

Symantec Endpoint Management Hidden Items – Part 3

Introduction

This article provides data on all hidden items within the Symantec Management Platform and Solutions. It can be used as a reference when you are looking for items that are hidden from the Symantec Management Console. Typically hidden items are purposefully hidden, but I have found many instances where finding hidden items is useful both as a troubleshooting need, and when a sub-query, report, or other hidden items (such as Software Portal items) need to be found. Note that it is not recommended to simply go in and edit these without understanding how they are used.

This section covers Products **Altiris Resource Management** to **Discovery Tasks** (alphabetically)

Use the following guide when utilizing this article:

- Grid is sorted by Product
- Search for the item you are looking for, or use keywords
- Many of the locations under the Console Location column are hidden as well
- All of these items are held in the Item table, and it is the attribute of 1 that marks something as hidden. To remove hidden from an item, minus 1 from the number in the attributes column. For example:

```
SELECT Attributes FROM Item WHERE Guid = 'E86241C7-3DAE-47CD-8819-494314DA7745'
```

If you then update that value by subtracting 1, you will then make that item visible. That assumes that the containing folder is already visible. **NOTE:** Do not do this lightly. The console may become bogged down if you make too many items visible, thus displayable when the console is rendered.

```
UPDATE Item SET Attributes = 'value -1' WHERE Guid = 'E86241C7-3DAE-47CD-8819-494314DA7745'
```

Item Name	Description	Item GUID	Product	Console Location
Altiris Resource Management	Altiris Resource Management	E81A4114-5D09-45DC-97F6-4B06F08C9AB0	Altiris Resource Management	HIDDEN:Internal Hidden Folder > Altiris Resource Management

Software Resources - Broken Element Summary	Summarizes number of unique computers on which the key path for a particular Windows Installer component or another file was found to be missing, based on scans conducted during specified date range. (Note: A given computer should only be counted once for each broken element, even if it was found to be broken multiple times by a single policy evaluated during the specified date range OR if it was found to be broken by multiple policies evaluated during the specified date range.)	F002E78B-FE55-4239-94D5-311BD9A444DB	Altiris Software Management Solution 7.6	Reports > Software > Application Management > Software Resources - Broken Element Summary
Software Resources - Broken Elements	Displays computers found to have broken elements during specified date range. (Note: A given computer / broken element combination could be displayed in this report multiple times, because of: (1) multiple policies being evaluated during the specified date range; or (2) a given policy being evaluated multiple times during the specified date range.)	916F4000-3EDD-4F8F-810A-36ECAEEA3439	Altiris Software Management Solution 7.6	Reports > Software > Application Management > Software Resources - Broken Elements

Software Resources - Current Broken Elements	Identifies missing Windows Installer key paths or other files that were found to be missing and which could not be remediated based on most recent evaluation of individual policies. (Note: If specific Windows Installer key path or other file was found to missing by most recent evaluation of on policy and could not be remediated by that policy, but the key path or file was later restored by the running of another policy, such element will still appear in this report even though it is no longer broken).	734C6133-B33D-400C-A942-BE3745EF695D	Altiris Software Management Solution 7.6	Reports > Software > Application Management > Software Resources - Current Broken Elements
Software Resources - Inaccessible Source Paths	Displays computers with software resources that were found to have inaccessible source paths in most recent scan results.	91755745-96AF-42B8-B50C-E46FA776D170	Altiris Software Management Solution 7.6	Reports > Software > Application Management > Software Resources - Inaccessible Source Paths

Import Network Printer from EPM.local starting from Root and using the default column mappings. Perform this import on the specified schedules.	This item will import the specified resources from the specified directory into the Notification Server.	1D3955CC-C31E-4EEA-9467-E2EF5D40731F	Directory Connector	HIDDEN:Internal Hidden Folder > Import Network Printer from EPM.local starting from Root and using the default column mappings. Perform this import on the specified schedules.

Import Role and Account resources from EPM.local, from (none) and using the default column mappings. Perform this import on the specified schedules.	This item will import the specified resources from the specified directory into the Notification Server.	D749CA3E-EF02-43E5-B55E-EF0BB8BF8ADF	Directory Connector	HIDDEN:Internal Hidden Folder > Import Role and Account resources from EPM.local, from (none) and using the default column mappings. Perform this import on the specified schedules.
Import Site resources from EPM.local using these resource associations. Perform this import on the specified schedules.	This item will import the specified resources from the specified directory into the Notification Server.	EBC39EE3-F476-4EDF-B3AD-5F36FDE58B8C	Directory Connector	HIDDEN:Internal Hidden Folder > Import Site resources from EPM.local using these resource associations. Perform this import on the specified schedules.
Import Subnet resources from EPM.local using these resource associations. Perform this import on the specified schedules.	This item will import the specified resources from the specified directory into the Notification Server.	38187410-D399-4152-ABD6-A35D3E4F407B	Directory Connector	HIDDEN:Internal Hidden Folder > Import Subnet resources from EPM.local using these resource associations. Perform this import on the specified schedules.
Import User resources from EPM.local starting from EPM.local and using the default column mappings and these resource associations. Import all users on the specified schedules.	This item will import the specified resources from the specified directory into the Notification Server.	B44CD43B-708A-4132-AEA4-909F6637E43B	Directory Connector	HIDDEN:Internal Hidden Folder > Import User resources from EPM.local starting from EPM.local and using the default column mappings and these resource associations. Import all users on the specified schedules.
Internal Directory Full Import Schedule Item	This item should never be enabled it is used internally by the Directory Connector to create scheduled items	2224D3A0-765A-426B-8010-449FE91B4747	Directory Connector	HIDDEN:Internal Hidden Folder > Internal Directory Full Import Schedule Item

Internal Directory Update Schedule Item	This item should never be enabled it is used internally by the Directory Connector to create scheduled items	7A0C800D-78F5-42E8-9955-23EE369BA0AB	Directory Connector	HIDDEN:Internal Hidden Folder > Internal Directory Update Schedule Item
List of all computers by Organizational Unit.	This report will list all the computers in the selected Organizational Unit.	EEF7700A-5DDD-473C-AE34-59937D575724	Directory Connector	Reports > 6.0 Legacy Reports > Notification Server Infrastructure > Active Directory > List of all computers by Organizational Unit.
List of all resources by Organizational Unit	This report will list all the resources in the selected Organizational Unit.	819951D2-9EDA-4CBC-843E-CF8DC5B3C51B	Directory Connector	Reports > 6.0 Legacy Reports > Notification Server Infrastructure > Active Directory > List of all resources by Organizational Unit
List of all users by Organizational Unit	This report will list all the users in the selected Organizational Unit.	3FF23A11-A711-4BA5-A877-4F86A8DCF8A7	Directory Connector	Reports > 6.0 Legacy Reports > Notification Server Infrastructure > Active Directory > List of all users by Organizational Unit
Microsoft Active Directory Computers Without the Symantec Management Agent	This report will count computers by container that have been found that do not have the Symantec Management Agent installed. The report can be run for a specific container or for all containers. You can then drill down to view a list of computers, and from there to the resource manager for a given computer.	E1F6AC6B-ABFB-4CD2-B743-C652FFABECC0	Directory Connector	Reports > 6.0 Legacy Reports > Notification Server Infrastructure > Active Directory > Microsoft Active Directory Computers Without the Symantec Management Agent
Microsoft Active Directory Import in the Last 'N' Days	This report lists (in seconds) how long each Microsoft Active Directory import took over the last N days.	8CF81800-1207-46CF-87CF-B0C44EB35AE3	Directory Connector	Reports > 6.0 Legacy Reports > Notification Server Infrastructure > Active Directory > Microsoft Active Directory Import in the Last 'N' Days
Microsoft Active Directory Import Rule Task Runs	This report will list all the resources that were created and updated during each import rule run.	E2BC1FFD-BE31-4CA1-B531-8A632A04FDFE	Directory Connector	Reports > 6.0 Legacy Reports > Notification Server Infrastructure > Active Directory > Microsoft Active Directory Import Rule Task Runs
Microsoft Active Directory Resources by Container	This report will list Microsoft Active Directory containers by category (user, computer, etc.)	5E54F54E-8932-4935-808B-A8064CBD2A34	Directory Connector	Reports > 6.0 Legacy Reports > Notification Server Infrastructure > Active Directory > Microsoft Active Directory Resources by Container

Microsoft Active Directory Users with Contact Detail	This report will list Microsoft Active Directory users with contact detail. You can enter a container and a user name to filter the report. The report then drills down to the resource manager.	88485E08-5E44-4C01-B8B1-0C64EEF4DB59	Directory Connector	Reports > 6.0 Legacy Reports > Notification Server Infrastructure > Active Directory > Microsoft Active Directory Users with Contact Detail
Resources Imported per Import Rule	This report will list the resources that were imported for each import rule.	B874D0ED-684D-4506-BB46-146D57787A07	Directory Connector	Reports > 6.0 Legacy Reports > Notification Server Infrastructure > Active Directory > Resources Imported per Import Rule
Resources that were Created by a Microsoft Active Directory Import	This report lists all resources that were created by a Microsoft Active Directory import.	1EA3AB6E-B7FA-41D0-8ECC-FC00802816CB	Directory Connector	Reports > 6.0 Legacy Reports > Notification Server Infrastructure > Active Directory > Resources that were Created by a Microsoft Active Directory Import
Resources that were Updated by a Microsoft Active Directory Import	This report lists all resources that were updated by a Microsoft Active directory import.	397C683A-F6A0-446E-B529-E75F7F624DF1	Directory Connector	Reports > 6.0 Legacy Reports > Notification Server Infrastructure > Active Directory > Resources that were Updated by a Microsoft Active Directory Import
Windows Computers Not imported from Microsoft Active Directory	This report lists Windows computers that are NS clients but are not imported from Active Directory.	8B548838-D186-4BE9-A93E-9D79154343B1	Directory Connector	Reports > 6.0 Legacy Reports > Notification Server Infrastructure > Active Directory > Windows Computers Not imported from Microsoft Active Directory
Directory Connector Language Pack	This provides language localizations for Directory Connector	A2BBC4A1-E3A9-4690-A2F1-A0DEC00AA4E9	Directory Connector Language Pack	Directory Connector Language Pack
DirectoryConnector Language Pack Installation	DirectoryConnector Language Pack Installation	488D2478-F1BC-4FBF-90A2-7391DD72B1A8	Directory Connector Language Pack	DirectoryConnector Language Pack Installation
Chassis Management Controllers Query	Default query used to list Chassis Management Controller resources.	254EC501-1750-456A-B0A9-B7962C1472BC	Discovery Tasks	Chassis Management Controllers Query
Clusters Query	Default query used to list Cluster resources.	7CC6F858-EF89-49ED-A188-446E25E6CD77	Discovery Tasks	Clusters Query
Device Types List DataSource		2FBD178F-3550-4AF1-BD47-53EAAEC24FB6	Discovery Tasks	Reports > Discovery and Inventory > Device Types List DataSource

Devices by Task (Last 30 days) Query	Discovered Devices by Task - Datasource	9567ABE3-EA4B-4552-BB0C-1C2E8881606E	Discovery Tasks	Reports > Discovery and Inventory > Devices by Task (Last 30 days) Query
Discovered Device Classification (Last 30 days) Query		86885FFB-22FE-47DE-ADDE-4EF3344BB39D	Discovery Tasks	Reports > Discovery and Inventory > Discovered Device Classification (Last 30 days) Query
Discovered Devices Query	Discovered Devices - Datasource	DA2F5F1A-A715-4F7C-9346-780AF1834FD0	Discovery Tasks	Reports > Discovery and Inventory > Discovered Devices Query
Discovery Task DataSource		1591D090-2550-4972-943F-902750230E01	Discovery Tasks	Reports > Discovery and Inventory > Discovery Task DataSource
Disk Subsystems Query	Default query used to list Disk Subsystem resources.	172EF343-2889-4DCA-A129-C43A45F7136C	Discovery Tasks	Disk Subsystems Query
Duplicates That Cannot be Merged Query	Possible Duplicates - Datasource	D416B12F-9008-4243-8C89-32442248E837	Discovery Tasks	Reports > Discovery and Inventory > Duplicates That Cannot be Merged Query
Infrastructure Devices Query	Default query used to list Infrastructure Device resources.	8450FC6B-EA41-4825-81F4-E7B654375D96	Discovery Tasks	Infrastructure Devices Query
Inventoried Devices Query	Discovered Devices - Datasource	A4AF05AE-D8EA-43A8-9576-9819B67BB465	Discovery Tasks	Inventoried Devices Query
IP Phone Devices Query	Default query used to list IP Phone Device resources.	ECE46DFE-FE2B-4FD5-BB1F-B05F2EB060EB	Discovery Tasks	IP Phone Devices Query
KVM Devices Query	Default query used to list KVM Device resources.	80377BF1-544F-4DF0-8BF8-A9B059B04A65	Discovery Tasks	KVM Devices Query
Merge Duplicate Resources	Finds different Resources that have common characteristics, and evaluates them for merging.	DFE04FEA-D71A-438F-B40E-A8ECD01304C7	Discovery Tasks	Merge Duplicate Resources
Modular Chassis Query	Default query used to list Modular Chassis resources.	1FB91E6F-C316-48C2-AA1A-5C7B7CB29A3B	Discovery Tasks	Modular Chassis Query
Network Attached Storage Query	Default query used to list Network Attached Storage resources.	DCE887B6-B262-4CB4-A5A2-0B1CCE3D1F31	Discovery Tasks	Network Attached Storage Query
Network Backup Devices Query	Default query used to list Network Backup Device resources.	97DB6E80-43C6-4DC1-89B4-BD54A37D4BD3	Discovery Tasks	Network Backup Devices Query
Network Discovery Capture Item		5E2C9893-70A1-46BD-AC06-EC328C43E168	Discovery Tasks	Settings > Notification Server > Resource and Data Class Settings > Data Classes > Network Device Data > Network Discovery Capture Item

OOB Management Devices Query	Default query used to list OOB Management Device resources.	08035AE6-FFFB-4042-803C-4733E6700856	Discovery Tasks	OOB Management Devices Query
