

# Why upgrade to CA Performance Management 3.1?

## The top five reasons are...

# #1 SD-WAN Assurance

Extended SDN  
monitoring expertise  
to new SD-WAN  
architectures

CA Performance Management 3.1 continues to expand visibility while reducing operational complexity of SDN architectures through new innovative monitoring of SD-WAN intelligence built on Viptela and Cisco IWAN technologies.

***“CA Technologies’ combination of Performance Management 3.1 enhanced with Virtual Network Assurance 2.1 offers one of the most scalable and comprehensive approaches to unified monitoring of performance of SD-WAN and legacy WAN technologies.”***

– Enterprise Management Associates (EMA)

# #2 Operational UI Enhancements

Part of our continued efforts to enhance the operational workflow for network teams, we are introducing intuitive visualizations such as health cards, time bars, hierarchical inventory charts and 3<sup>rd</sup> party application views.

*Operational User Interface (UI) is a set of features that quickly access problem impact and determined resolution.*

***"CA Performance Management delivers faster dashboard loading times and is much more user friendly than other products."***

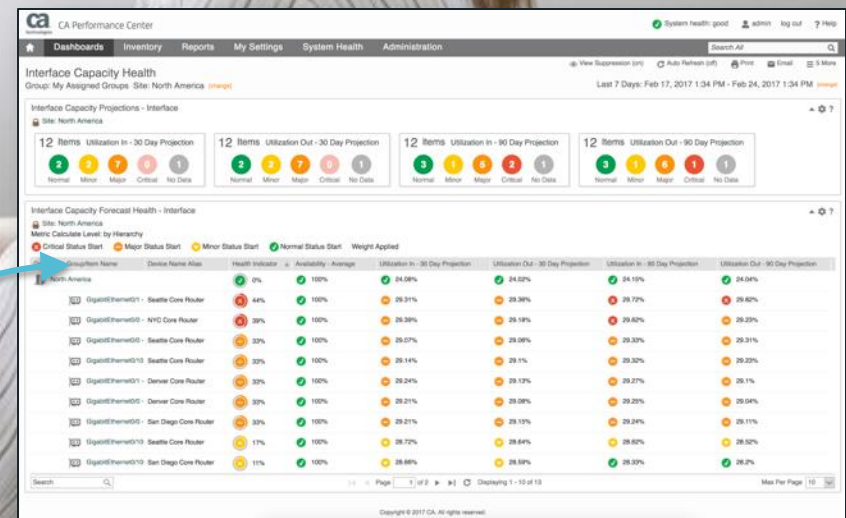

– Large Enterprise Telecommunications Services Company

Quickly understand  
infrastructure health  
for faster triage

# #3 Open API 3<sup>rd</sup> Party Interoperability

Introducing features  
to extract aggregated  
grouping metrics for  
operational  
intelligence

Easy integrations with neighboring management systems (reporting, analytics, OSS, BSS) so you get the most out of your multi-vendor, heterogeneous environments.

***"Upfront dashboard views of our multiple data centers helps catch problems before they impact the customer."***

# #4 Cisco ACI SDDC Monitoring

Increased visibility  
into Cisco Nexus  
9000 switches...

Enhanced visibility to improve triage and ensure the health of your Cisco Application Centric Infrastructure (ACI) software-defined data center (SDDC) deployments.

*"[CA Performance Management] has improved efficiency because now there is the one-stop shop where you can view all your data, instead of needing to click around in four different tools."*

# #5 Enhanced Platform Availability

Proven disaster recovery planning for uninterrupted network performance monitoring and data protection.

***"CA Performance Management has provided stability, scalability and usability to our network monitoring environment."***

- Network Engineer, Large Enterprise Financial Services Company

# CA Communities

communities.ca.com

You are not alone. Join the hundreds of CA Performance Management users from across the globe to ask hard questions and share best practices.

This community is open to all users at all levels and is constantly moderated by expert CA Performance Management staff and users to help provide timely, thoughtful answers to your questions.

## Getting Started

1. Create a profile
2. Follow the CA PM Community
3. Follow your peers
4. Search for awesomeness
