What's New: DX UIM 23.4

Fueling AIOps for Observability

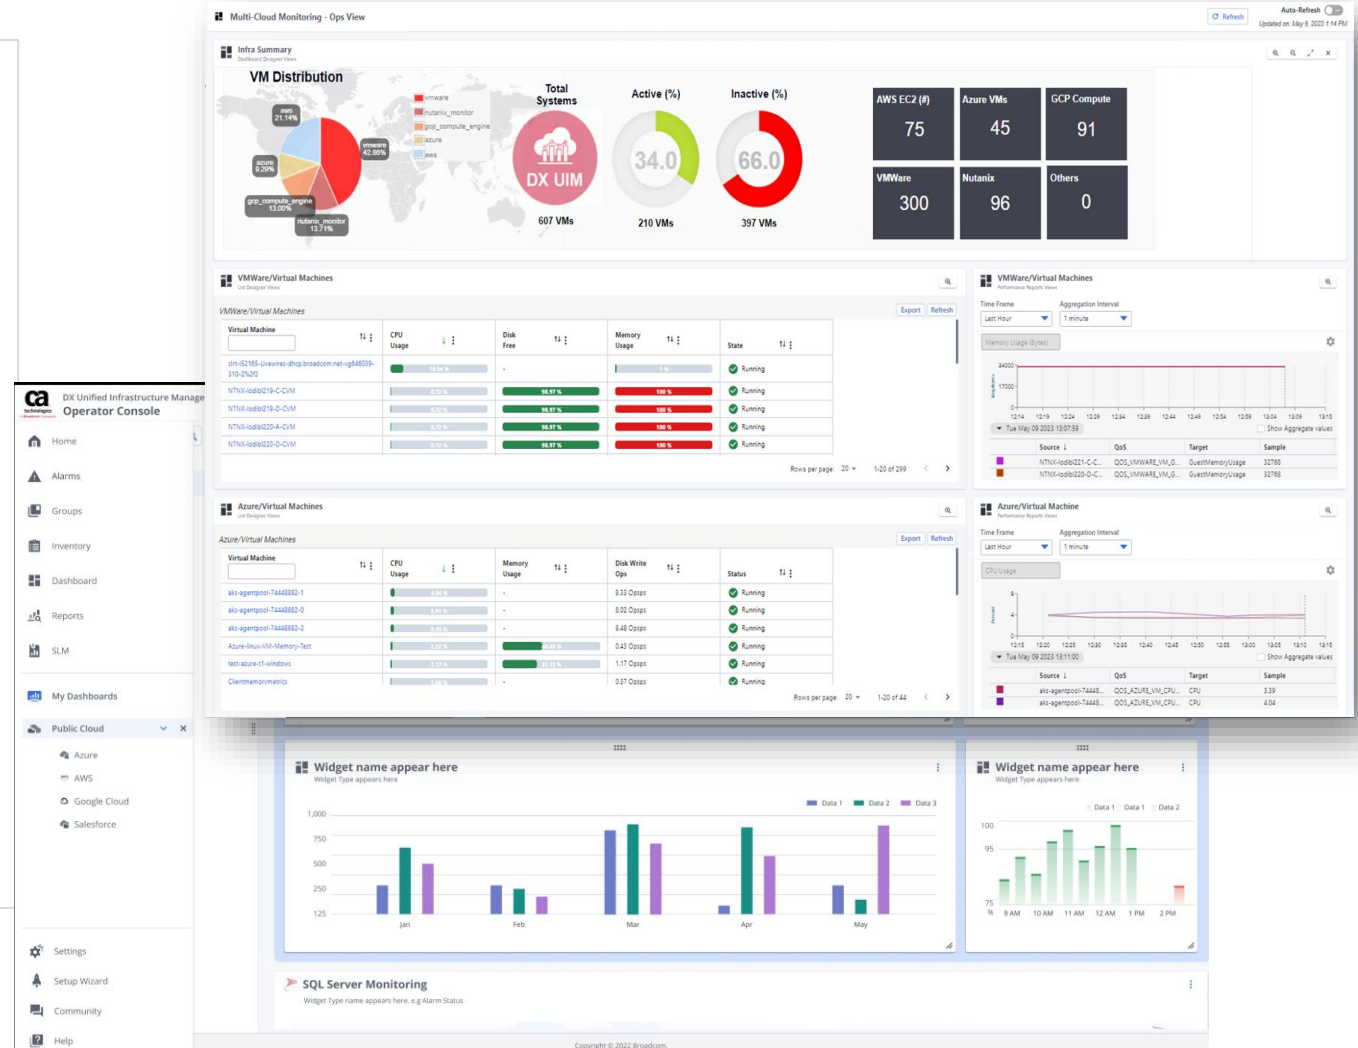

- Enable web-scale IT operations with web-scale grade security and quality

Observability View Designer

Richer Home Screens as Per Role and Technology

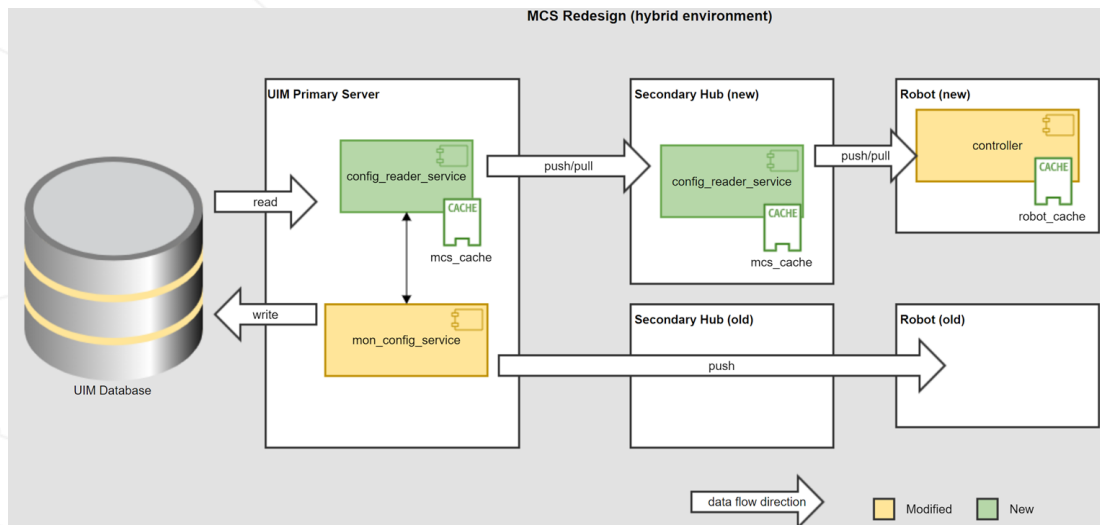

- Design integrated views to create unified views across infrastructure stack
- Easy correlation to understand performance insights across hybrid multi cloud data center
 - Inventory to fault correlation
 - Fault to performance correlation
- Persona-based content
- Enables self service

Zero-Touch Monitoring

Improved Scale and Resilience for Monitoring Configuration Service (MCS)

- Architected for scale and resiliency
- Consistent (template-based) monitoring
- Ease of configuration management at scale
- Quicker TTV with zero-touch inventory onboarding
- Enabling monitoring governance

3. Autonomous operations

- Alarm notification and incident management
- Dashboards and reports
- Performance & health management

1. Dynamic discovery

- Device discovery
- App discovery
- Inventory grouping

2. Auto configuration

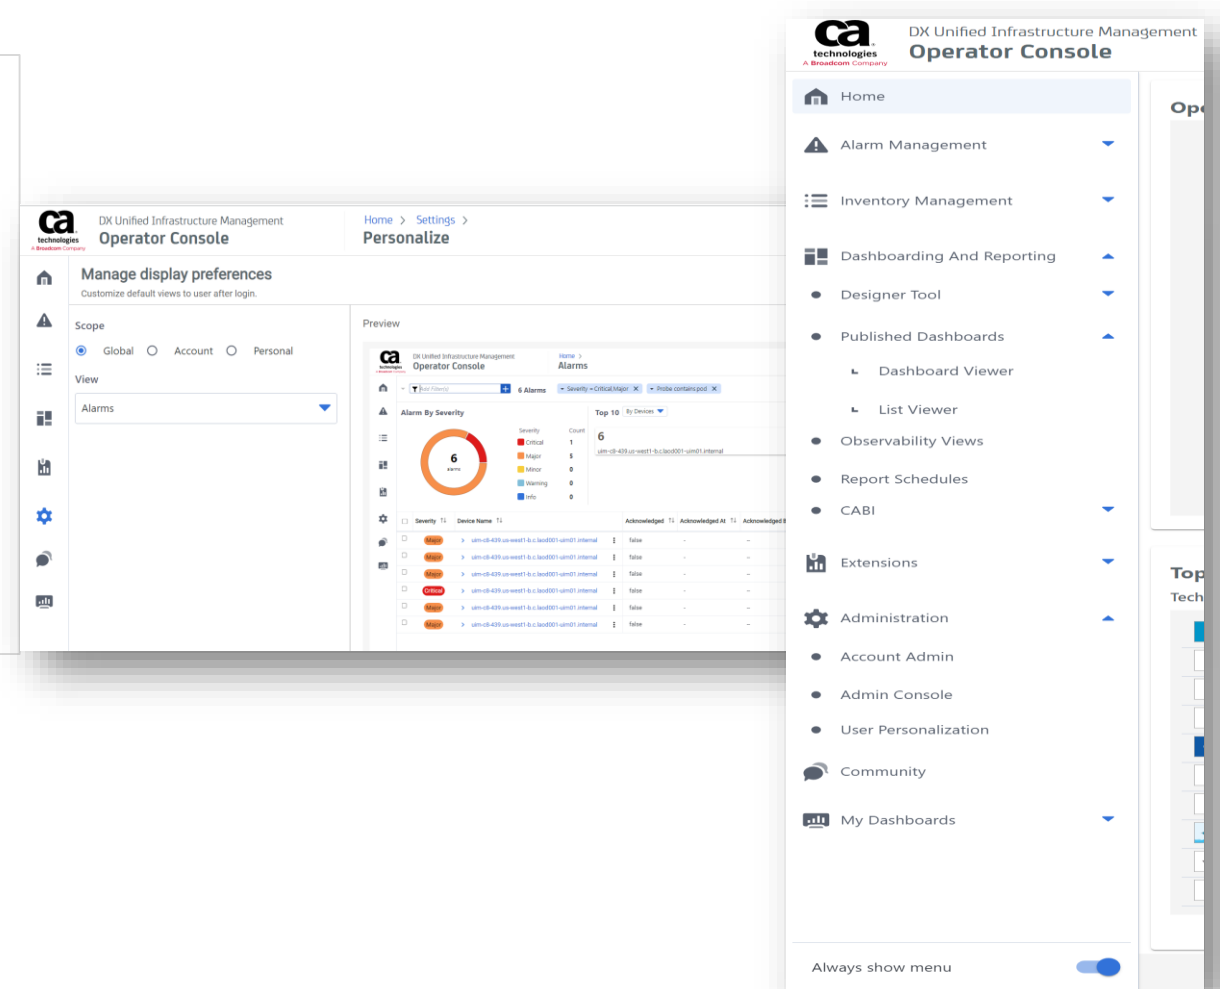

- Push Monitoring profile and alarm policies

Enhanced Personalization

Ease of Use for Efficient Operations

Personalize Operator Console as per role and responsibility

- Customizable navigation menu bar
 - On Operator Console, remove used menu items
- Set default home screen
 - Choose default landing page
- White labelling enabled

Monitoring with Minimal Access Permission (Option)

Deployment and Monitoring with Non Root User

Root level access for monitoring and deployment is now optional to align with organizational security recommendations

- Less privilege user can deploy servers and robots
- Monitoring probes certified to work with less privilege user permission

Extended Platform and Database Support

Enabling Web-Scale Deployments

- New platforms support
 - Microsoft Windows Server 2022
 - RHEL 9.x
 - Jaspersoft 8.2 for CA Business Intelligence
- New database support
 - MySQL 8.X
 - Microsoft SQL Server 2022

- Deprecated platforms
 - Solaris x86
 - Solaris x64
 - Solaris SPARC 10
 - AIX 6.1
- Deprecated database
 - MySQL 5.7

Container and Cloud Monitoring

Unified Hybrid Multi-Cloud Monitoring

Public Cloud Service Providers

Services spanning multiple categories across accounts, geographies and workflows

Containers and Orchestrators

Foundational infrastructure elements, distributed containers, deployment plane elements and control plane services

Virtualization and Storage

Monitor virtualization, converged infrastructure, clusters and OpenStack cloud deployments and infrastructures

DX Unified Infrastructure Management 23.4: Why Upgrade

Web-Scale

Intelligent IT ops, personalization, non root user deployment option with additional security for web-scale enterprises, government agencies and MSPs

Modern Support

Additional support for containers monitoring, Microsoft Server 2022, RHEL 9, Solaris 11, AIX 7.1 and MySQL 8, SQL Server 2022 as option

Security & Quality

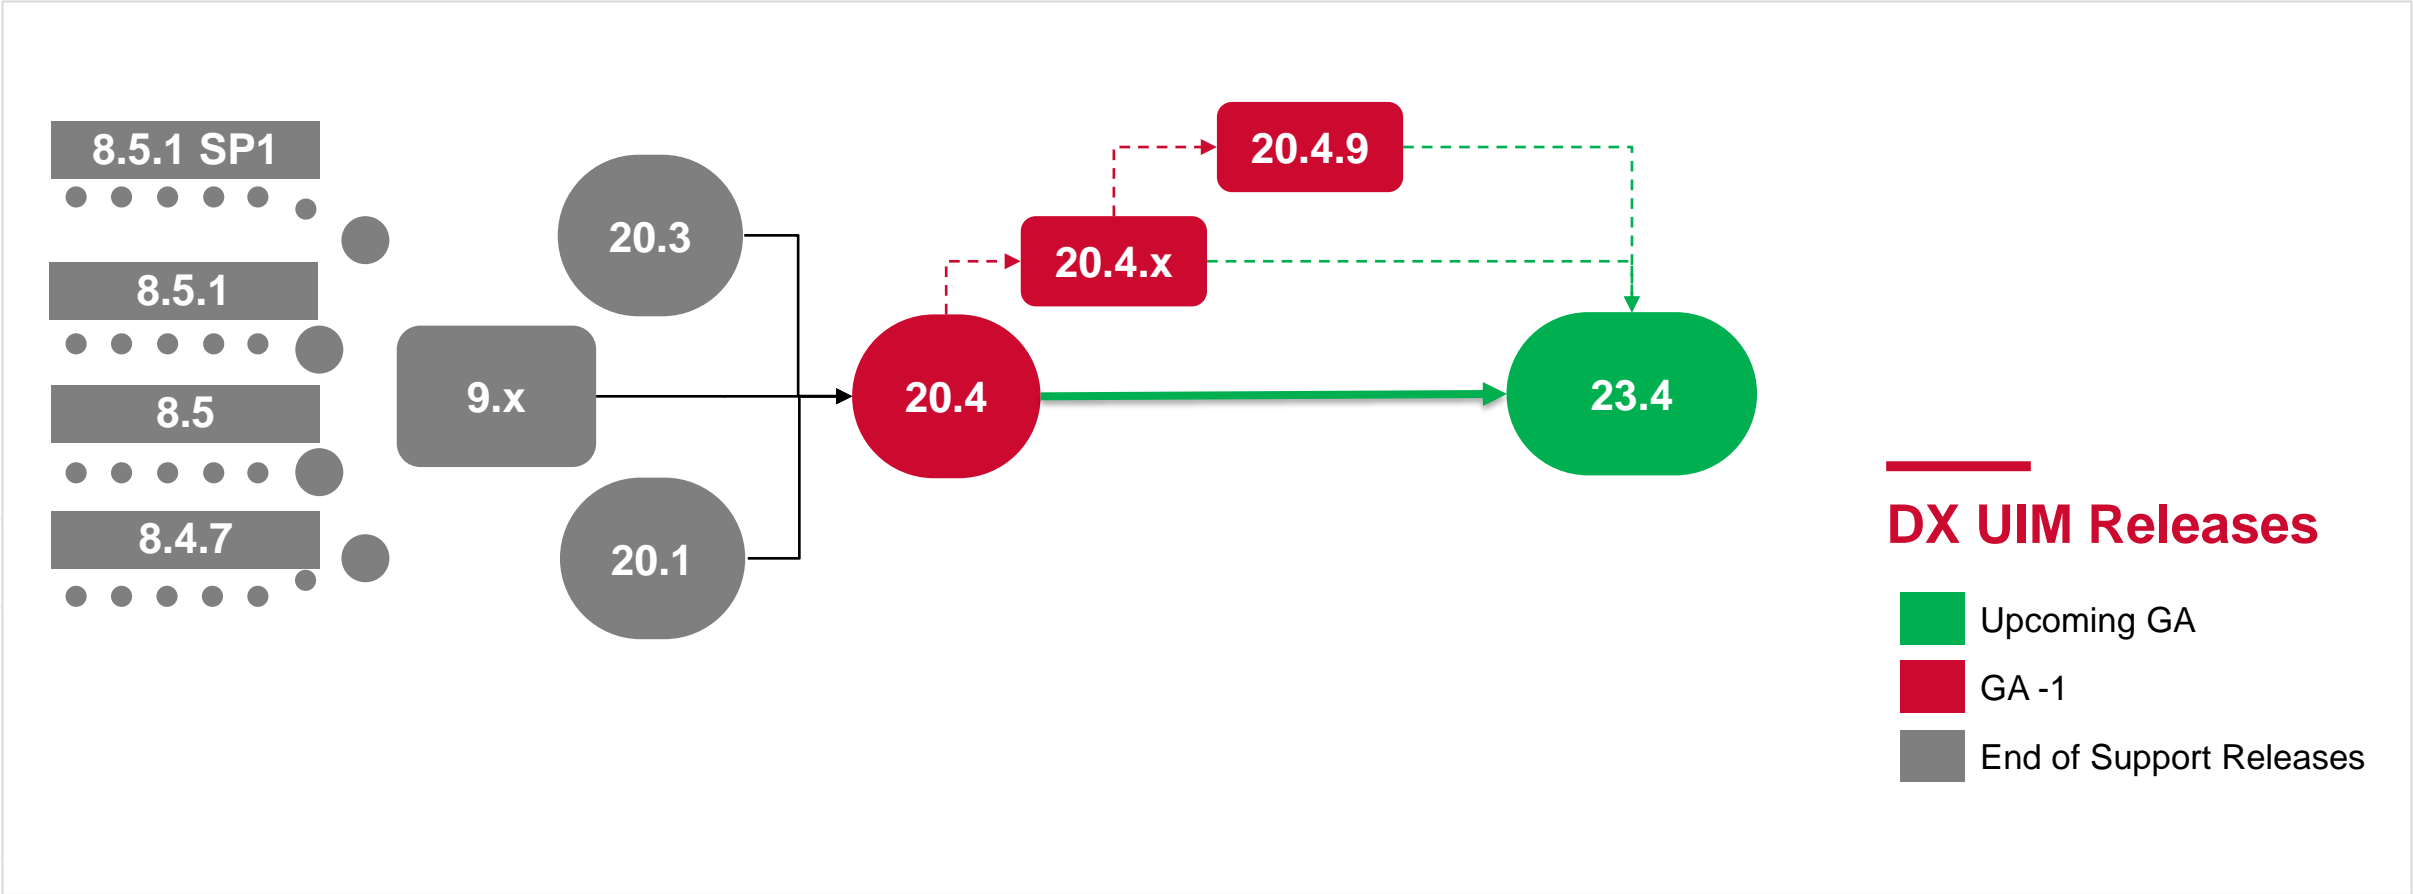

60+ feature enhancement requests, 30+ ideas from User Community, resolve customer-found defects, and security vulnerabilities fixes

Path Ahead

Ingests granular data to enable highly accurate analytics with complementary AIOps solutions

DX UIM 23.4: Upgrade Paths or Fresh Install

How to Access DX UIM 23.4 Beta Software

- Raise Wolken service desk ticket to access and download the beta builds
- For feedback, contact Broadcom L1 support (note that you are testing DX UIM 23.4 beta software)
 - Feedback shall be worked as any Wolken desk incident ticket
 - Internally, L1 will create a ticket created under the queue “DX UIM – BETA”
- Feedback **until 1 December 2023** will be addressed mostly in 23.4 GA release
 - Feedback **post 1 December 2023** and leftover items to be addressed in Cumulative Updates for 23.4
- Beta documentation is available now
 - “What's New in DX UIM 23.4 Beta” ([Link](#))
