- Duration: 15 minutes
- 06VSR20040

PREREQUISITES

- CA Vantage™ Storage Resource Manager: Getting Started with the Mainframe Team Center - Management Interface 200 (06VSR20020)
- Understanding of basic storage management concepts
- Familiarity with z/OS

WHO SHOULD ATTEND

- System Administrators
- System Programmers
- Operators
- IT Managers

Course Overview

CA Vantage™ Storage Resource Manager (CA Vantage SRM) centrally manages complex storage environments to help ensure that critical storage assets are fully optimized, data is protected, and application outages are eliminated. Proactive, policy-based exception management automates routine manual functions to increase personnel productivity and improve service levels.

This course prepares you to work with scripts and control the event servers using Mainframe Team Center - Management interface to CA Vantage SRM.

This Course Will Show You How To:

- Describe the differences between System, Audit, Log, and Automation scripts
- Review script activity
- View scripts and control their status
