Course Overview

CA SYSVIEW® Performance Management Option for DB2 (CA SYSVIEW for DB2) is a database performance management product that monitors Db2 subsystems, Db2 applications and Db2 connections. CA SYSVIEW for DB2 reduces the time and effort involved in identifying and correcting Db2 performance problems.

This course is designed to teach you how to use CA SYSVIEW for DB2 to monitor active threads and review historical thread activity

This Course Will Show You How To:

- Navigate the active thread panels to obtain information to help diagnose issues with active threads.
- Use accounting data to obtain more active and historical thread data.
- Find and cancel problem threads.
- Use thread history to identify recent threads that used excessive resources.
