

APM Command Center

Agenda

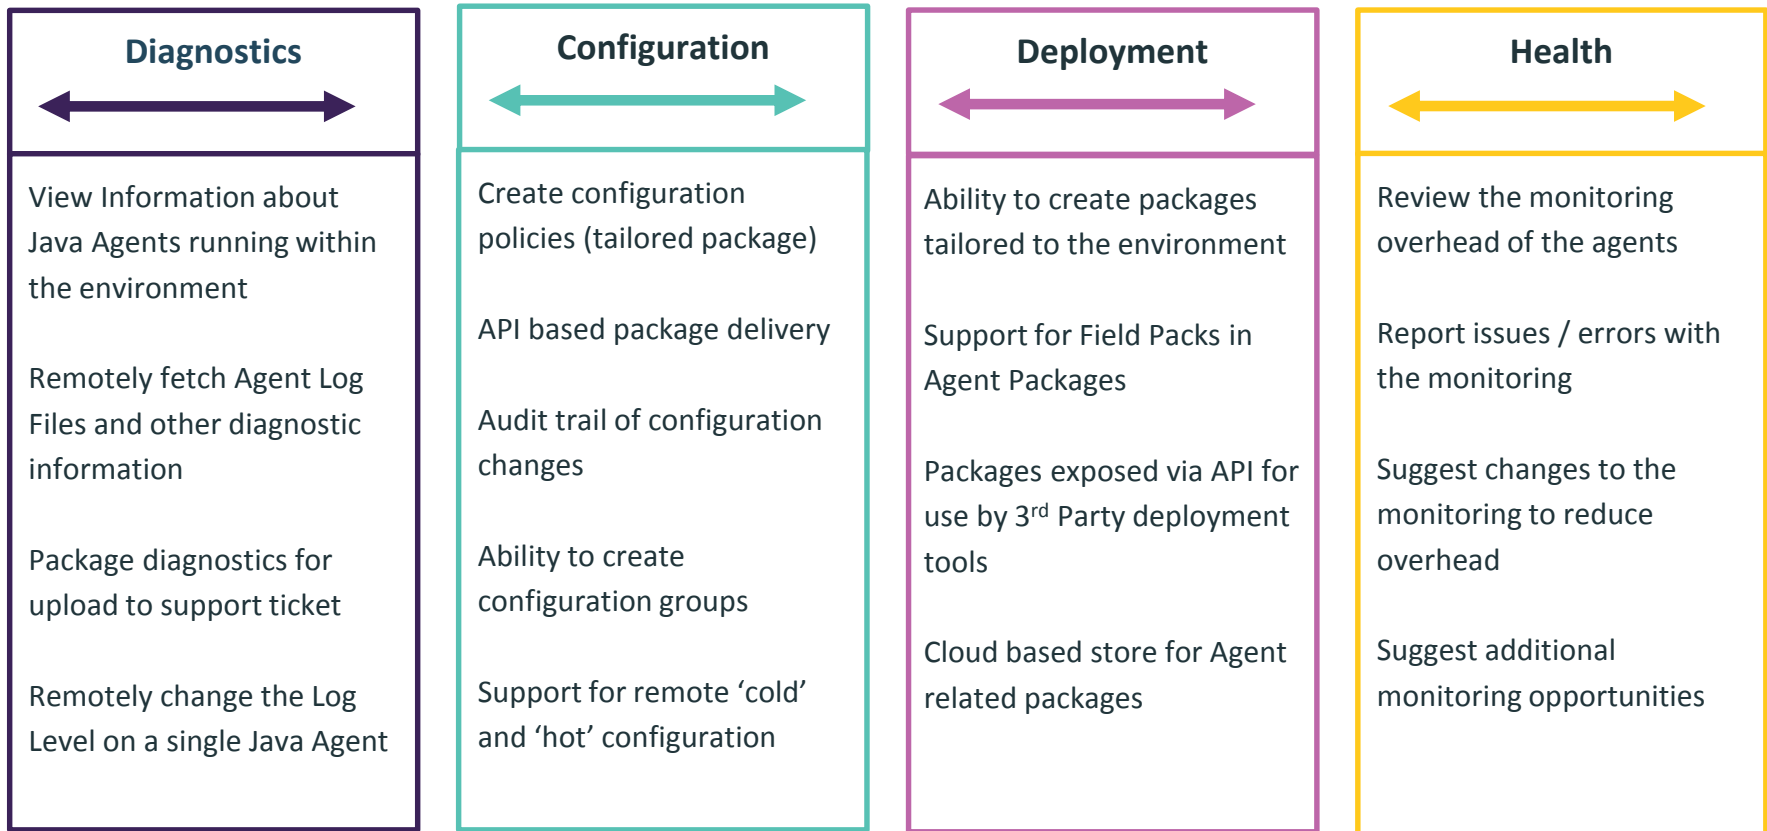

- Long Term Roadmap
- 10.2 Targeted Features
- 10.3 and beyond

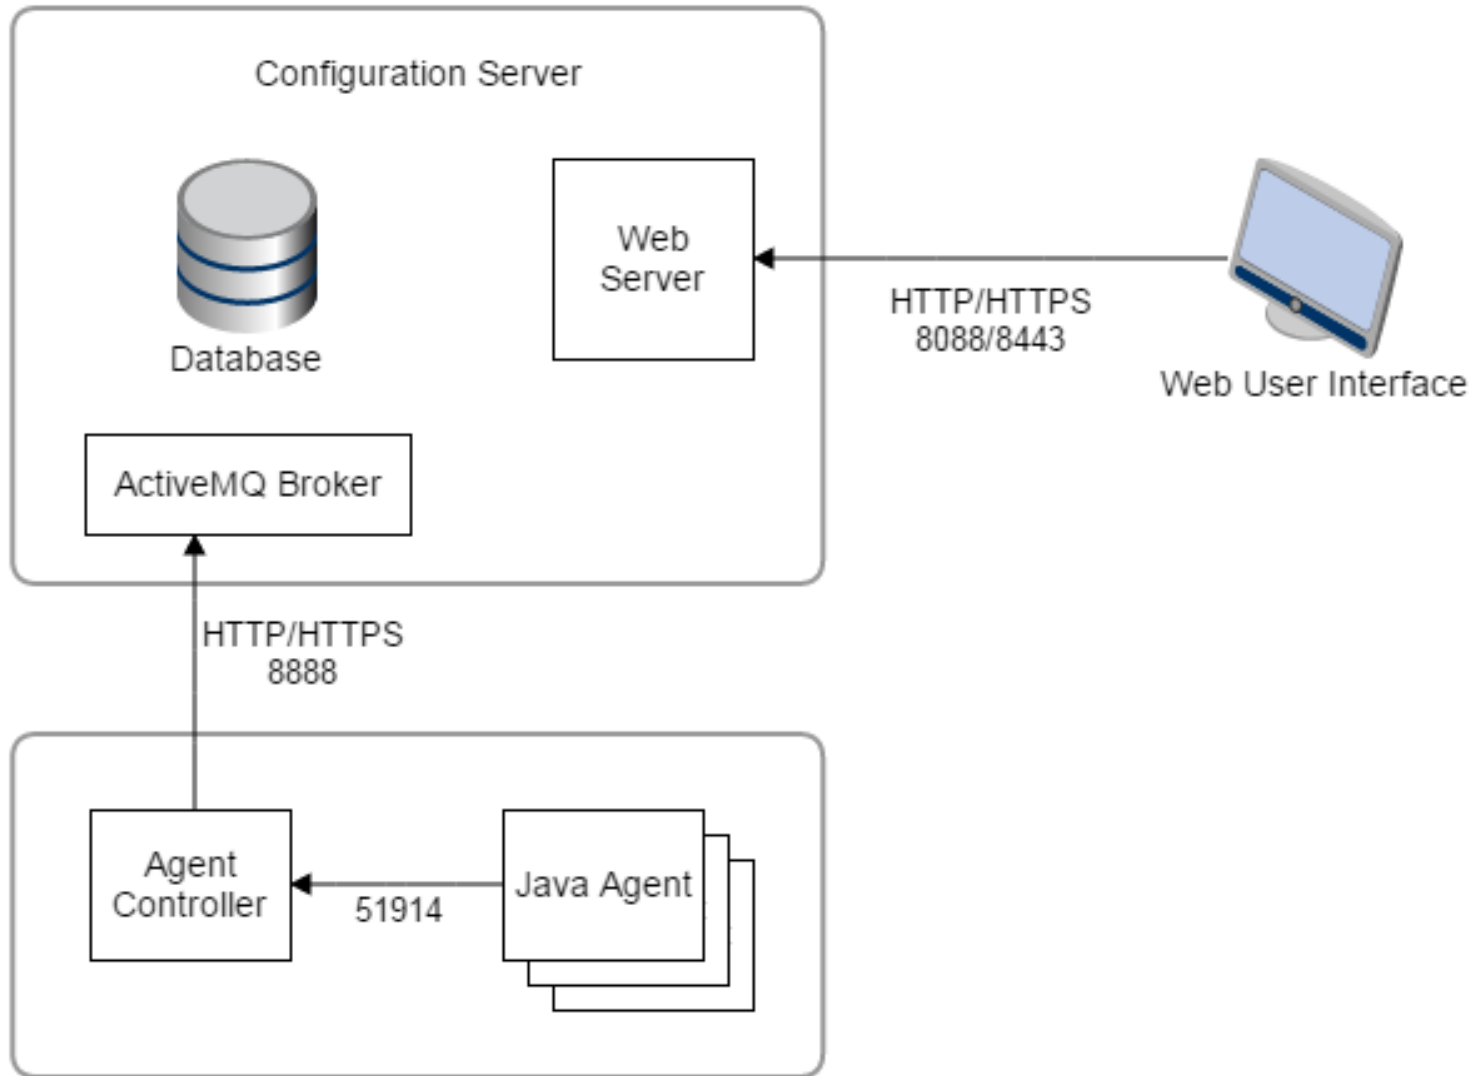

Focus Areas of APM Command Center

- ACC can be distilled into 4 distinct areas

Architecture

10.2 Demo – Click on picture for interactive demo

The screenshot displays the CA APM Command Center interface. On the left is a navigation sidebar with links for Home, Agents, Reports, and Packages. The main area is divided into two panes. The left pane shows a list of 6 packages, with 'WebSphere 8.5 - JRE 1.7 - Production' selected. The right pane shows the details for 'Tomcat - JRE 1.7 - PreProduction - Banking App'.

APM Command Center Search for Agent, Report or Package Kyle Thomas

6 Packages NEW

Name	Created At ↓	Agents
WebSphere 8.5 - JRE 1.7 - Produc...	10/5/2015...	1321
WebSphere 8.5 - JRE 1.7 - Produc...	10/5/2015...	3414
Tomcat - JRE 1.7 - Production	10/5/2015...	876
Tomcat - JRE 1.7 - Production - Ban...	10/5/2015...	654
Tomcat - JRE 1.7 - PreProduction	10/5/2015...	432

Hold Ctrl to select multiple packages

Tomcat - JRE 1.7 - PreProduction - Banking App DUPLICATE ?

Agent Package

Name	Tomcat - JRE 1.7 - Production - Banking App
Comment	Advanced Production package with SQL (Kyle)
Created At	10/5/2015 6:15 PM
Enterprise Manager	ACCDemoWin01:5001; ACCDemoWin02:5001
Agents	1321
Package Status	Saved with bundle conflicts

Right mouse click to copy package link. DOWNLOAD ZIP

Archive is disabled because there are still agents reporting to this package. ARCHIVE

Environment

JVM Vendor	Oracle Corporation
JVM Runtime Version	1.7
OS Name	Windows
OS Version	Any
Application Server	Tomcat
Application Server Version	Any
Agent Version	10.0.0.2

Bundles !

Name
Introscope Agent 10.0.0.2
WebSphere
WebSphere Autonoming
SOAP Server WebServices
SQL Monitoring
LeakHunter

Some bundles are missing other bundles that they depend on.

10.3/10.4 – enhancing configuration capabilities

- Next major target is to distribute packages to agents / application servers directly from ACC
 - Requires number of distinct sub-features
- User Groups and Roles
 - Includes integration with LDAP Services
- Dynamic Agent Groups
 - Ability to assign Agent to group based on rules
 - User roles can then be assigned to a group
- Deployment of agents to systems
 - Ability to push packages (from 10.2) to target systems
- Change Auditing
 - REST API exposed details of changes by user, date, etc
