

CA NetMaster® Network Management for TCP/IP: Business Application Overview 200

EDUCATION COURSE DESCRIPTION

SUPPORTED PRODUCT RELEASES

CA NetMaster® Network Management for TCP/IP Version 12.2

COURSE TYPE, LENGTH, & CODE

- WBT
- 15 minutes
- 06NMR20230

PREREQUISITES

- CA NetMaster® Network Management for TCP/IP Product Navigation 100 06NMR10100
- CA NetMaster® Network Management for TCP/IP Network Diagnostics 200 06NMR20160
- CA NetMaster® Network Management for TCP/IP: Customizer Overview – Parameters and the INIFILE 200 06NMR20210

WHO SHOULD ATTEND

- Network Administrators

Course Overview

CA NetMaster® Network Management for TCP/IP (CA NetMaster NM for TCP/IP) provides for the management and monitoring of your network infrastructure, devices, events and connections to facilitate high availability and performance for TCP/IP-enabled mainframe applications. By monitoring network health, tuning performance and proactively diagnosing and fixing issues before they're likely to affect business operations, the product helps you achieve reliable network connectivity.

This course is designed to familiarize the next generation of CA NetMaster NM for TCP/IP Administrators with the process of manually defining and using a business application to categorize connections into groups based on criteria such as application or TCP/IP stack job name, local or remote port number, or remote address.

This Course Will Show You How To:

- Explain the purpose of business applications.
- Define a business application.
- Use the CA NetMaster NM for TCP/IP network diagnostic functions to help troubleshoot connectivity problems.
