

1. Pick a feature that has some stories associated with it:

The screenshot shows a Jira issue page for the feature "Phase 2: Ability to handle Multiple Medical Tests in Grid Questions". The "User Stories" tab is highlighted with a red circle, indicating 12 stories are associated with this feature. The right sidebar displays progress metrics for the feature, with two bars highlighted by a red circle:

- PERCENT DONE BY STORY COUNT:** 8% (1/12 stories complete)
- PERCENT DONE BY STORY PLAN ESTIMATE:** 6% (1/18 points complete)

Other visible details include the "Details" button, "Attachments" section, "Status" (Ready/Blocked), "Description" editor, and sidebar filters for "PROJECT" (DMT/DE Development) and "PROGRAM" (No Entry).

2. Go to User Story tab and remove a couple of stories:

3. When I did this, I noted that the rollup **did update immediately**, reflecting the correct number of stories and points. I **then added the stories back**, and observed that the rollup was no longer correct.

4. Go back to Details tab...while the User Stories tab shows 12 stories, the detail page shows 10:

The screenshot shows a Jira issue page for "Phase 2: Ability to handle Multiple Medical Tests in Grid Questions" (ID F3106). The "User Stories" tab is selected and circled in red, indicating 12 stories. The "Details" tab is also visible. The right sidebar displays progress metrics: "PERCENT DONE BY STORY COUNT" at 0% (0/10 stories complete) and "PERCENT DONE BY STORY PLAN ESTIMATE" at 0% (0/15 points complete), both circled in red. Other sidebar items include PROJECT (DMT/DE Development), PROGRAM (-- No Entry --), and RELEASE (Unscheduled).

5. Note that the points completed count shows 0/15. Returning to the User Stories tab, the total points is 18 and there is at least 1 point completed :

The screenshot shows the Jira interface for a project named 'Phase 2: Ability to handle Multiple Medical Tests in Grid Questions'. The 'User Stories' tab is selected and circled in red. Below the navigation bar, there are search and filter options. A table of user stories is displayed with columns for Rank, ID, Name, Plan Estimate, Sync, and Schedule State. The total points for the stories are 18, which is circled in red. The second story, US21888, has a status of 'A' (Approved), which is also circled in red.

Rank	ID	Name	Plan Estimate	Sync	Schedule State
Totals					
1	US21510	(DE) Ability to show a repeater question in a grid layout where all disclosure types go to the same questionnaire	2		D
2	US21888	(DMT) Add Table Column Heading into the Translation Report	1		A
3	US21291	(DMT) Ability to add Tool bar questions to a Table Enabled questionnaire	1		D

6. Note that there is an informational pop-up that shows the time and date the rollup was last updated, which is consistent with my observation that the rollup is not current:

The screenshot shows a Jira dashboard with two progress bars. The first bar is titled 'PERCENT DONE BY STORY COUNT' and shows 0% completion (0/10 stories). The second bar is titled 'PERCENT DONE BY STORY PLAN ESTIMATE' and shows 0% completion (0/15 points complete). A dark grey pop-up box is overlaid on the first bar, displaying the text 'Last Rollup Date: 2020-04-15 09:20 AM CDT'.
