**Reclaiming space in the Symantec Data Loss Database**

1. If you are using a single-tier deployment of Symantec Data Loss Prevention, The file location of DLP_Lobspace_reclaim.sql is c:\SymantecDLP\Protect\install\sql folder.

2. On the computer that hosts your Oracle 11g Standard database, open a command shell and navigate to the location of the DLP_Lobspace_reclaim.sql file.

3. Log in to SQL*Plus as the Oracle sysdba: sqlplus sys/ <password> as sysdba

4. At the SQL*Plus prompt, run the utility: @@DLP_lobspace_reclaim.sql

```
SQL> @@DLP_lobspace_reclaim.sql

Package created.

Package body created.

This script will alter your database and should only be run on certain
supported versions of Oracle, and under specific conditions. It is very
important that you read the documentation to ensure all requirements are
met before this script is executed.

Do you want to continue? Y / N : y
```
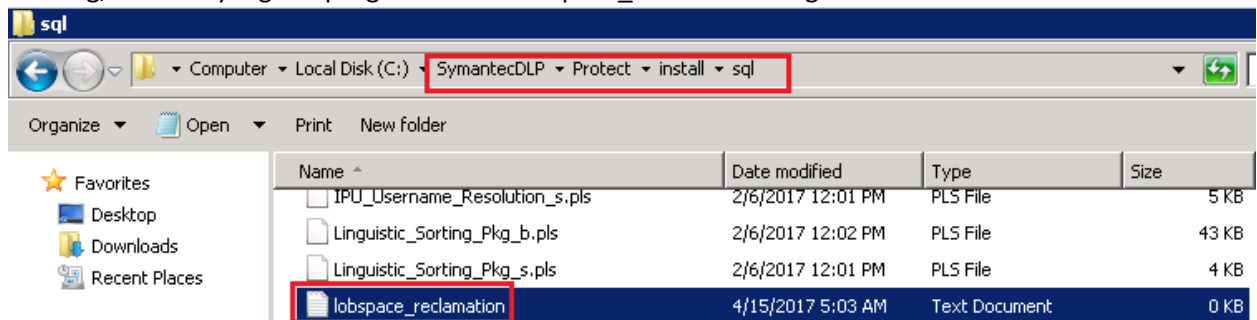

5. The database space reclamation utility may take some time to complete its process. While it is running, the utility logs its progress to the lobspace_reclamation.log file.

6. Task is completed

```
