

# CA NetMaster® Network Management for TCP/IP Set Up SmartTrace Security 200

## EDUCATION COURSE DESCRIPTION

### SUPPORTED PRODUCT RELEASES

CA NetMaster® Network Management for TCP/IP Version 12.2

### COURSE TYPE, LENGTH, & CODE

- Delivery Method: WBT
- Duration: 10 minutes
- 06NMR20150

### PREREQUISITES

- Familiarity with setting up resource access controls using external security managers such as CA Top Secret®, CA ACF2™, and IBM RACF®

### WHO SHOULD ATTEND

- Network Security Administrators

## Course Overview

CA NetMaster® Network Management for TCP/IP provides for the management and monitoring of your network infrastructure, devices, events and connections to facilitate high availability and performance for TCP/IP-enabled mainframe applications. By monitoring network health, tuning performance and proactively diagnosing and fixing issues before they're likely to affect business operations, the product helps you achieve reliable network connectivity.

This micro-learning course is designed to help network security administrators set up SmartTrace security.

## This Course Will Show You How To:

- Set up SmartTrace security to control access to packet payload data.
