General Availability Announcement

ca technologies

4/27/2018

To: CA Technologies CA Directory Customers
From: The CA Technologies CA Directory Team
Subject: General Availability Announcement for CA Directory r14.0

CA Technologies appreciates your business and the opportunity to provide you with high-quality, innovative software and services. As part of our ongoing commitment to your success, we regularly release updated versions of our products.

Today, we are pleased to announce that CA Directory r14.0 is now available.

CA Directory

Version: r14.0

What is included in this release:
This release contains several new features for the Directory product. These include:

- **SCIM 2.0-compliant data REST API** – A new REST API to manage users and groups according to the SCIM 2.0 standard. It exposes the internal LDAP schema to an external JSON output by mapping the attributes during the configuration.
- **Directory Monitoring** – The administration UI now embeds a charting capability to display various operational metrics in real time. These metrics can also be retrieved through the management REST API's monitoring endpoint.
- **Email notifications** – The system alerts can be configured to be sent as email notifications to users. The configuration of the notifications includes complex filtering to control which alerts are sent to which users.
- **Additional localizations** – The UI and documentation have now been translated into Brazilian Portuguese and Spanish, in addition to French and Japanese.

This release also changes the Platform Support Matrix (PSM) by focusing on the Windows and Linux operating systems, including several variants, and deprecating support for Solaris, AIX and HP-UX.

Support for CA Directory 14.0 will be available through April 2021. Once that End of Support date is reached, provided Extended Support is available, customers can contract with CA for Extended Support for another 12 months. Basic Extended Support will be discontinued on April 2022.

For more information about this release, including any updates made after this announcement, refer to the release notes section of the CA Directory documentation.

You can download your copy of CA Directory r14.0 from CA Support Online.

Helpful Resources
CA provides resources to help you in the form of education, product documentation, community user group environments, and experienced support personnel:

- Documentation
  Find details about the product features included in this release. To ensure that you see all available materials, log in to the site by using your CA Support ID and password.
- CA Learning Paths
  Learn more about CA products through education offerings.
- CA Communities
  Connect, learn, and share with other customers in a collaborative online environment.
- Release and Support Lifecycle Dates
  Stay knowledgeable about lifecycle dates and associated policies. *Reminder: When a platform release reaches End of Support, CA Technologies support of the platform simultaneously reaches End of Support.*

Help shape products
CA Technologies invites you to provide input about your CA products by participating in the Customer Validation Community. To join, register on validate.ca.com, and receive invitations to all discussions and reviews.
