6 Q & A

What is CA Single Sign-On?

One Login = Access to Multiple Applications

Regardless of what device is used, or where applications reside – on-premise or in the cloud

But it is much more than just one login...

AUTHENTICATION MANAGEMENT

- Broad authentication credential support
- User directory mapping and chaining
- Step-up authentication, levels, fall backs, password services

IDENTITY FEDERATION

- Browser and document-based federation
- Social media registration and login
- Standards-based (SAML, WS-Fed, OAuth)

CENTRALIZED ADMINISTRATION

- Centralized user, group and policy administration
- User self-service
- Delegation of permissions

POLICY-BASED AUTHORIZATION

- Flexible access policies based on user, time, location, etc.
- Risk-based authorization
- Enterprise scalability (100M+ users)

SINGLE SIGN ON

- Cross-domain single sign-on
- Security zones and single logout
- Session Assurance to avoid session hijacking

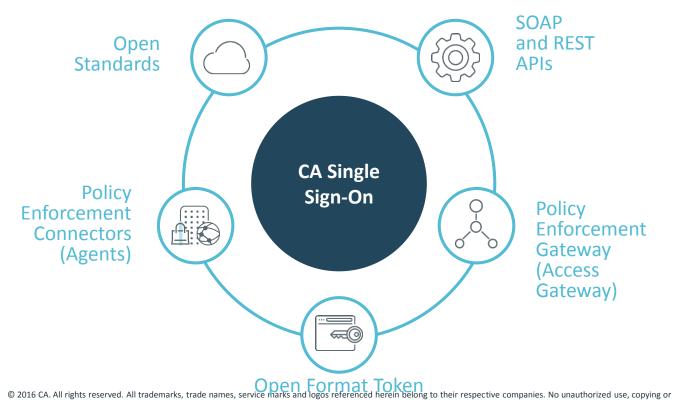

AUDITING AND REPORTING

- Consolidated user activity tracking
- Auditing to files or RDBMS
- Configuration of events-based audit

Flexible Solution to Meet Many Needs in a Single Deployment

Product Value

Business Problems Addressed

- Controlling access to information resources
- Reducing cost of managing access
- Enabling end user productivity

Increasing Product Value

More application access use cases

Lowering the TCO by simplifying the solution

Improving the solution's security

Business Problems Addressed

- Controlling access to information resources
- Reducing cost of managing access
- Enabling end user productivity

Value delivered in 12.6

More application access use cases

Lowering the TCO by simplifying the solution

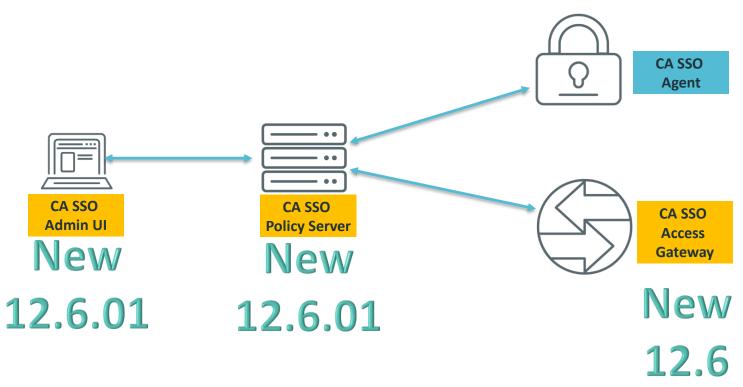

Improving the Security

Business Problems Addressed

- Controlling access to information resources
- Reducing cost of managing access
- Enabling end user productivity

Components in this Release

Federation Enhancements – Simpler Certificate Mgmt

Feature Value Certificate expiration details Improved manageability Secondary validation certificates for Reduce risk of application access outage partnerships Ability to update certificates without Seamless application availability deactivation 2 User Identification 4 Configure AuthnContext SO and SLO Signature and Encryption 6 Applicati ocessing Signing Private Key Alias: defaultenterpriseprivatekey 🛊 🌑 Expires on: Nov 20, 2025 04:46 AM EST Signing Algorithm: RSAwithSHA1 Signing: Sign Authentication Requ Sign ArtifactResolve Verification Certificate Alias: defaultenterpriseprivatekey Expires on: Nov 20, 2025 04:46 AM EST Verification: Secondary Verification Certificate Alias: dsig Expires on: Nov 17, 2025 07:48 AM EST Require Signed ArtifactResponse SLO SOAP Signature Options: Sign Neither

Federation Enhancements – Simpler Configuration

Feature Value

- Support Assertion Consumer Service (ACS) URL in the authentication request
- ✓ ACS URL is needed by the Identity Provider in a SAML partnership. Providing this URL in the authentication request simplifies the ability for CA SSO to act in a Service Provider role in a federated partnership

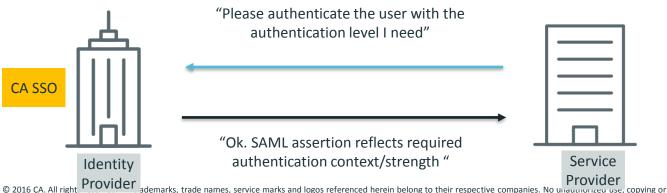

Federation Enhancements – Simpler Configuration

Feature

Value

Support for Dynamic Authentication

- ✓ A single configured federation partnership can support different authentications methods and strengths so there are fewer federation partnership configurations to manage.
- ✓ The Service Provider can achieve higher security posture

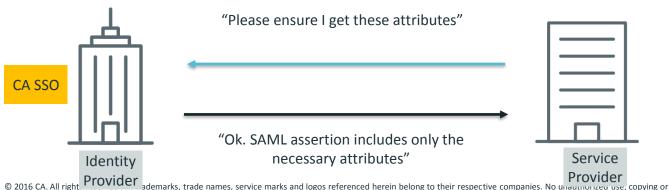

Federation Enhancements – Improved Usability & Security

Feature Value

Attribute Consuming Service Index

✓ Specifies the index of an attribute group that the SP-side application requires from the Identity Provider. The SP-side application might need specific user attributes, for example, email and phone number. So the IDP provides just the necessary attributes

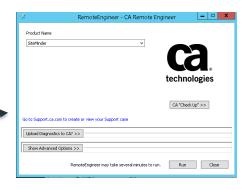

Management Enhancements

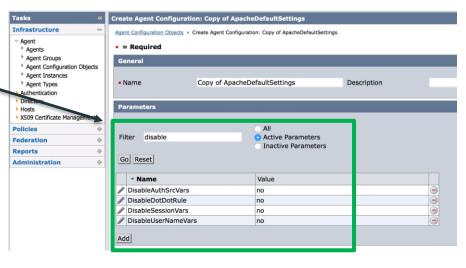

Feature

- CA Remote Engineer
- Improved tracing and log rotation
- ACO Search in the Admin UI

Value

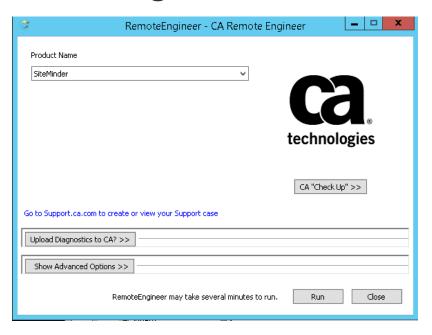

- ✓ Accelerated troubleshooting
- Improved ability to capture critical data for troubleshooting
- Reduces cost and simplifies management of CA SSO agent configuration

CA Remote Engineer – Common Diagnostics

CA Remote Engineer

Common Diagnostic Framework

- Runs up to 26 System/OS diagnostic commands
- Runs product diagnostics commands
- Gathers Diagnostic Data
- Link to CA Support Site to open issue
- Available for 56 CA Products
- Option to Send Diagnostics to CA

■ Example Windows Diagnostic commands → Preparing to execute diagnostic command: cscript scripts\caprodreg.vbs
Preparing to execute diagnostic command: ipconfig /all
Preparing to execute diagnostic command: netstat -a -o -n
Preparing to execute diagnostic command: net file
Preparing to execute diagnostic command: net share
Preparing to execute diagnostic command: cmt /c set
Preparing to execute diagnostic command: systeminfo

Platform Enhancements

Session Store

- ✓ 64 Bit application
- ✓ Improved Performance
- ✓ Red Hat 7
- ✓ Java 1.8

- ✓ 64 bit application
- ✓ Improved Performance
- ✓ Simpler installation and Configuration of Enhanced Session Assurance
- ✓ Improved Session Store algorithm (significant performance boost)
- ✓ Policy Store Integrity Tool
- ✓ Improved system diagnostics
- ✓ Red Hat 7
- ✓ Java 1.8

CA SSO Access Gateway

- √ 64 Bit application
- ✓ Improved Performance
- ✓ Safari browser for O365
- ✓ Post preservation flows for Enhanced Session Assurance
- ✓ Red Hat 7
- ✓ Java 1.8

12.6 Performance Improvement

Policy Server/SDK transactions throughput

- based on a mix of authentication, validation, authorization transactions in ratio 1:3:20

	Windows	RHEL6	RHEL7
FIPS - Compatible	22%	139%	86%
FIPS - Only	9%	115%	65%

Federation transactions throughput across multiple IDP and SP profiles

	Windows	RHEL6	RHEL7
Federation	14%	26%	26%

Windows platform comparison – SSO 12.6 vs SSO 12.52SP2 on Windows 2012R2 Linux RHEL6 platform comparison – SSO 12.6 vs SSO 12.52SP1 on RHEL 6 Linux RHEL7 platform comparison – SSO 12.6 on RHEL7 vs SSO 12.51SP1 on RHEL6

Important Considerations

- Any custom code must be complied for 64 bit environment
- Features not <u>yet</u> available
 - RSA SecurID auth with Red Hat 7 Policy Server RSA did not support RH7
 - Radius can be used & we will add support for SecurID at earliest point possible
 - CA APM test planned for CA SSO 12.6 with CA APM for CA SSO r13.0
- Global Delivery Packaged Work Product Roadmap
 - https://support.ca.com/phpdocs/7/5262/5262 pkgd work product platform roadmap.pdf

Roadmap

Certification of	on Platform	with Single Sign-On	Roadmap Date
Advanced Certificate Authentication for CA Single Sign-On	Windows 2012 R2	R12.6	30-Nov-2016 Delivered on 30-Nov-2016
Advanced Certificate Authentication for CA Single Sign-On	Red Hat Enterprise Linux 6	R12.6	23-Dec-2016

Other important information in the release notes

UPGRADE SUPPORT

- Upgrade Strategy Assessment Service
- CA Architect- Trusted Advisor
- CA Staff Augmentation

MANAGED PROJECT

- Design and Initial Environment
- Turnkey Upgrade

New Advanced Core Administration 300 Course

- 2 Day Instructor Led Training on site
- Technical configurations, advanced use cases and best practices
 - Policy Server internals
 - Sizing and tuning
 - Monitoring
 - Policy design
 - Advanced SAML
 - Securing sessions

 For Security Application Administrators, System Administrators, Application Administrators

A New Optional Hybrid Model

CA SSO and CA Identity Service

- REST interface
- OpenID.Connect

- Enhanced support for Ajax-based Web application clients
- Authentication chaining for IWA fall back to forms authentication
