# CA API Management Portfolio

Modernizing Application Architectures with APIs & Microservices

Andrés Gómez Molina
Principal Consultant API Management
Andres.gomezmolina@ca.com
November 2017

The Modern Application Architecture Model

Microservices

Build and manage microservices rapidly to modernize architectures

Manage
Orchestrate and manage API operations at scale

Monitor
Optimize API and app performance with analytics

Secure
Protect APIs from threats and vulnerabilities

Consume
Enable secure, scalable use of APIs in apps

Test | Publish
Test and publish APIs to target environments

Develop
Accelerate development with tools and SDKs

API Providers

API Consumers

Create
Build APIs and microservices with fast, automated tools

Plan
Strategize, design and prototype APIs and microservices

Discover
Help developers find and integrate APIs easily

Mobile & IoT App Development

App

Develop secure apps for mobile, cloud and IoT faster to create an agile business

Full Lifecycle API Management

Complete Portfolio for Modern Architectures

CORE PORTFOLIO

CA Live API Creator

CA API Gateways
Essentials | Enterprise | Microgateway BETA

CA API Management SaaS

CA API Developer Portal

CA Mobile API Gateway / SDKs

SOLUTIONS

API Academy

**Advanced Testing**
Service Virtualization | API Test
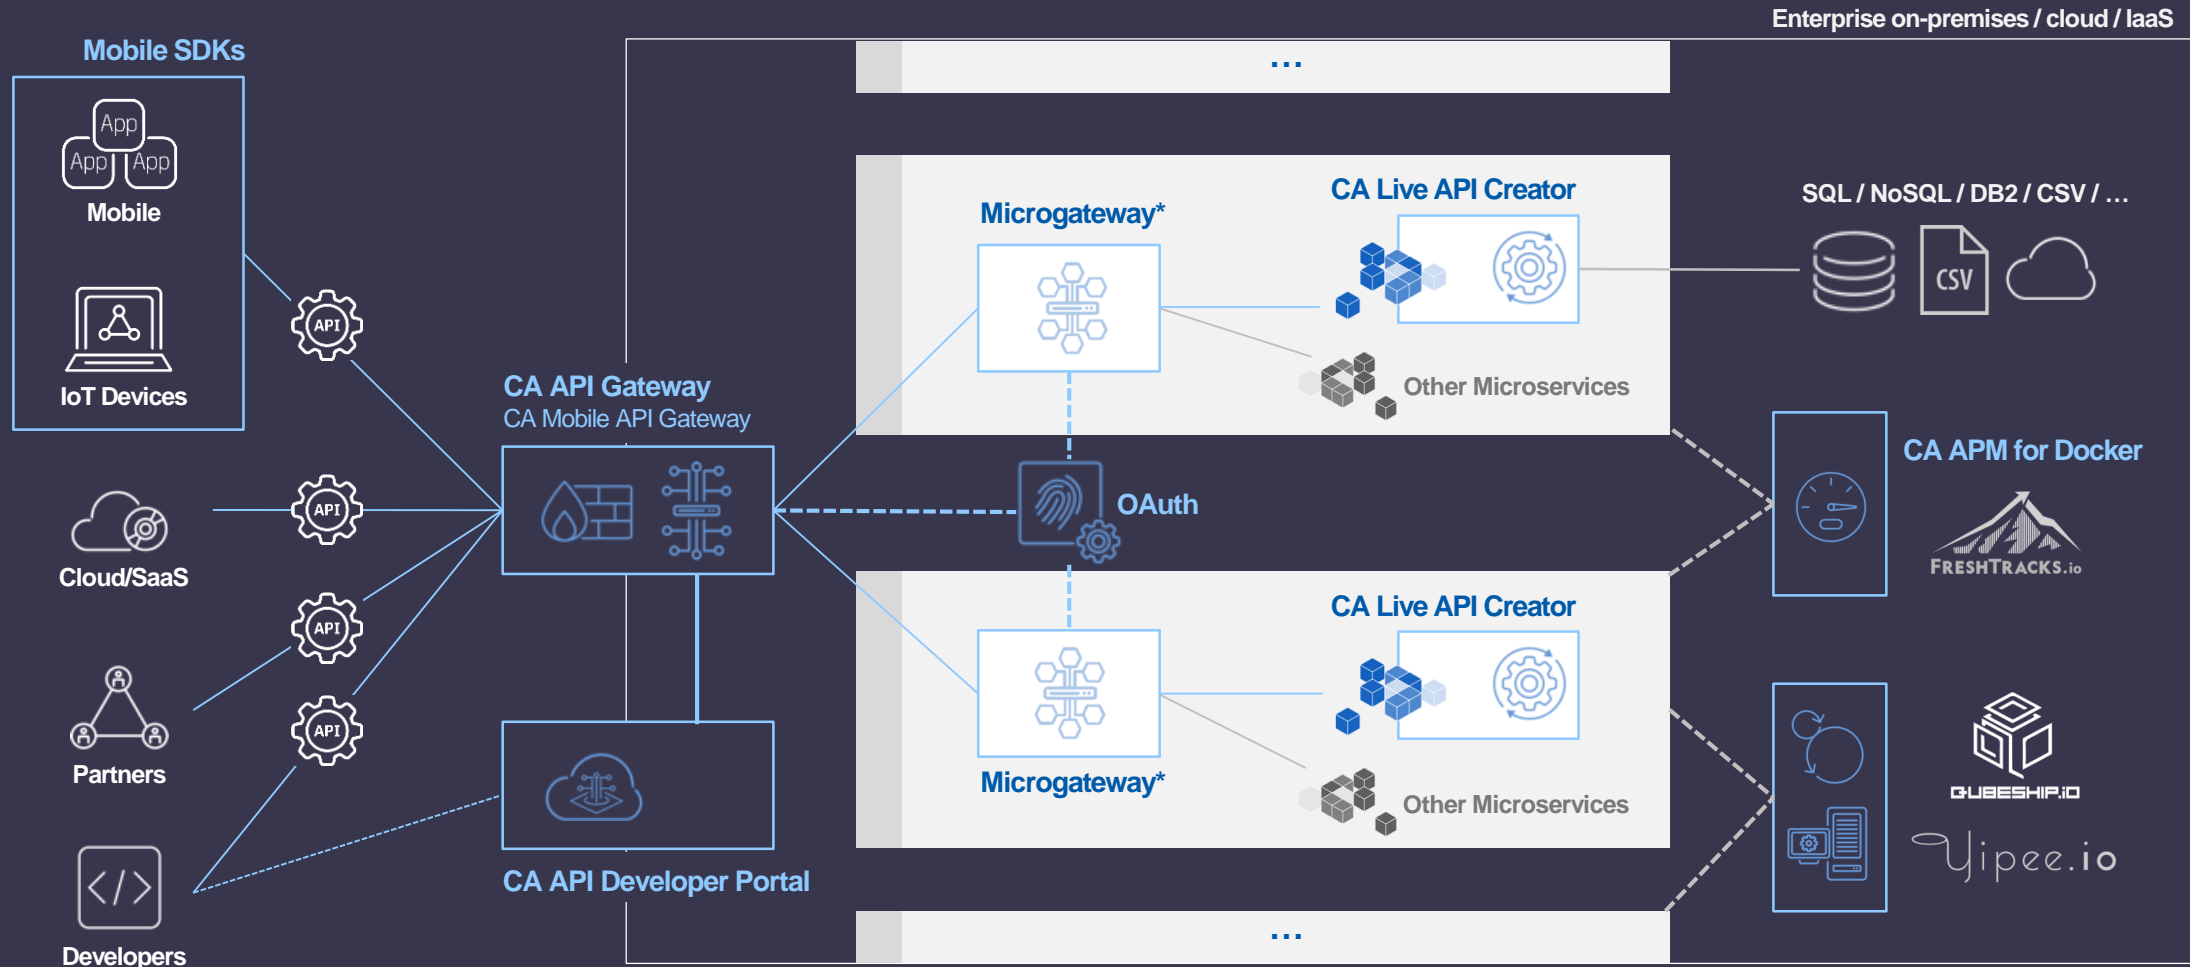

Advanced Security
Rapid App Security

QUBESHIP.iO

Yipee.io

...

* A microservices gateway product from CA is currently available in beta. FreshTracks.io, Qubeship.io and Yipee.io are CA Accelerator innovation projects.

Live API Creator Value Proposition

Super Simple to Use

*From App Creation to Data/ Systems Integration*

Extremely Fast Results

Builds/Deploys a [micro]service in < 15 minutes

Enterprise-Grade and Scale

From 200 to 2000 services - without any significant strain on the performance

Architectural Overview

CA LIVE API CREATOR

ENTERPRISE DATA

API Owners
API Developers

Business Managers

Consuming
Applications

API Creator

Data Explorer

API Server

REST API
Listeners
Timers
Reactive Logic
Database Access

REST

Messaging

CA Mobile API Gateway
CA Mobile App Services

CA Mobile API Gateway

Messaging

Create collaborative apps with secure, reliable messaging.

Learn more >

User Management

Seamlessly integrate your app with an existing enterprise user directory.

Learn more >

Private Cloud Storage

Store data in a private cloud and access it from all of your devices.

Learn more >

Pub/Sub

Create real-time, IoT-friendly apps using an MQTT-based Pub/Sub infrastructure.

Learn more >

Adhoc Groups

Create groups on-the-fly for collaborative apps.

Learn more >

Local Storage

Store data on devices with enterprise-grade encryption.

Learn more >

Fingerprint Sessions Lock

Support phone unlocking using fingerprint recognition.

Learn more >

Secure API Calls

Protect APIs with Mutual TLS and control API access on application, user and device level.

Learn more >

Authentication

Implement authentication with username/password, Facebook, Google, Twitter sign-in.

Learn more >

Second Factor Auth

Secure critical APIs with One Time Password.

Learn more >

Single Sign-On

Share user credentials between your apps without coding effort.

Learn more >

Enterprise Browser

Extend single sign on session to web applications.

Learn more >

Proximity Login
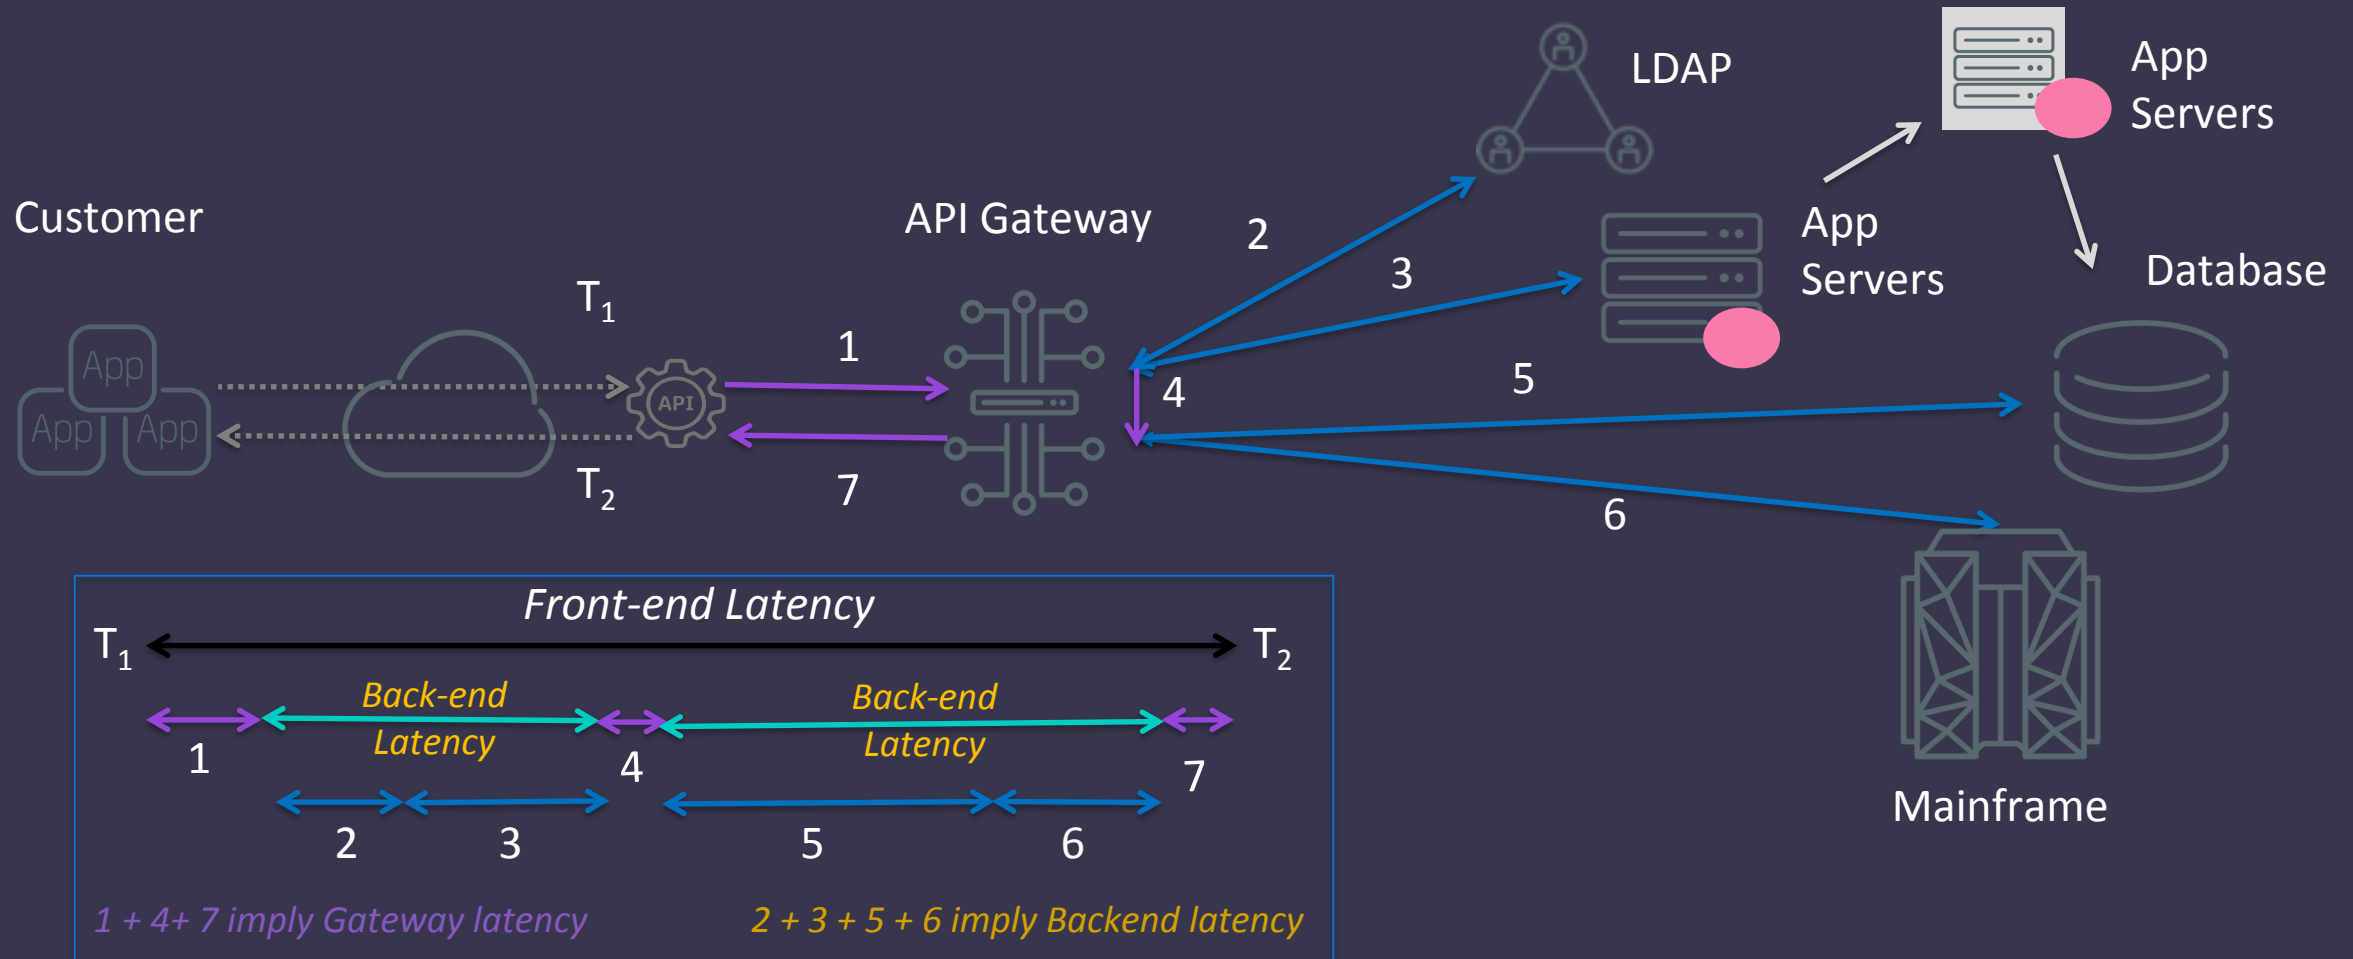

Transfer user session between devices and platforms.

Learn more >

CA Precision API Monitoring

End to End

Docker Container

App Server

API Gateway

Synthetic
Transactions

SSO   User Data Store

Mainframe

= Agente Monitorización

Understanding API Transaction Tracing (Example)

Customer use app which calls an API on a gateway (front-end). APIs policies call different back-ends including LDAP, app server, database, mainframe and etc. Now we can pinpoint the customer's transaction latency!
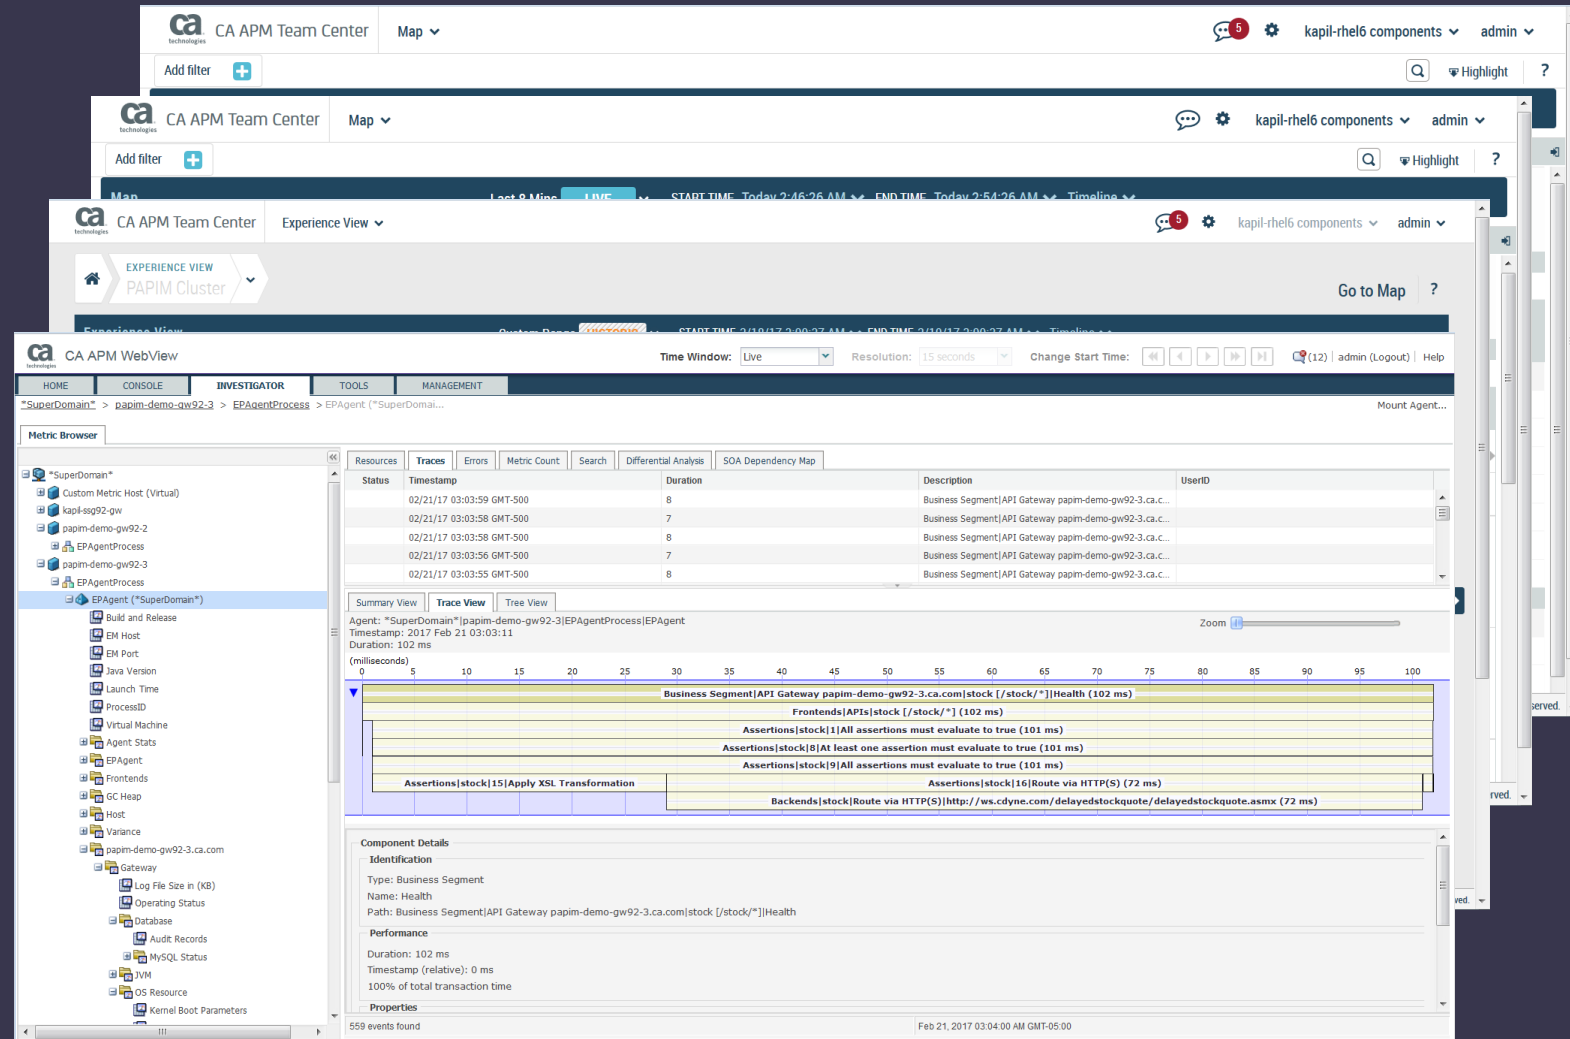

Topology Map and Transaction Tracing

Team Center exposes front-end APIs grouped by gateways & clusters with back-ends

Experience Views summarize key API metrics in a simple interface

Detailed *API transaction tracing* allows quick triage

Correlation of API traces to backend APM monitored systems show entire transaction from customer perspective
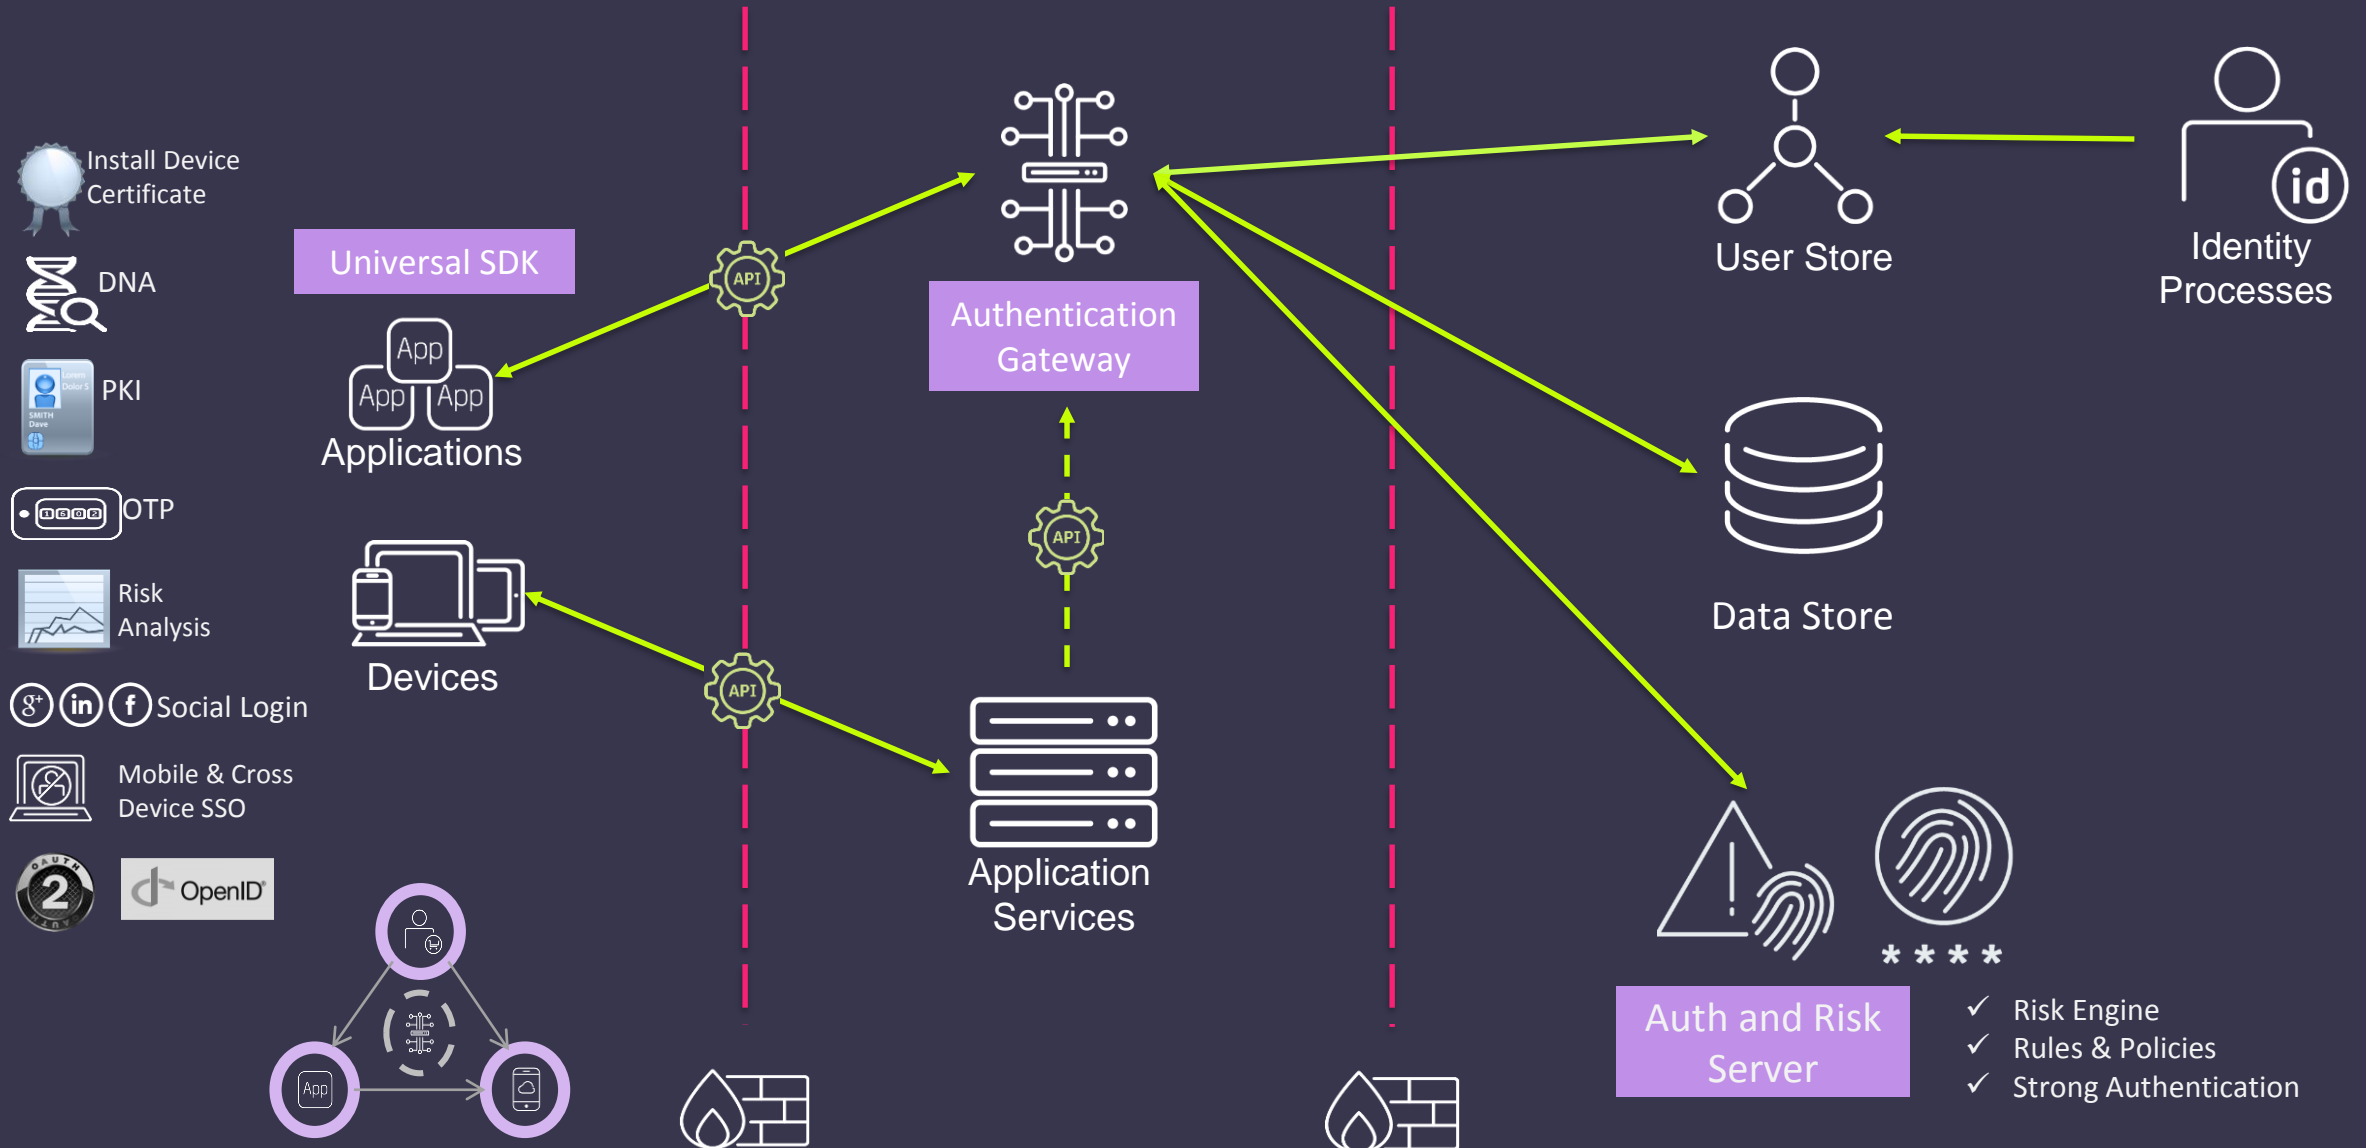

CA Rapid App Security

Introducing CA's Rapid App Security Solution

A comprehensive authentication platform for the application economy - mobile, web, IoT

- Fraud Prevention in real-time

- Robust authentication methods inclusive of contextual authentication

- Faster & convenient means to secure Apps

- Strengthen consumer confidence and enhance brand value by creating a simplified user experience
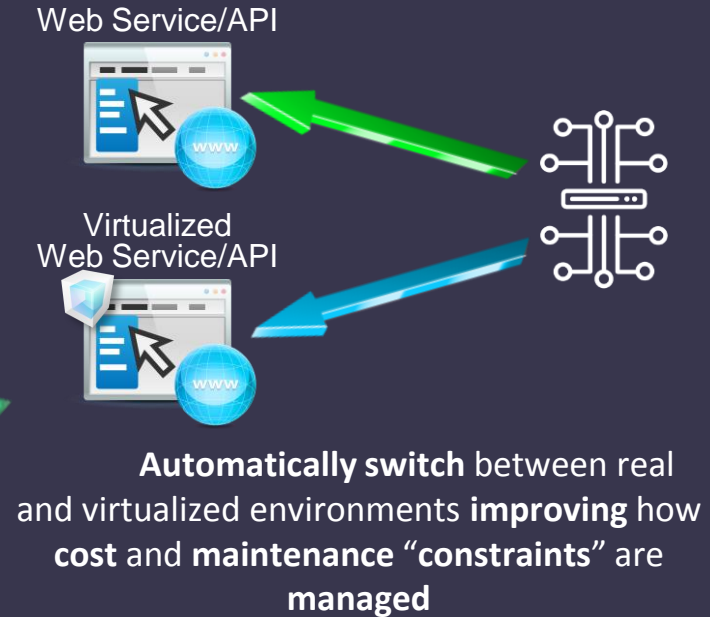

Built on CA Mobile API Gateway and CA Advanced Authentication

Rapid App Security Solution from CA

Install Device Certificate

DNA

PKI

OTP

Risk Analysis

Social Login

Mobile & Cross Device SSO

OpenID

Universal SDK

Applications

Devices

Authentication Gateway

Application Services

User Store

Data Store

Identity Processes

Auth and Risk Server

- ✓ Risk Engine
- ✓ Rules & Policies
- ✓ Strong Authentication

CA Service Virtualization

CA Service Virtualization & CA API Management

Web Service/API

Provide **developers** a **directory** of **virtual services** enabling **better** service **discovery** and **consumption, accelerating cloud and mobile app development**

Virtualized
Web Service/API

PLAN

BUILD

RUN

Automatically switch between real and virtualized environments **improving** how **cost** and **maintenance** "constraints" are managed

CRM

ORDER MGMT

SUPPLY CHAIN

ENTERPRISE SERVICES

CA Service Virtualization

Faster creation and easier maintenance of virtual services by leveraging API management data

CA API Gateway & CA Service Virtualization

DMZ

Load Balancer

MAG / MAS

CA API Gateway (Clúster activo/activo)

CA API Developer Portal

Internal Zone

Sandbox

CA Service Virtualization

Enterprise Service Bus

Backend systems and applications
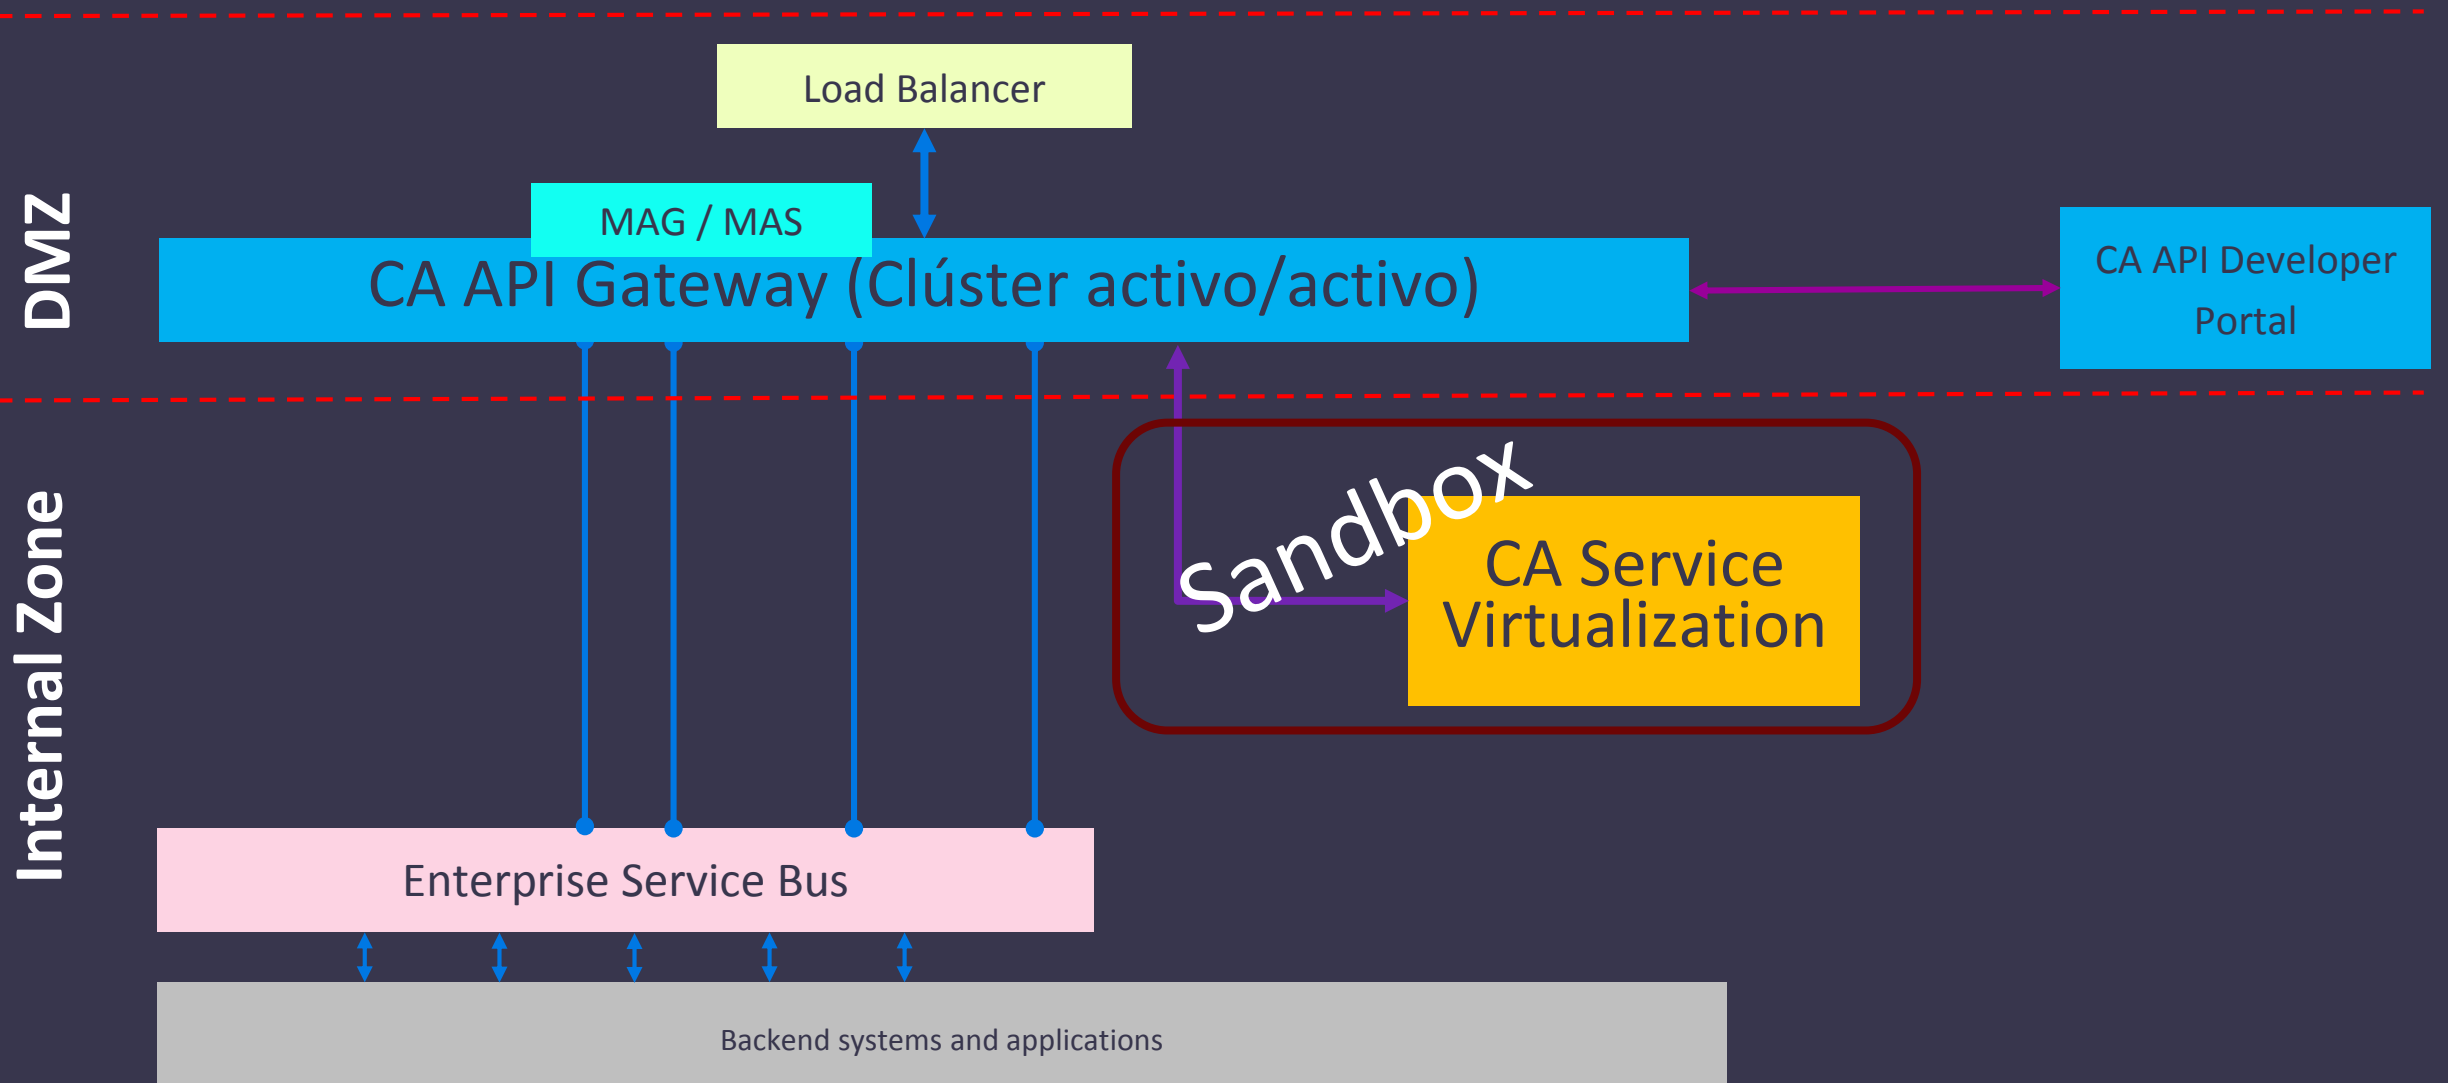

Blazemeter

Introducing CA BlazeMeter API Test
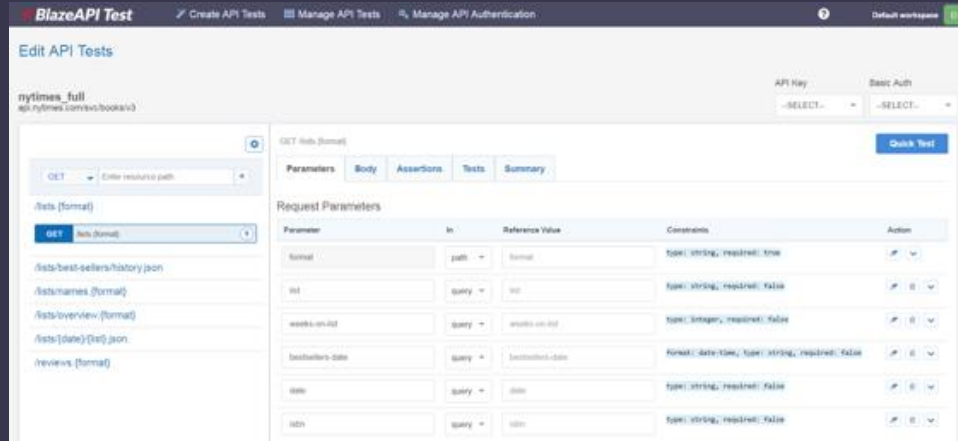

CA BlazeMeter API Test

The **only functional API testing** solution to auto-generate & execute **100s of comprehensive** API Tests per API

Challenges:

Not enough time in sprints to test APIs

Work in sprint slips as dev team can't identify / fix issues early

How We Do It:

Auto-generate 100s of API test types concurrently

Complete reporting with actionable insights

Business Results

API quality improved with comprehensive testing

Developers get more done in sprint by auto generating tests
