Incremental Release Announcement

CA Application Lifecycle Conductor

December 30, 2016

To: CA Application Lifecycle Conductor Customers

From: The CA Technologies CA Application Lifecycle Conductor Product Team

Subject: Introducing the Incremental Release Program for CA Application Lifecycle Conductor V3.0 IR2

On behalf of CA Technologies, we appreciate your business and the opportunity to provide you with high-quality, innovative software and services. As part of our ongoing commitment to customer success, we regularly release updated versions of our products. Today, we are pleased to introduce the formulation of an Incremental Release program for CA Application Lifecycle Conductor V3.0.

The CA Incremental Release Program is a customer-interactive delivery model where new product features are developed and released using the Agile development methodology. CA's development teams work closely with customers to create product features for rapid implementation. Rather than spending years building a software release full of features, we work with customers and release features incrementally, as they are completed.

If you are interested in participating in the Incremental Release program for CA Application Lifecycle Conductor V3.0, please review CA's Incremental Release Program – Support Policy and Terms and contact the CA Application Lifecycle Conductor Product Manager (Rose Sakach, Rose.Sakach@ca.com, +1 508 628 8649) to determine your anticipated level of participation in the program. While participation in the Agile development process is not mandatory, CA recommends that customers implementing a release during the Incremental Process participate to ensure that they are kept up to date with all communications going on with the release.

At the conclusion of the Incremental Release program, all of the new features and maintenance Introduced during the program will be rolled into a 'mature' release which then transitions to the standard support policy.

You can download your copy of CA Application Lifecycle Conductor V3.0 from CA Support Online. The Incremental Release will be recognizable by the genlevel field (IR2). A click-on End User License Agreement will pop up for your acceptance before the product can be downloaded.

The CA ALC 3.0 product documentation details all product features and how to install and use the product. To see all content, go to docops.ca.com/ALC and log in with your CA support credentials.

Thank you for your business, we look forward to working with you.
