

# Grupo de Usuarios de CA PPM

Spain & Portugal

lunes, 21 de septiembre de 2015

A person's hands are shown interacting with a transparent digital car model on a tablet. The car is rendered in a semi-transparent purple and blue color, revealing its internal mechanical components like the engine, transmission, and suspension. The person is wearing a dark sweater and a ring on their left hand. The background is a blurred office setting with windows. The overall scene conveys a sense of digital engineering and software-driven design.

Business, rewritten by software.

- [Clarity Integrations Overview](#)
- [Integration with Microsoft SharePoint](#)
- [Integration with ERP Systems](#)
- [Integration with SAP](#)
- [Integration with PeopleSoft](#)
- [Integrations with Oracle Financials](#)
- [Integration with Documentum](#)
- [XOG](#)
- [Prepackaged Integration Adapters](#)

# Clarity Integration Overview

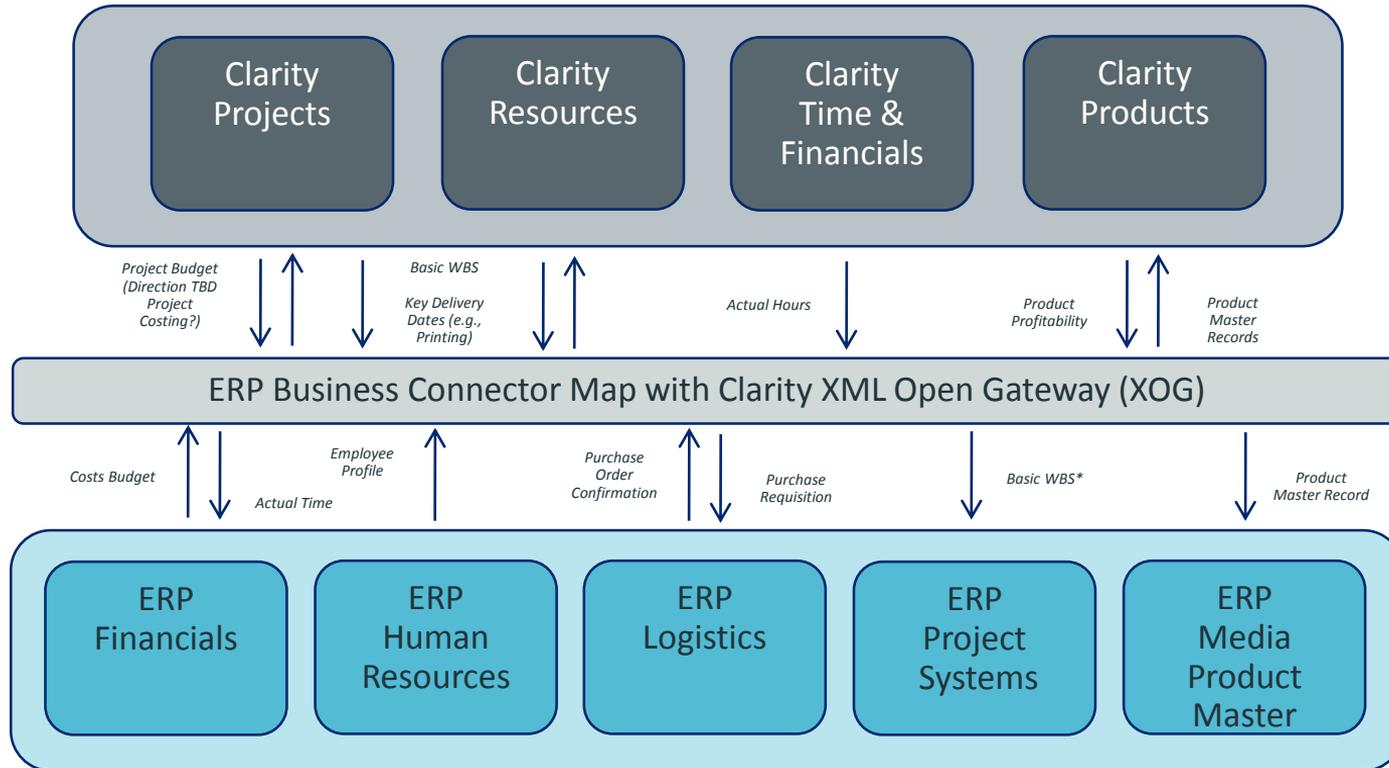

## Out-of-the-box Integrations

- Remedy Help Desk (EOL)
- Microsoft Project
- Microsoft Powerpoint
- Microsoft Excel 2007
- Open Workbench
- CA Service Desk(EOL)
- CA Software Change Manager (EOL)
- CA UAPM (EOL)
- SharePoint
- LDAP/SSO

# Integration with ERP Systems

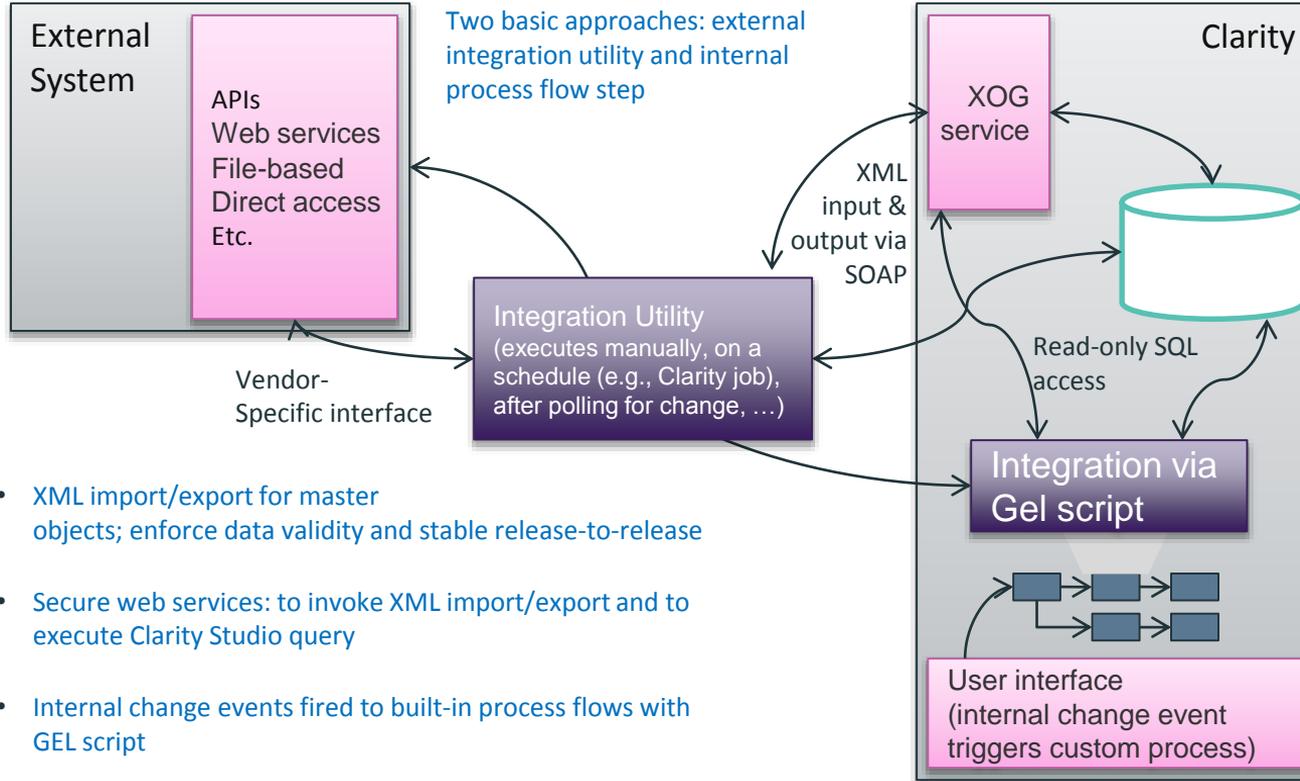

# ERP Integration Architecture

\* To raise PO and Invoice against WBS, track Costs per WBS, other.

# Integration Architecture

## Current state

- XML import/export for master objects; enforce data validity and stable release-to-release
- Secure web services: to invoke XML import/export and to execute Clarity Studio query
- Internal change events fired to built-in process flows with GEL script
- Direct database access to documented schema (read only)

# Clarity Customers with SAP Integration

- Novo Nordisk
- Telstra
- Dow Corning
- Optus
- Orlando Health
- Sony Ericsson
- Tate & Lyle
- WestLB AG
- World Bank
- Titan
- PWC
- Rabobank
- Philips Healthcare
- Bank of Scotland
- Warner Bros
- Barclays
- TietoTapiola
- MAN
- Giesecke Devrient
- New South Wales Road and Traffic

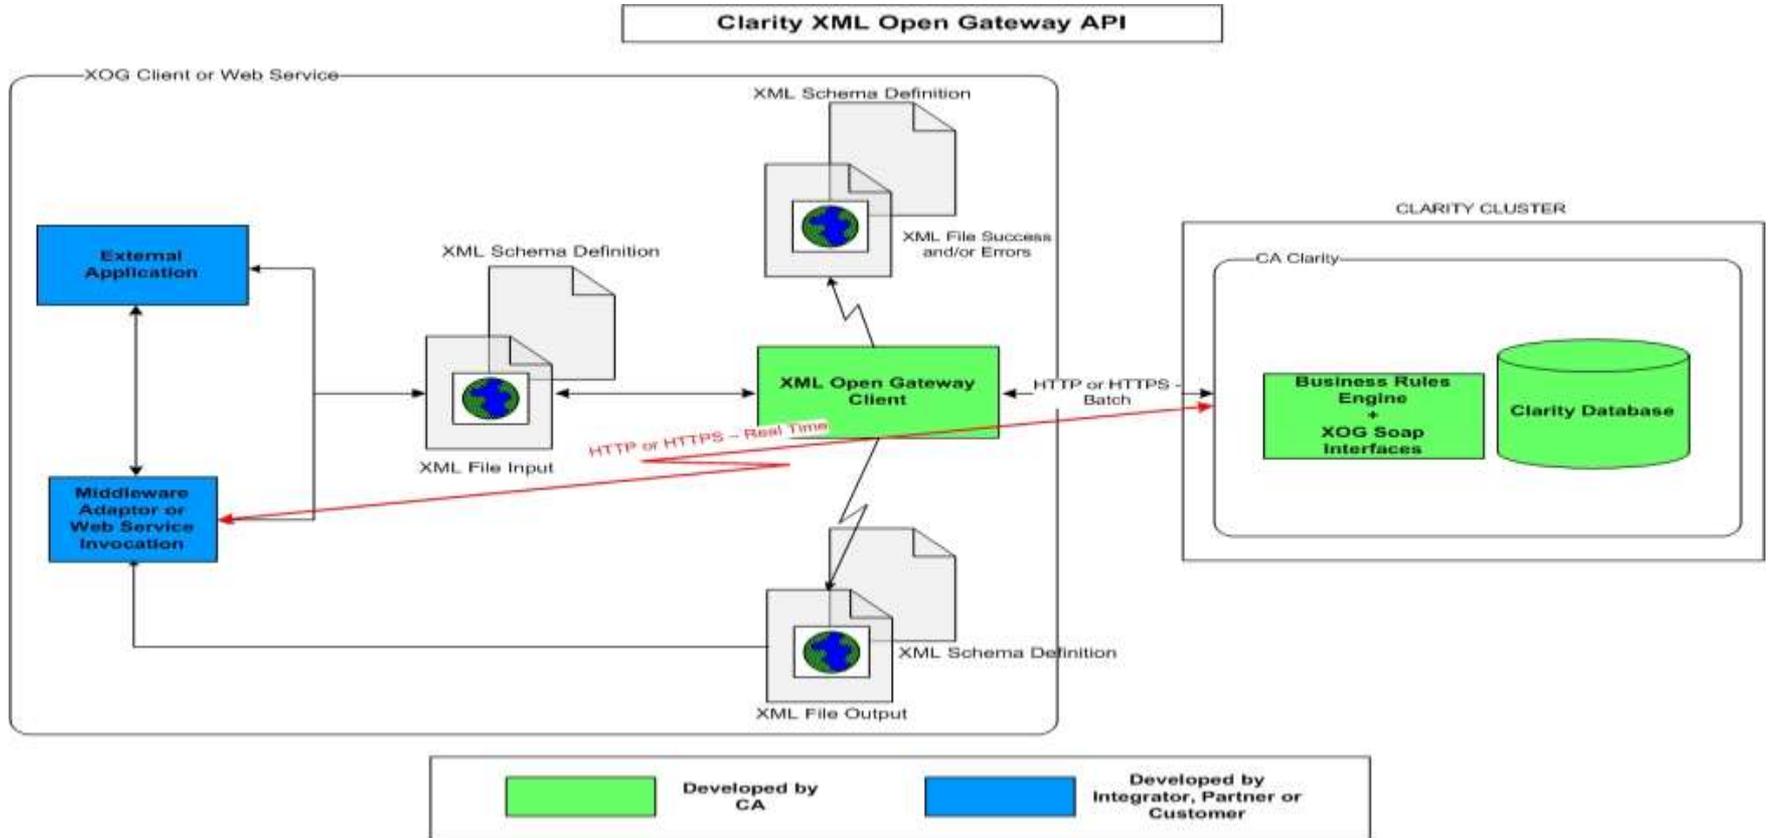

# XOG XML Open Gateway

# CA Clarity XML Open Gateway

- Clarity's XML Open Gateway offers a robust web-services based integration platform that exposes the Clarity data-structures (investments, resources, financials, etc, etc, etc...) as API's.
- These API's can be called to transfer data into or out of Clarity completely over the web via web-services or from a server or workstation.
- Because of this, it's unnecessary to have intimate details of the data model, constraints, dependencies, etc. We let the API do the work.
- Our integration platform utilizes our application tier - this means you will get the exact same behavior whether using the UI or our XML Open Gateway. All validations, constraints (business logic) are enforced the same way regardless.

# XML Open Gateway - Diagram

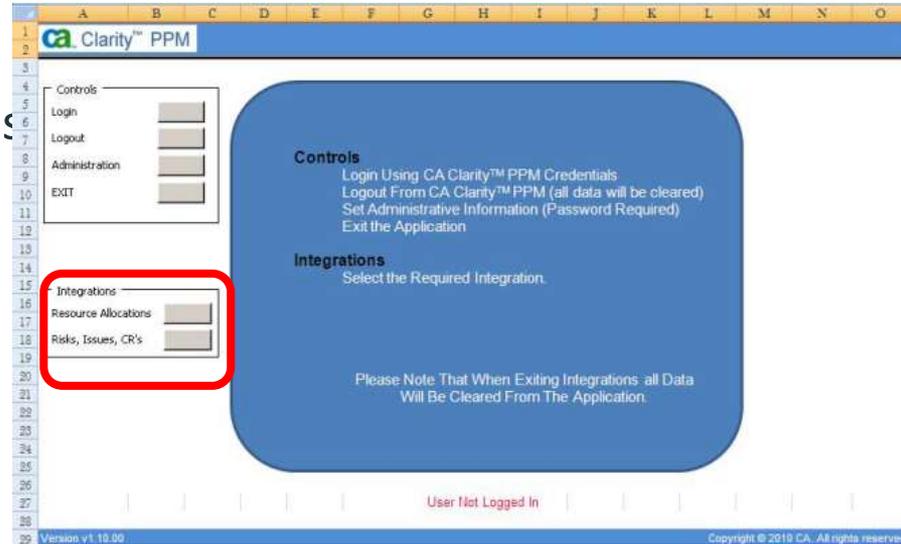

# Excel Integration and GD Integrations

# CA Clarity Excel Integrations for Resource Allocations and Risk, Issues, Change Requests

Provided by CA Global Delivery

- Based on GD Excel Framework
- Will show Excel Worksheets, but only those you need for your purpose
- Has Admin Part to define connections servers, etc
- Two main target areas for use
  - Resource Allocations
  - Risk, Issues, Change Requests

# What is Archiving?

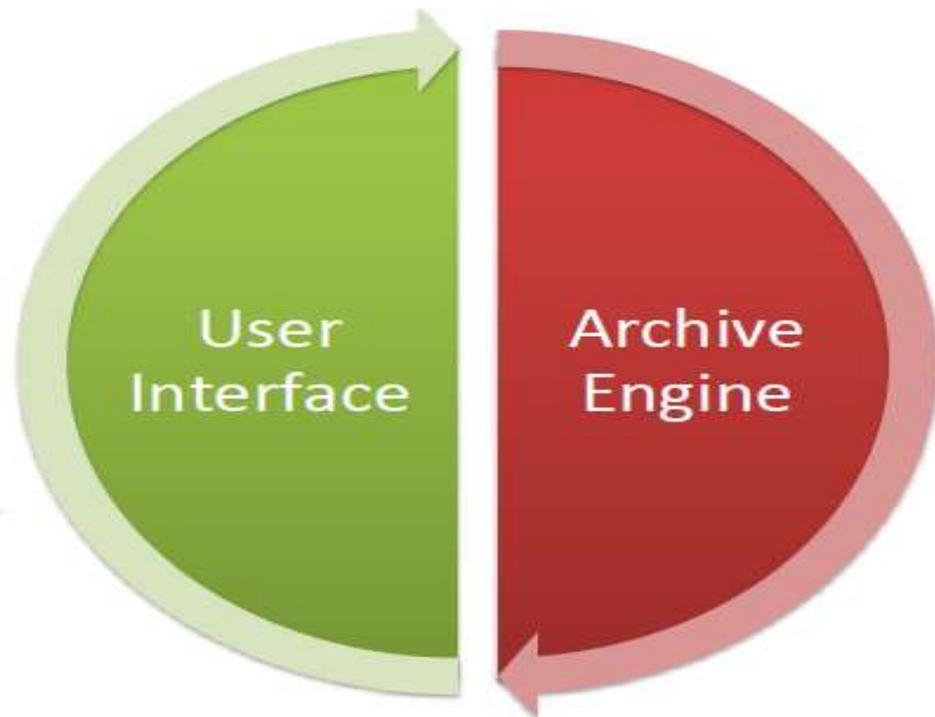

“Data archiving is the process of moving data that is no longer actively used to a separate data storage device for long-term retention.” (techtarget.com)

# Why do we need to archive data?

- Improve Application Performance
- Reduce Storage Costs
- Corporate Data Retention & Regulatory Compliance

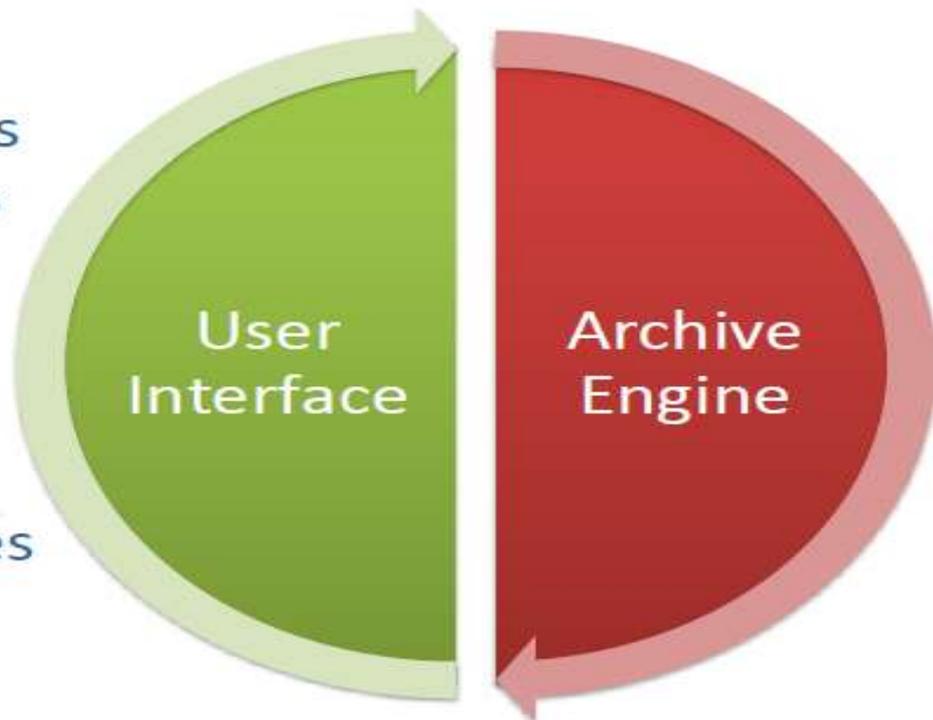

# How do Archive solutions work?

# Main components

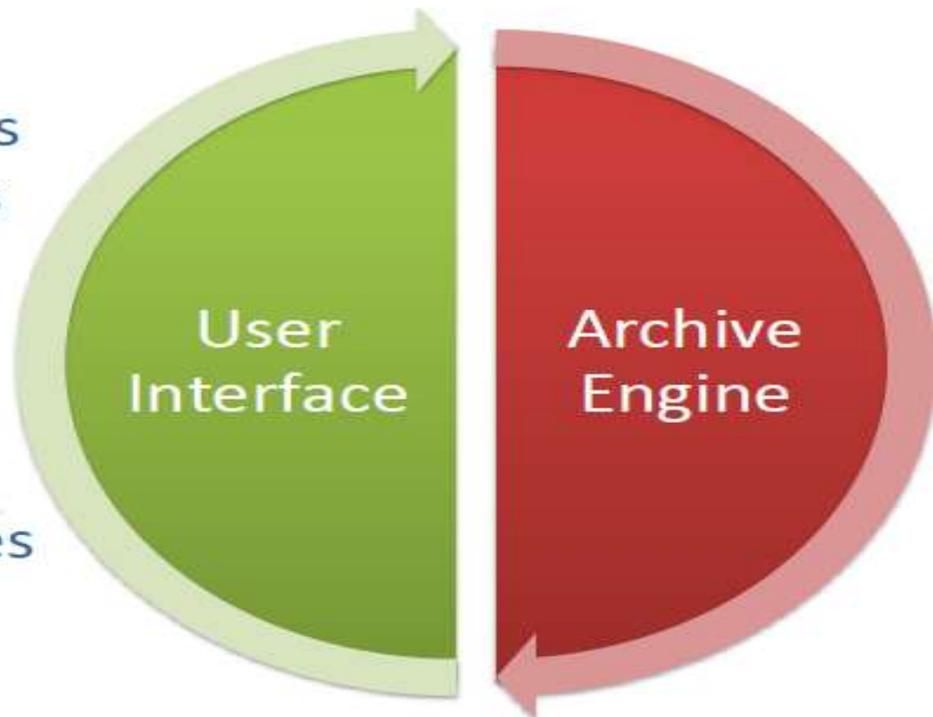

# Main components

Where the user defines what needs to be archived and the various archive rules

# Main components

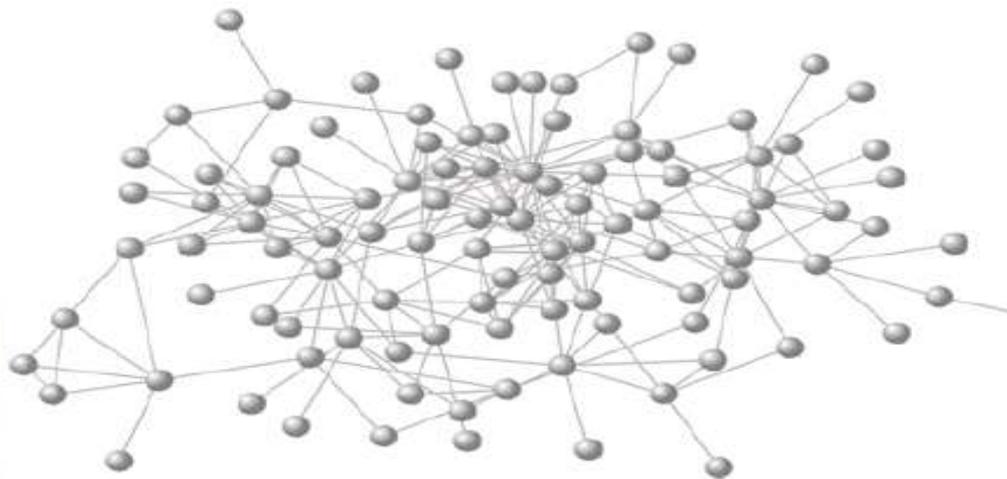

Where the user defines what needs to be archived and the various archive rules

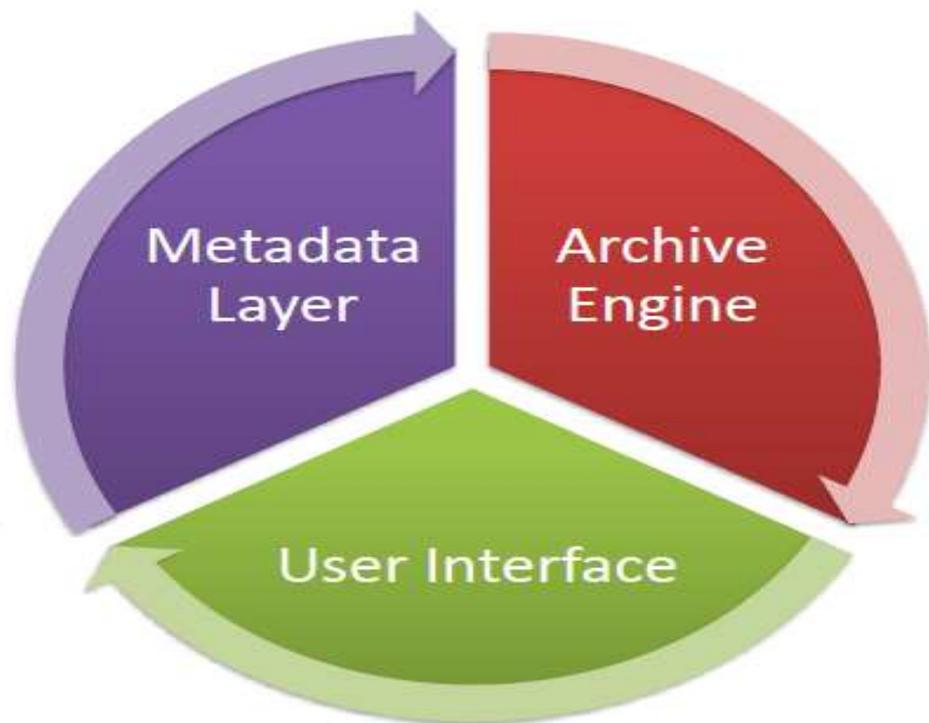

Responsible for moving the data from the primary data source into an archive

# Why can't we use a cots Archive Solution?

- The CA PPM Database Structure

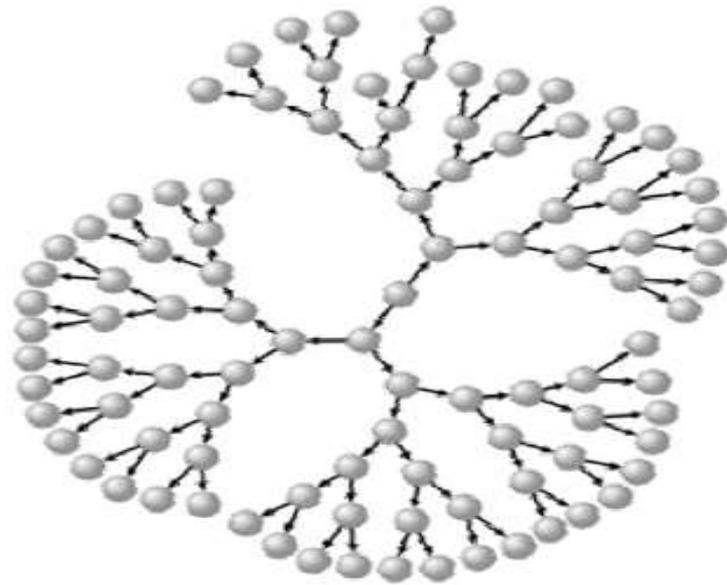

# Our Solution

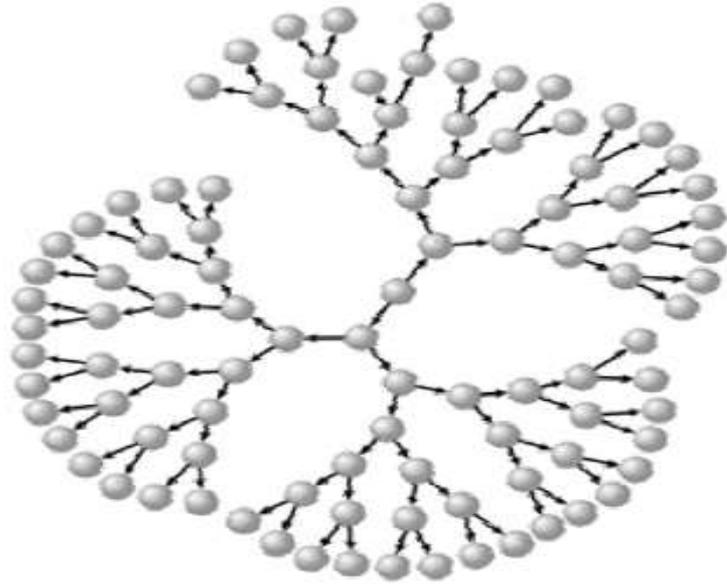

# What is the Metadata Layer?

It holds all of the table relationships for the entire CA PPM database

# What can we do with the Metadata Layer?

We can now give the engine all the information it needs to be able to archive and delete data from CA PPM

So what can the Archive Solution do?

- Can it archive and delete Projects?

# So what can the Archive Solution do?

- Can it archive and delete Projects?

# So what can the Archive Solution do?

- Can it archive and delete Any investment object?

## So what can the Archive Solution do?

- Can it archive and delete Any investment object?

## So what can the Archive Solution do?

- Can it archive and delete all of the investment's sub-objects?

## So what can the Archive Solution do?

- Can it archive and delete all of the investment's sub-objects?

## So what can the Archive Solution do?

- Can it archive and delete all of the investments sub-objects if they are custom objects?

## So what can the Archive Solution do?

- Can it archive and delete all of the investments sub-objects if they are custom objects?

## So what can the Archive Solution do?

- Can it archive and delete time periods?

# So what can the Archive Solution do?

- Can it archive and delete time periods?

# So what can the Archive Solution do?

- Can it archive and delete resources?

# So what can the Archive Solution do?

- Can it archive and delete resources?

## So what can the Archive Solution do?

- Can it archive master custom objects with custom sub-objects and loads of custom fields?

## So what can the Archive Solution do?

- Can it archive master custom objects with custom sub-objects and loads of custom fields?

## What else can the Archive Solution do?

- We can restore archive data into a separate database so you can easily report on archived data
- Archive table structures are very similar to the CA PPM table structure so that you can re-use existing report queries
- We de-duplicate the archive to reduce file sizes
- Archive functionality is integrated into the CA PPM user interface so no need for lengthy training
- Archive inventory kept of all archived objects so you can easily find which archive holds which data

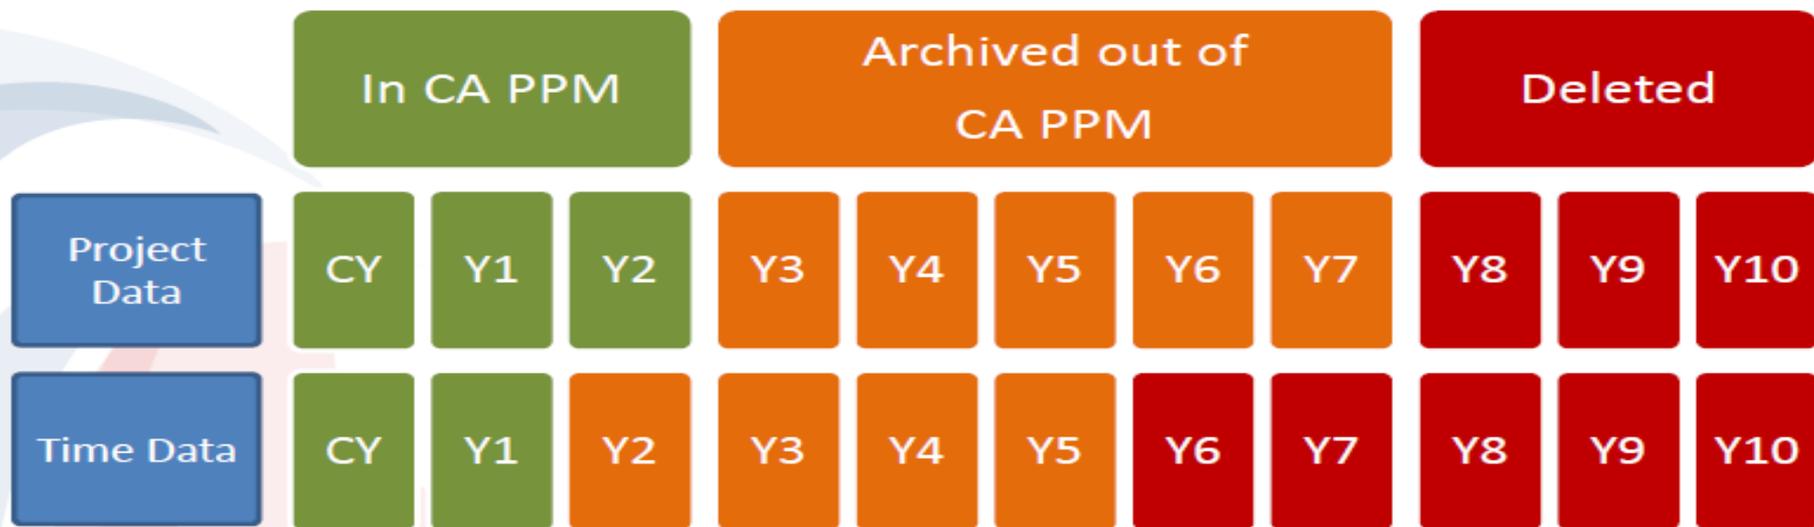

# So what CAN'T the Archive Solution do?

## So what CAN'T the Archive Solution do?

- We cannot automatically restore data from an archive back into CA PPM

## How do you see it being used?

- Usage will depend on organisational data retention policies

## So why do we need Archiving again?

- Improve Application Performance
- Reduce Storage Costs
- Corporate Data Retention & Regulatory Compliance

# How does your solution help?

- **Improve Application Performance**
  - Controlled volumes of data are held in the production database
- **Reduce Storage Costs**
  - Data can be moved to cheaper storage solutions (cloud, tape, disk, etc...)
- **Corporate Data Retention & Regulatory Compliance**
  - Archives can easily be deleted and destroyed after regulatory and legal retention policies have been met

# Strategic Themes

CA PPM

## OWN THE OUTCOMES

Easily catalog business objectives

## OWN THE PLANNING

Manage money & resources

## CAPTURE THE WORK

Integrate with everyday tools

## VALUE DRIVERS

### Comprehensive Ad Hoc Reporting

Immediate and Accessible

### Adaptable to Any Process

'No Code' Configuration Shows Everywhere

### Reflects Best Practices

Accelerators Represent Years of Experience

### Govern Globally, Manage Locally

Segment Configuration for Different Org Units

### Industry-Leading Financials

Auditable Transaction-Based Accounting

### Uniquely Scalable

Helps manage the largest firms in the world

# Technology and Product Architecture Goals

CA PPM

## Technology Goals

- Support for most common platforms & technologies (e.g. Windows, Linux)
- Increased development velocity
- Continuously improving code & product quality
- Lower total cost of ownership

## Product Architecture Goals

- Supportability
- Simpler deployment & upgrade
- Open RESTful APIs

# Roadmap: CA PPM

Timeline as of August 24, 2015

	Delivered	Planned	Under Consideration
Product/Releases	CA PPM 14.2	CA PPM	CA PPM
Marquee Features/ Business Value	<ul style="list-style-type: none"> <li>▪ <b>Simpler access to management insights</b> through integrated Ad-hoc Reporting that allows end-users to easily create ad-hoc reports from within the Clarity UI</li> <li>▪ <b>Optimized reporting performance and flexibility</b> via the Reporting Data Warehouse</li> <li>▪ <b>Improved support for Enterprise Portfolios</b> with better handling of portfolios in terms of size and performance</li> <li>▪ <b>Superior experience for MSP users</b> through support for project autonumbering and the introduction of a UI mapping screen in CA PPM.</li> </ul>	<ul style="list-style-type: none"> <li>▪ <b>True anytime anywhere access to management insights</b> due to support for the Tibco JasperMobile app</li> <li>▪ <b>Capture relevant team work information</b> via out-of-the-box integration to Rally and the introduction of RESTful APIs to facilitate other 3rd party integrations</li> <li>▪ <b>Help your organization manage your ever-expanding footprint of apps</b> via the Application Portfolio Management (APM) Accelerator</li> <li>▪ <b>Greater flexibility for PMOs and PPM administrators</b> through Studio Improvements, such as new charting and attribute types</li> </ul>	<ul style="list-style-type: none"> <li>▪ <b>Enhanced user experience</b> through Project Hopper-based, People First UX Improvements</li> <li>▪ <b>Continued facilitation of work capture</b> through additional expansion of the Rally integration and greater extension of the API layer</li> <li>▪ <b>Easier data capture from team members</b> via targeted timesheet enhancements based on feedback from the #1 idea on the Idea site</li> <li>▪ <b>More choice in reaping management insights</b> by making the data warehouse available without VPN access</li> </ul>
