installation and Configuration
- Smaller Footprint
- Easy to Schedule Reports
- Flexible Scheduling Options
  - recurrence
  - output options
  - notification options

# Spectrum Reports

CA Spectrum 10.1.1 improved reporting by implementing JasperReports Server

- Integrated, intuitive, web-based reporting solution
  - Alarms
  - Asset, Availability, Response Time, Change Management Reports will be implemented in upcoming Spectrum releases
- Automated and Advanced Grouping Analysis
  - User-definable groups
- Maintain & Use
  - Web-based access to reports
  - Automated Report Creation
  - Automated Report Distribution (PDF, Word, Excel)

## List of Available Reports

- Reports/All
  - Alarm Activity By User
  - Top N Most Common Alarms-All
  - Top-N Devices and Modules with Most Alarms –All
- Reports/Group
  - Top-N Devices and Models with the Most Alarms-Group
  - Top-N Most Common Alarms-Group
- Reports/Individual
  - Top-N Most Common Alarms-Selected Devices and Models
- Availability, Usage domain will be available which enables Ad-hoc reporting

# Integration with JasperSoft

- New Integration page for JasperSoft integration in Administration Page
- Link to launch Jasper Console

The screenshot shows the 'Jasper Integration' page in the CA Spectrum OneClick Administration interface. The page has a navigation menu on the left with options like 'Start Console', 'WebClient', 'Client Details', 'Client Log', 'Administration', 'GIS View', 'Jasper Console', 'Top Impacting Outages', 'BI Launch Pad', and 'Service Dashboard'. The main content area is titled 'Jasper Integration' and contains a description: 'This page allows you to configure and activate the integration with Jasper Server. Prior to configuring the integration, you must install and configure a Jasper server to integrate with SPECTRUM. Please refer to SPECTRUM documentation before proceeding.' Below this is the 'Jasper Server Parameters' section, which includes fields for 'Jasper Server Hostname' (sriko01-w2k8vm2.ca.com), 'Jasper Tomcat Port' (8080), 'Jasper Admin User' (superuser), and 'Jasper Admin Password' (masked with dots). There are also radio buttons for 'Jasper Integration' (Enabled/Disabled). A 'Save' button is located at the bottom of this section. The 'Redeploy' section at the bottom contains a 'Redeploy' button and a description: 'Redeploy the reports to repair the existing report or to update to a newer version.'

### Jasper Integration

This page allows you to configure and activate the integration with Jasper Server. Prior to configuring the integration, you must install and configure a Jasper server to integrate with SPECTRUM. Please refer to SPECTRUM documentation before proceeding.

#### Jasper Server Parameters

Specify the parameters used to communicate with the Jasper server

Jasper Server Hostname:

Jasper Tomcat Port:

Jasper Admin User:

Jasper Admin Password:

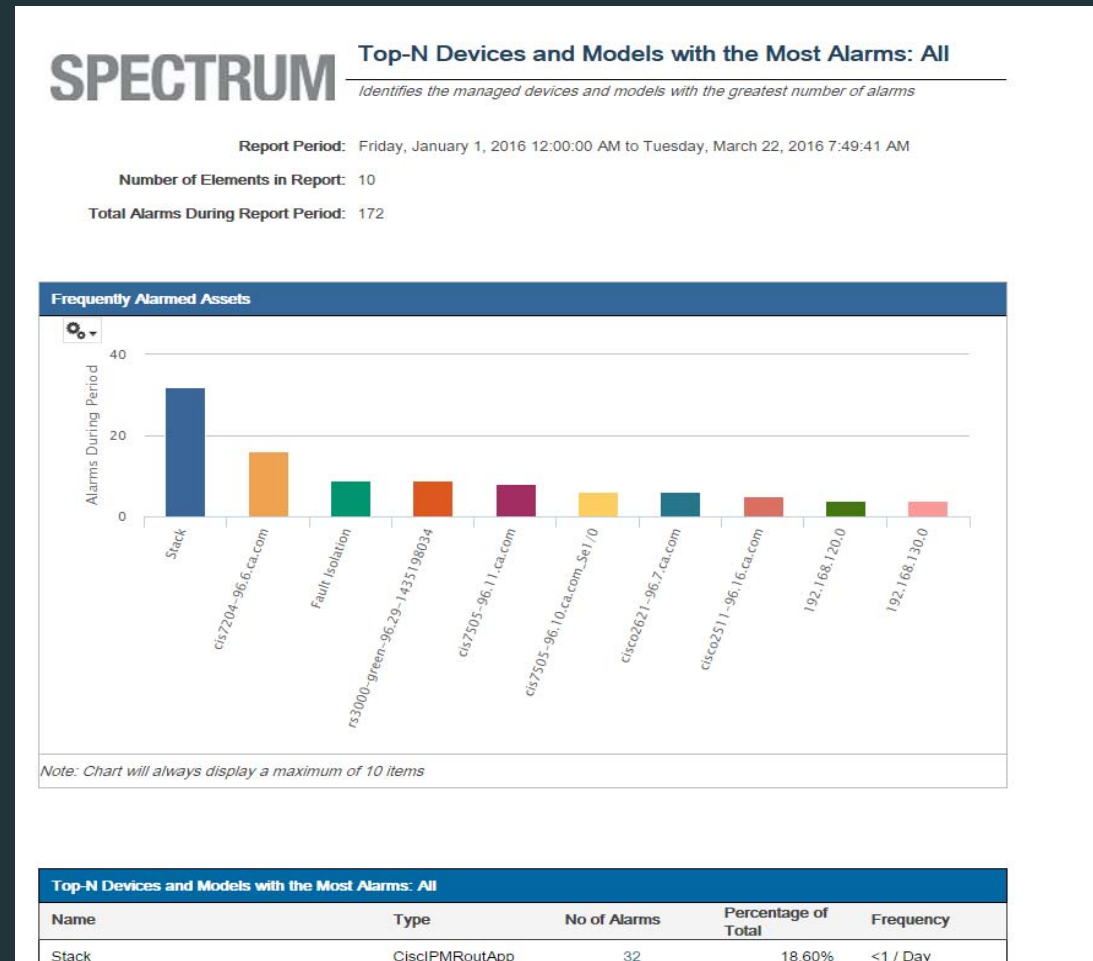

Jasper Integration: ☒ Enabled ☐ Disabled

#### Redeploy

Redeploy the reports to repair the existing report or to update to a newer version.

# Sample Spectrum Alarm Report

- Displays a list of managed devices and models with the most overall alarms
- A sub report provides details for each of the alarms for a selected device or model

# Sample Alarm Activity by User Report

**SPECTRUM**

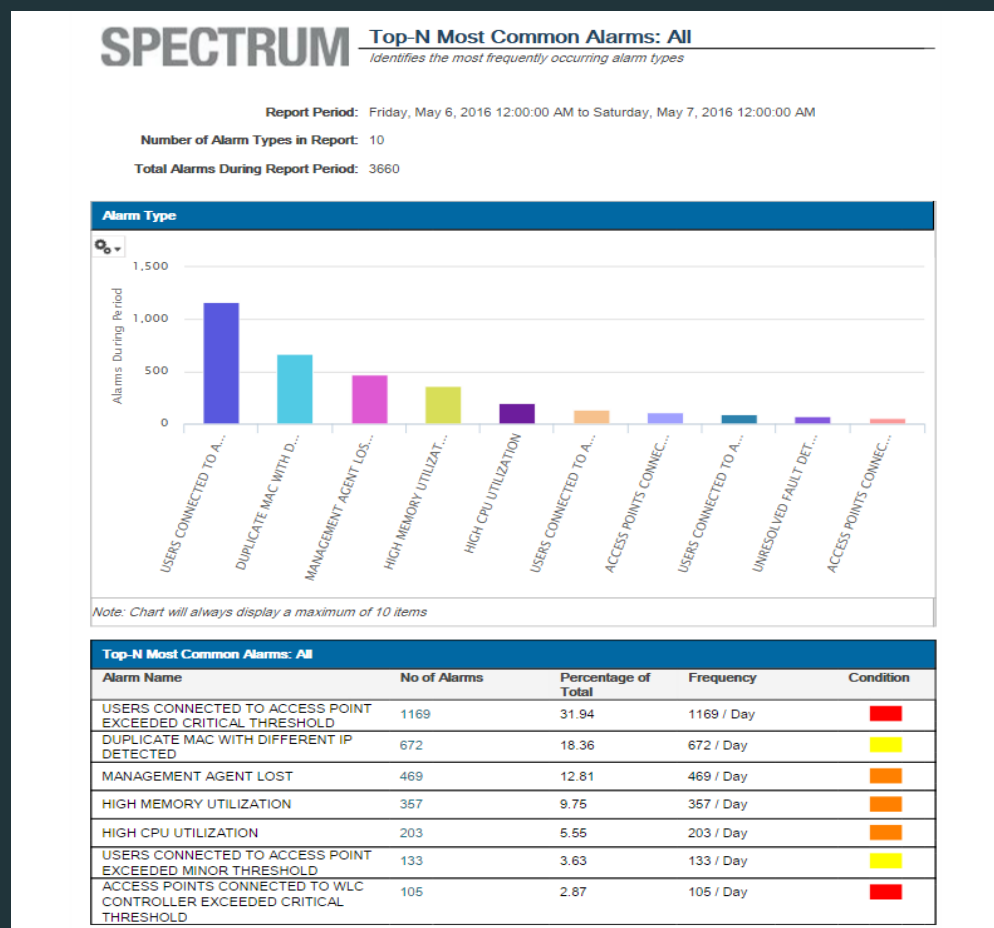

## Alarm Activity by User: All

*Count of alarm activities performed by each user*

Report Period: Friday, May 6, 2016 12:00:00 AM to Saturday, May 7, 2016 12:00:00 AM

| Alarm Report - Recovery Activities by User |             |                  |                 |                 |              |                |
|--|-------------|------------------|-----------------|-----------------|--------------|----------------|
| User Name                                  | No. Cleared | No. Acknowledged | No. Assigned By | No. Assigned To | No. Ticketed | Total Activity |
| Administrator                              | 0           | 0                | 2               | 0               | 0            | 2              |

# Sample Top-N Most Common Alarms Report

# Sample Top-N Devices and Models with the Most Alarms Report

# Sample Adhoc Reporting

The screenshot displays the 'Ad Hoc View\_DevX' interface for the 'Domain: SpectrumDo...'. The left sidebar lists available fields: Availability, OutageKey, StartTime, EndTime, OutageDurationHHMM..., ModelName, OutageType, OutageTypeID, Notes, AdditionalModelInform..., and DeviceOutage. The main area shows a table with columns 'StartTime', 'EndTime', and 'OutageType'. The table is grouped by 'ModelClass'. The data rows show multiple entries for 'Apr 13, 2016' with 'Initial' outage types.

## Upcoming Reports & Value

- Who are the most common vendors? What's the infrastructure's availability?
- What assets are deployed in the IT infrastructure?
- What firmware versions exist in the network?
- What's changed in the infrastructure?
- What outages occurred in the past?
- Where are the unused ports?
- What are the least available managed assets?
- What are the most problematic managed assets?

# Demo

## What's New in 10.2?

- Out of box reports for Alarms, Asset, Availability, Events and SLA
- Adhoc reports for Asset, Events, Alarm and Alarm Activity
- Linux OS Support for JasperSoft
- Single Sign on
- Automated install
- LDAP integration
