Stabilization Announcement

CA Change Manager Enterprise Workbench

March 30, 2015

To: CA Change Manager Enterprise Workbench Customers
From: The CA Technologies CA Change Manager Enterprise Workbench Product Team
Subject: Stabilization Announcement for CA Change Manager Enterprise Workbench

CA Technologies is continually working to improve our software and services to best meet the needs of our customers. As a part of our Application Development business line planning, we have thoroughly reviewed all of the software change management products including CA Change Manager Enterprise Workbench. We have determined that while this product provides value to customers, the benefit to existing and prospective customers has declined significantly and we expect this will continue as newer technology evolves beyond current capabilities. Therefore, we have decided to "Functionally Stabilize" CA Change Manager Enterprise Workbench.

What does "functional stabilization" mean for our customers? CA Technologies will continue maintenance and support for this product and product options in accordance with your active maintenance contract. However, Release efforts and Product Enhancement considerations will terminate effective immediately.

CA Application Development strategic software change and application lifecycle management products include: CA Endevor® Software Change Manager, CA Harvest Software Change Manager, CA Unified Software Change Manager and CA Application Lifecycle Conductor. As foundational products for new technology, our plans include partnering with customers to assist in migrating to the appropriate strategic product from CA Change Manager Enterprise Workbench to better position customers to leverage a modern, single, enterprise solution for comprehensive visibility and management of all software changes supporting applications that span mobile-to-mainframe environments.

Your success is very important to us, and we encourage you to review our exciting new products at ca.com/appdev and engage in our plans for retaining and continuing our successful partnership with you.
