## THE APPLICATION ECONOMY IS HERE. SEIZE YOUR OPPORTUNITY.

### Why Come to CA World for Security?

You need to improve engagement with your customers and enable your employees and partners with convenient access to information, all while protecting against insider threats and external attacks. Learn how to transform your business to both enable and protect your open enterprise. CA provides flexible and scalable identity-centric security across Web, mobile, SaaS and APIs. Come hear about the latest market trends, product strategy and roadmap, customer and partner successes.

### This year's Content Area highlights:

- 25+ customer, partner & CA-led sessions covering Security
- Numerous technical deep dives (Pre-Con Ed) including CA Single Sign-on, CA Identity Suite, CA Privileged Identity Manager, CA Advanced Authentication, Hands-on Labs, and live product demos.
- Meet the Experts covering Single Sign-On, Identity Management & Governance, Advanced Authentication, and Privileged Identity Management

**Look Who's Coming:** CISOs, CSOs, CIOs, VPs & Directors of IT Security, IAM Program & Project Managers, Security Architects, Line of Business Executives and security professionals from some of the world's best companies, including:

### Overheard...

*"CA is a leader in identity and access management. It's been there for a long time. I think they're using position as the industry leader in becoming much more creative in terms of designs that fit these emerging environments. The growth of mobility, the use of BYOD, BYOC, digital identities, all of these technologies require kind of a different view of identity. I think CA is in a wonderful position to dominate that marketplace. It already has developed such a fantastic reputation as an innovator and a leader in this space."*

— Larry Ponemon, Ponemon Institute
