

## General Availability of Symantec SiteMinder (previously called CA Single Sign-On) 12.8.04

On behalf of Symantec, a Division of Broadcom, we appreciate your business and the opportunity to provide you with high quality, innovative software and services. As part of our ongoing commitment to customer success, we regularly announce updated releases and maintenance for our products.

We are pleased to announce the recent release of SiteMinder 12.8.04. This update includes new features, certification for Oracle 19c, upgrades of internal libraries (OpenSSL, Tomcat, etc.) and bug fixes.

**New Feature:** SM\_Authentication Level in OIDC flows

**Business Value:** Enables simpler OIDC-based integration with applications that requires authentication level information (such as those that are following the NIST 800-63B standard)

**New Feature:** Support for “Nested Groups” or “Users, if common across multiple groups” in SAML configurations

**Business Value:** Lower cost of administration of partnerships

**New Feature:** Identity Mapping feature extended to WS-Federation

**Business Value:** Lowers cost of administration and may lower subscription fees for Azure integration

**New Feature:** Modification of administrative scope required for private key management for federation partnerships

**Business Value:** Increase security

### Documentation content for the Service Pack:
