

Why upgrade to Spectrum 10.0?

The top five reasons are...

#1 64-bit Architecture

Mega-enterprise
scale with
lowered TCO

CA Spectrum 64-bit reduces the time and costs associated with administering multiple management consoles by supporting tens of thousands of devices and millions of models; drastically improving scalability while simplifying staff management.

“With CA Spectrum 10.0, we expect to cut costs and improve productivity by 60%.”

– Large IT Services Provider

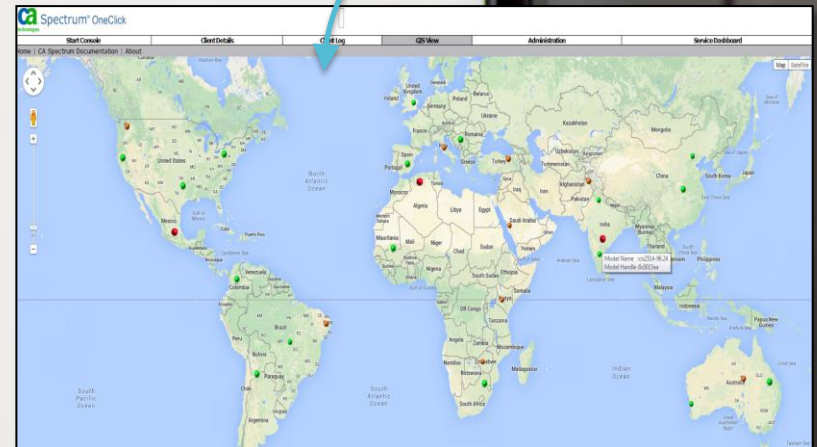

#3 Global Information System Views

Global Information System (GIS) map integration for an enhanced view into any service related outage

#4 Reporting Enhancements

Optimized report queries and reduced TCO for deployments

[Watch the use case video](#)

CA Spectrum reduces time and cost associated with report administration by adding multi-tenancy support while reducing the number of CABI server instances needed for deployment.

Additionally, optimized report querying has been enhance for very large Spectrum deployments.

#5 Enhanced Search Management

New simplified device searches and enhancements to large search queries continue to drive ease of use for Spectrum administrators.

"A great example of a simplified user experience is the new search features in CA Spectrum 10.0 and the solution is 40% faster than the previous version."

– Large IT Services Provider

Simplifying the
user experience
with device search
enhancements
