Howdy Mainframe community and MAT user!

Following the spirit of a modern development, after a starter set of REST APIs / CLIs for the basic views (see community post here) and REST and CLi extension for DB2 Views (see community post here) team had progressed with externalization of the data for

- IMS REST API ENDPOINTS
- CICS REST API ENDPOINT SUPPORT

IMS REST API Endpoints

This enhancement offers IMS performance data externalized through set of REST APIs. Gain and incorporate the REST response for IMS View , DBD, PSB, SSA, Statement and Region details for an IMS transaction.

More information about each endpoint can be found under MAT Documentation - Using REST API

-> REST API: Get IMS View for IMS Transactions,

-> REST API: Get PSBName SSA details for IMS Transactions

-> REST API: Get PSBName details for IMS Transactions

-> REST API: Get DBDName details for IMS Transactions

-> REST API: Get Region details for IMS Transactions

-> REST API: Get Statements for IMS Transactions

This enhancement is available via PTF **LU10510**

CTS REST API Endpoints

In the same spirit as IMS and DB2 REST support. This enhancement offers REST response for CTS-related Views (aka TranView) and respective performance data coming from a MAT measurement. You may retrieve and incorporate data for Call Stack, General TranView, Transaction CallerID and statistics and more.

More information about each endpoint can be found under MAT Documentation - Using REST API

-> REST API: Get Transaction Call Stack Details

-> REST API: Get Additional Transaction Statistics

-> REST API: Get CodeView Data for TranView in CSECT Mode & MODULE mode

-> REST API: Get Delay Details for TranView

This enhancement is available via PTF **LU09353**

Q: How are you using the product APIs?

Q: Do you feed your homebrew insight dashboards?

Q: Which data that MAT offers you would like to get externalized?

Q: Do you lack a feature or lust for some capability?

 For more information about *Mainframe Application Tuner V12*, see the release notes in MAT V12 documentation.

Thank you for choosing Mainframe Application Tuner to improve your application performance. Are you interested in a live demo? Would you like to get an update about the product roadmap or PoC? I strongly encourage you to get in touch. **We are always happy to hear from you and rally on your ideations.** After all you, our users, are part of MAT family.

Petr Klomfar (Petr.Klomfar@broadcom.com)

Product Owner of MAT
