

General Availability Announcement

December 2023

To: HTAC Customers
From: Broadcom's HTAC Product Team
Subject: General Availability Announcement for HTAC 2.1

On behalf of Broadcom, we are pleased to announce that HTAC 2.1 is Generally Available (GA).

This is the first release of HTAC as part of Broadcom. With 2.1, the HostBridge Transaction Analytic Connector has been rebranded to HTAC.

This new release includes:

- The installation of the product using SMP/E batch JCL or IBM z/OSMF
- LMP Key support which gives the ability for centralized licensing with other Broadcom products, and enables ISV SCRT reporting

All enhancements and fixes from previous versions are included in 2.1.

We also encourage you to visit the HTAC product information page at [Support](#) and [Tech Docs](#).

You can download your copy of HTAC 2.1 online at [Support](#) where you can also utilize the case management system. To install your product, follow the installation procedures for your product at [Tech Docs](#). If you have any questions or require assistance, contact [Support](#).

Should you need any assistance in understanding these new features, or implementing this latest release, our implementation services partners can help. Please contact your local account representative for more information on how they can help. To connect, learn, and share with other customers, join and participate in our [HostBridge Community](#).

For a list of Mainframe Education courses recommended by role, please visit the [Learning Paths](#) and select the desired product. We update courses based on functional impact as well as high-demand; therefore, courses created from previous releases may apply to the current release.

Please review our End of Service / End of Life Policy at [Broadcom Maintenance Policy Handbook](#).

Thank you again for your business.
